Send your parcels on a sea voyage. It's good for your financial health.

FIND OUT MORE!

Even today economy is sometimes more important than speed.

When this is true of parcels, use the excellent Royal Mail Surface service.

It takes a little time, but it's just as secure and saves you a great deal of money. For example, a parcel weighing up to 3kg. can be sent to:

Canada for £3.50
Japan for £4.25
Hong Kong for £3.25
Saudi Arabia for £3.35

And that's low!
The price of the stamp includes collection, handling, customs documentation, delivery in most countries – all the 'extras' in fact that most other carriers load on you.

When speed is a priority, Royal Mail Air Parcels compare favourably with any alternative at, as a recent independent survey showed, ⅓ to ¼ of the cost.

If you send goods abroad regularly, surely it makes sense to investigate further the service that cuts costs and lets you set realistic priorities.

Ring Royal Mail Overseas Parcels on 01-476 7877 or return the coupon NOW!

To: Stanley Patterson,
FREEPOST, Room 136, Postal Headquarters,
St. Martin's-le-Grand, LONDON EC1B 1HQ. (No stamp required.)

Government supports major expansion plan for Slough power station

Slough Estates Ltd has awarded contracts totalling £9 million for the installation of new electricity generating equipment at the power station on its industrial estate in Slough. Because the new installation meets high standards of efficiency and therefore energy conservation, it is eligible for a grant under the Department of Industry's energy conservation scheme which will amount to up to 22 per cent of the expenditure.

The contract has been awarded to John Brown Gas Turbines with Babcock and Wilcox as nominated sub-contractor for the provision of the boiler plant. The project is being engineered and managed by Slough Estates in conjunction with Preece, Cardew and Rider, consulting engineers.

The existing power station has been progressively expanded to meet the increasing needs of industry since the trading estate was established in the early 1920s. Total capacity is now 67.5 MW and the new heavy duty industrial gas turbine will have a capacity of 23 MW.

This new gas turbine will be operated in conjunction with a waste heat boiler which uses the energy remaining in the exhaust gas from the turbine. The boiler installation can be fired separately. The new installation will embody the latest technology in fuel-burning efficiency and will be capable of operating on either natural gas distillation or residual fuel oil.

The Slough Estates power station currently provides electricity and steam to over 800 industrial users on the estate employing some 26 000 people as well as 2000 residential and commercial users outside the confines of the estate.

Dust victims to get compensation

Provisions of the Pneumoconiosis etc (Workers' Compensation) Bill will come into force on 4 July. It is hoped that payment of compensation will begin in early autumn of this year. A detailed guide to procedure for claimants will be issued by the Department of Employment as soon as possible.

The act provides for lump sum payments from the government to people who are certified as disabled by pneumoconiosis (which includes silicosis, asbestosis, kaolinosis), byssinosis or diffuse mesothelioma, and have not received compensation from their employers and are now unable to claim through the courts because the employers in whose service they contracted the disease have gone out of business. It also provides for such payments to the dependants of people who were certified as disabled by one of the diseases at the time of their death – or where the dependant is receiving death benefit because of the disease.

Qualification for payment is related to the diseases rather than the industry in which the disabled person worked. Industries concerned include textiles, iron ore mining, potteries, slate quarrying, foundries and work with asbestos.

Details of the scale of payments are still being worked out. They will vary according to the degree of disability and are likely to range from a minimum of £300 to a maximum of £10,000. They will be set out in regulations which will also explain how claims should be made. It is estimated that the initial cost is unlikely to exceed about £5 million with a probable annual cost thereafter of around £70,000.

Expansion of vocational preparation proposed

Proposals for expanding vocational preparation for 16 to 18-year-olds in employment are contained in a consultative paper published jointly by the secretaries of state for employment, education and science, industry, Scotland and Wales.

The proposals include the development of 'traineeships' formally recognised in the same way as apprenticeships for young people in their early months at work. These traineeships would be work-based, last several months and would provide an integrated programme of education and training both on and off the job, combining elements of induction, basic job skills and knowledge, and personal skills needed at work and in adult life generally.

Traineeships would be provided in a joint enterprise between the training and the education services. The industrial training boards (ITBs) and other national training bodies would act as a focal point for developing traineeship programmes for their sectors.

The further education service would have a vital role in the programme, especially in providing the off the job elements of vocational preparation. The careers and youth services would also be involved in a variety of ways.

The document explains that the aim of the proposals is to give more help to the 200 000 or more young people who each year take jobs where there is no further education or significant planned training. Their performance in their present job should be improved and their adaptability and potential for the future increased.

The proposals are intended to build on the experience already gained from the pilot programme of unified vocational preparation and from the youth opportunities programme for the young employed. Decisions on these proposals will depend on the outcome of the consultations and the availability of resources.

Progress after any decisions would then depend on the full participation of the agencies and organisations concerned – particularly the training boards and the further education service, but also the careers service and youth service – working together with employers to provide a wide variety of traineeships geared to the needs of individuals and their employers.

The consultative paper envisages a voluntary approach under which initially employers would be helped with grants covering the main costs of participating in the programme. It proposes that a target would be set, for example, that one-third of new entrants to employment should be receiving vocational preparation three years after the start of the programme.

The target would then be reviewed to see if a new target should be set or if some statutory reinforcement to the programme was called for.

BR improves again on financial objectives

British Rail had an operating surplus before interest of £58.3 million in 1978. In its annual report published on 11 April the board says that it again delivered its contract with the government on passenger services, beating the agreed price by £8 million. This was £56 million below the cash limit set by government.

More passengers travelled more often and for longer distances and passenger miles recorded were the highest for four years, with passenger volume up by 3 per cent. Non-passenger rail activities made a small surplus in 1978 with the combined freight and parcels businesses meeting financial targets only three years after requiring government support of £66 million.

The Queen's award for export achievement was earned by Transmark, the board's transport consultancy, for a near sixfold increase in overseas' earnings. British Rail Engineering won export orders worth £50 million.

Leyland delivery vans for Post Office

The Post Office has chosen Leyland to supply more than 800 postal delivery vans from a number of competitive manufacturers. The vans, which will be delivered during the next 12 months, are worth a total of more than £5 million. They will be built at the Leyland Bathgate plant in West Lothian.

Photographic code of practice concluded

A photographic code of practice supported by about 16 000 firms is to come into effect on 1 May.

Launching the code on 10 April, Director General of Fair Trading Gordon Borrie said it should help reduce the 3000 complaints about cameras and film processing which reach the Office of Fair Trading each year via local consumer advisers.

The code is supported by seven trade associations representing retailers, manufacturers, importers, film processors, repairers, and professional photographers. The 16 000 firms supporting it account for more than 75 per cent of the photographic trade in the United Kingdom. The public will be able to identify member firms by a code of practice symbol.

The code sets out the obligations of member firms which, for retailers, include promises to

☐ Supply pamphlets and a reference manual with each piece of equipment, to include information on operation, care and maintenance, diagnosis of faults, guarantee terms and servicing procedures

☐ Allow the customer to inspect the manufacturer's guarantee before purchase

☐ Quote delivery dates in writing – when taking a deposit – and offer refunds when those delivery dates cannot be met.

The code will also oblige retailers to display price lists for developing films and give the customer a receipt with a firm collection date and to carry out repairs within 21 days, keeping the customer informed of any unforeseen delay. In addition, the retailer must obtain the customer's permission for a repair to continue where the cost of repair is substantially more than the original estimate, and provide the customer with an itemised invoice.

Mr Borrie welcomed the introduction of the four-step system for dealing with complaints which, he believed, would guarantee customers efficient and sympathetic treatment.

He said that he was pleased to see that retailers were encouraged to give their staff more training, both in dealing with the public and in technical knowledge. Mr Borrie said that he believed that many people were bewildered by the array of equipment available and was sure that customers would be happier, and complaint levels reduced, if someone was always on hand to explain, for example, how a camera worked or why a batch of holiday snaps had turned out so badly.

Purchasers of second-hand photographic equipment are promised a better deal under the code. Retailers will carry out a detailed inspection of all second-hand equipment before sale and will guarantee second-hand items wherever possible.

The responsibilities of manufacturers complement those of the retailers. They must supply a reference manual and detailed instructions with each item; maintain stock of spare parts for at least five years – or 10 years in the case of expensive equipment – following the last sale to the trade; and provide guarantees covering all parts and labour costs, which are transferable and extendable and which state the name and address of the repair service.

In addition, professional photographers have promised to inform customers of prices and completion dates; advise clients if they are asked to undertake work in which they are not qualified or experienced; and ensure that parents do not object to school photographs being taken.

Mr Borrie said that although he believed the code offered consumers plenty of good news, he was concerned at the existence of one specific weakness. 'I am somewhat disappointed that the code is not more forthright about the payment of compensation by processors and retailers if a customer's films are lost or damaged. I recognise that under the code processors may tell consumers what is reasonable compensation.' Mr Borrie stressed that it was important that any customer who was unhappy with compensation offered or who was referred to a notice limiting liability for loss or damage should not be put off and should seek legal advice about whether to take the matter to court or arbitration. 'In practice, I expect that the advent of the code will herald the end of unreasonable disclaimers and when I review the working of the code, I shall pay particular attention to confirming that processors and retailers have been treating their customers fairly,' he said.

Group consumer credit licences for accountants

Group licences are being issued under the Consumer Credit Act 1974 to the four professional bodies of accountants, it was announced by Gordon Borrie, Director General of Fair Trading, on 10 April.

The licences will held by the Institute of Chartered Accountants in England and Wales, the Institute of Chartered Accountants of Scotland, the Institute of Chartered Accountants in Ireland, and the Association of Certified Accountants. The group licences will cover the businesses of category A, consumer credit category C, credit brokerage and category D, debt-adjusting and debt-counselling.

The scope of the group licence is limited to activities arising in the course of practice as a chartered or certified accountant and does not extend to other business activities in which some accountants engage.

The licences will take effect from 3 August, the beginning of the first renewal round of licensing under the act, and will be valid for three years. They have been issued after detailed discussions both with the consultative committee of accountancy bodies and with each of the four accountancy bodies concerned.

The decision to grant group licences means that those practising members of the four bodies who already hold (or need to obtain) licences under the Consumer Credit Act for these categories will not have to apply for renewal of their standard licences when they expire. In these cases, renewal documents relating to the standard licences should be ignored. However, if cover is required for categories additional to categories A, C and D (or to carry on an activity not arising in the course of practice as an accountant), a renewal application for a standard licence in varied terms will need to be made.

Borrie not referring copper-semis to Monopolies Commission

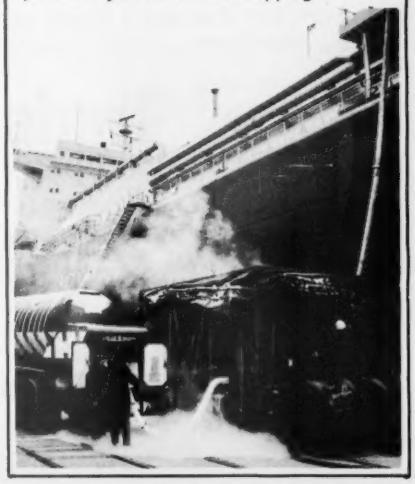
The supply of copper semi-manufactures is not to be referred to the Monopolies and Mergers Commission, Gordon Borrie, Director General of Fair Trading, has decided. Although the intention to make such a reference had never been formally announced, it had been made known to the industry.

Copper semi-manufactures are copper products at an intermediate stage of the manufacturing process, such as plates, bars, wires, stampings and pressings, out of which the final products are made.

Pricing arrangements for copper semis -- list prices with discounts and rebates – and a high degree of price parallelism appear to be very similar to those in certain sectors of the insulated wires and cables industry, says the Office of Fair Trading. The Monopolies and Mergers Commission's report on the supply in the UK of insulated electric wires and cables, just published, makes no adverse findings against these pricing practices in the cables industry.

Despite the representations he has received, Mr Borrie thinks he would not be justified in now asking the commission to look at copper semis. This would involve studying the same pricing matters carried on by, in a number of cases, the same producers as had already been the subject of the commission's investigation into cables and not found to be operating against the public interest. Mr Borrie adds that he will continue to keep such situations under review as part of his statutory duty to monitor 'all sectors of the economy in which competitive forces may be weak'.

Southampton's Ocean Terminal has been used for the port's first nitrogen purging of a liquid natural gas tanker. The purge, which used 145 tons of nitrogen, was carried out by BOC Ltd in the deep-water berth normally reserved for the QE2. Picture shows a BOC road tanker discharging liquid nitrogen into the mobile purging rig. The ship is the *Pollenger*, owned by LNG carriers of Copenhagen and operated by P. & O. Bulk Shipping.



Trade Indemnity

Points from Mr. K. M. Bevins's statement to shareholders

RESULTS

On 31st December 1978, the 1976 Underwriting Account, which was closed on that date, produced a record underwriting profit of £2,447,794. After adding investment income of £1,145, 298 and charging taxation of £1,858,000, the net profit for the year was £1,735,092.

The Directors recommend the payment of a final dividend of 5.91561p per share which, with the interim dividend of 3.46269p per share, is the maximum permitted.

GENERAL

Largely because of the slower rise in raw material and output prices, helped in turn by a relatively strong pound, the percentage increase in our premium income last year was no more than 6.6 per cent. Such economic growth as did take place in the U.K. in 1978 was, in the main, consumer-led. In the commodity and manufacturing sectors, which represent a substantial part of our business, there was little, if any, growth in real turnover. As a result, total transactions covered by the Company last year rose by only 4 per cent. Nevertheless, insured turnover at £9,162 million was an all-time record.

NEW BUSINESS

In the U.K., business from new policy-holders in 1978 showed an encouraging increase, with the estimated annual value of new business premiums rising from about £1,250,000 in the previous year to more than £1,418,000. In the past year, our Marketing and Underwriting Divisions have been reorganised and with the computer fulfilling an increasing role in the day-to-day processing of enquiries we are, I believe, now better equipped than ever before to meet the demand for our services that we expect to emerge in 1979.

Copies of the Report and Accounts for 1978 are available from The Secretary, Trade Indemnity House, 12-34 Great Eastern Street, London EC2A 3AX.

Report calls for strong code of conduct for double glazing firms

Double glazing firms should adopt a strong code of practice to protect the customer, says the Price Commission in a report published on 10 April. It stresses that, as a matter of urgency, firms selling to householders should provide potential customers with three things: a comprehensive price list, a formal written price quotation for work and a government leaflet pointing out that prices vary widely in the industry and that customers should obtain more than one quotation for work.

If these measures are not implemented, says the report, the interests of the users should be protected by a restriction on prices and charges, although this would be a second best solution.

Price Commission sectoral examination report no. 14 on prices, costs and margins of metal doors and windows for domestic properties (HMSO, £2.00), covers the commission's examination into four distinct markets: double glazing firms selling aluminium windows and doors to householders; aluminium windows and doors for new houses; steel windows and doors for new houses; and domestic garage doors made of metal for new and existing domestic properties.

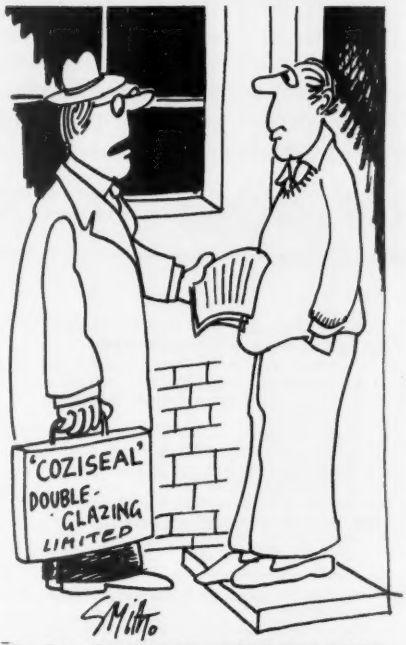
Roy Hattersley, Secretary of State for Prices and Consumer Protection, is considering the report and will be consulting interested parties on its findings.

On aluminium windows and doors for existing domestic properties, the commission is concerned about the failure of price competition which it considers could be achieved by a strong code of practice covering product quality, safety, selling methods, installation, guarantees and consumer information. The commission also says that the first call discount system, whereby customers pay up to 10 per cent less if they agree to buy on the first visit from a salesman, should be discontinued.

The commission has a series of criticisms of this sector. It says that highest prices are roughly twice the lowest prices, yet differences in prices are not consistently linked to differences in standards of quality; only one of the four largest companies gives potential customers a price list. None of the other large companies does so; price increases over the last three years have been greatest among the largest companies; average promised delivery time is as long as three months and only 72 per cent of deliveries take place within the promised period. In 1978 net profit margins of the four major companies, which together hold 41 per cent of the market, averaged 11 per cent – against 5 per cent for other large and medium-sized firms – and aggregate net profits before taxation rose from £4.3 million in 1976 to £11.5 million in 1978.

The return on capital employed of the major companies averaged 44 per cent on an historic cost accounting basis in 1978.

The commission feels the Office of Fair Trading might look into three further matters: the excessive discounts offered to encourage full payment with order, especially as delivery periods of four to five months are common; the unreasonableness of asking for extensive deposits long before delivery; and reservations about some claims made in advertising about the extent of fuel savings and reductions in condensation.



'The Price Commission would like me to inform you that you'll probably get the job done cheaper and better by our competitors.'

On aluminium windows and doors for new domestic properties, the report says that the four main companies selling to trade customers are each associated with an aluminium extruder and account for 70 per cent of this £11 million a year market. The commission found no evidence of price parallelism and concluded that the companies operated competitively and were reasonably efficient.

Two firms dominate the steel windows and doors market: Crittall, the price leader with half the market, and Ideal Williams with a third. There is considerable competition with other types of windows, but the commission says it will continue to monitor Crittall's prices carefully.

It added that the annual offtake rebates, given by the two major companies to regular large-volume customers, 'may prevent smaller and possibly more specialised manufacturers from competing on equal terms in the market for steel windows'. Unless the companies can establish that they are a substantial help to their production planning, they should be discontinued.

Two companies – Henderson and Westland – dominate the domestic metal garage doors market. The commission finds that 'given the nature of competition in this market, Henderson's profitability is high'. However, because of the increased level of capital expenditure planned over the next two to three years it decided not to recommend a price restriction. Nevertheless, the commission says that if it finds that customers are not benefiting from the lowest prices commensurate with satisfactory quality and service then it may wish to investigate the individual manufacturers. The commission makes the same recommendation on annual offtake rebates as it does for steel windows and doors.

Insurance brokers: professional indemnity rules

Provisions for indemnity insurance for registered brokers, together with the grants scheme to be operated by the Insurance Brokers Registration Council, are contained in an order to be published today (20 April). The Insurance Brokers Registration Council (Indemnity Insurance and Grants Scheme) Rules Approval Order 1979 (SI 1979/408) approves rules made by the council under section 12 of the Insurance Brokers (Registration) Act 1977.

The rules require registered brokers (practising insurance brokers and enrolled bodies corporate) to take out professional indemnity insurance and also provide for the making of grants to persons who have suffered loss as a result of the negligence or fraud or other dishonesty of insurance broking firms or their employees.

The rules (which will affect only practising insurance brokers and enrolled bodies corporate registered with the council) come into operation on 1 July, although grants under the grants scheme will not be payable until a later date.

Small firms' workshop in Dundee

Dundee and Tayside councils are holding a small firms' workshop on 25 April to which every small manufacturing firm in Dundee is invited. Object of the workshop, which will bring together 14 organisations dealing with small firms, is to give companies up-to-date information on the various forms of assistance available to them, such as regional development grants, assistance with product development, management, marketing and exporting advice, assistance with employee and management training and local government services and facilities.

The small firms' workshop is to be held at Invercarse Hotel, Dundee. Further details can be obtained from David Dye, City of Dundee District Council, City Chambers, Dundee DD1 3BY, tel. 0382 23141 ext. 428.

Seaspeed's London-Paris increase

British Rail's Seaspeed London to Paris capital city services rose by nearly 27 per cent over the past 12 months. This represents over 50 000 more passengers carried to Paris compared with the previous 12 month period.

British Rail Hovercraft says the reasons for the big increase can be directly attributed to a flexible fares package introduced in May last year and the introduction of the first of two Super 4 craft which increased carrying capacity from 254 to 416 seats.

Health and Safety Executive Publications

The 1974 Health and Safety at Work Act gave the Health and Safety Commission responsibility for keeping some 25 million people informed of guidelines and regulations for their health and safety in places of work. The Commission has undertaken progressively to revise, standardise and extend the existing regulations and recommended practices. HSC/HSE publications reflect the major programme of research, inspection and consultation which is in hand.

Priced publications are obtainable only from HMSO or through booksellers. Some general leaflets, advice and information are available free of charge from HSE Area Officers or by post from HSE General Enquiry Point, Baynards House, 1 Chepstow Place, London W2 4TF (Tel. 01-229 3456 ext. 734).

Degree day service: figures for March

Degree day figures for March, published by the Department of Energy, are shown in the table. This service is designed to help industry and commerce improve the efficiency with which space heating systems are used.

The figures are a record of the extent and length of time in a particular month that the external temperature fell below a base figure of 15.5 degrees C (60 degrees F). Because this affects the amount of fuel needed to provide a given level of space heating the figures can be used to check on the efficiency of heating systems. By comparing the amount of fuel used with the number of degree days in monthly periods of different years, energy managers and others can monitor the performance of heating plant and operate it more economically.

Detailed information about the system is contained in a free booklet *Degree Days* (no. 7 in the Fuel Efficiency series) available from the Library, Department of Energy, Thames House South, Millbank, London SW1P 4QJ, tel. 01-211 3394. It explains the theory and practice of using the figures and contains a map showing the locations of the 17 Meteorological Office stations and the regions covered.

March degree days (base temperature 15.5 degrees C)

Region	Calculated average for Mar 1957-77	1978 Mar	1979 Mar

DoI advance factories

New work is beginning on a number of advance factories in Yorkshire and Humberside and the north of England. They are being built by the English Industrial Estates Corporation for the Department of Industry. Details are as follows.

Rotherham, Scarborough and Whitby
A factory of 450 m² at Hellaby industrial estate, Rotherham. The factory should be ready for occupation in August.

A factory of 450 m² at Cayton Road, Scarborough, which should be ready for occupation in September.

A factory of 750 m² at Stainsacre industrial estate, Whitby. The premises should be ready for occupation in October.

Inquiries regarding purchase or lease: Regional Director. Department of Industry, Yorkshire and Humberside Region, Priestley House, Park Row, Leeds, tel. 0532 443171.

Gateshead and Wooler
A terrace unit type factory at Team Valley, Gateshead, divisible into four individual units of 160 m² each. The premises should be ready for occupation in September.

A factory at Auction Mart, Wooler, Northumberland, of the terrace unit type and divisible into two individual units of 225 m² each. It should be ready for occupation in July.

Inquiries regarding purchase or lease: Regional Director, Department of Industry, Northern Region, Stanegate House, Groat Market, Newcastle upon Tyne NE1 IYN, tel. 0632 24722.

Fluorescent light fittings recalled

A number of fluorescent light fittings marketed under the trade name Quickstrip and bearing the British Standards Institution kitemark could become dangerous under certain circumstances, warns the institution. The unit is a 2 ft double-tube fitting manufactured by Light Ideas, model numbers QS2D and QS2DD, designed for inserting into a bayonet-cap lamp-holder.

There is no record of any accident with these fittings, says the BSI, but on discovery of a design fault which could give rise to the exposure of a live part, the manufacturer has recalled stocks from retailers. Following consultation with the Department of Prices and Consumer Protection, BSI has launched a campaign telling those who have purchased these units to discontinue their use and return them to the retailer for refund, or if in doubt to telephone the manufacturer at Winscombe 2801.

Single tube and circular models are not affected, nor are models sold before April 1978.

Merger proposals cleared

Secretary of State for Prices and Consumer Protection Roy Hattersley has decided, on the information at present before him, not to refer the following proposed mergers or aquisitions to the Monopolies and Mergers Commission under the provisions of the Fair Trading Act 1973:

RTZ Chemicals Ltd/United Sterling Corporation Ltd

National Enterprise Board/parts of Vickers Offshore Engineering Group

Comet Radiovision Services Ltd/Caledonian Holdings Ltd; London and Midland Industrials Ltd/Caledonian Holdings Ltd

Harris Queensway Group Ltd/Timberland Ltd.

The British Aluminium Company Ltd/ High Duty Alloy Extrusions Ltd.

Associated Communications Corporation Ltd/Intereuropean Property Holdings Ltd

British Steel Corporation/Dunlop and Ranken Ltd

Rockwell International Corporation/Wilmot Breedon (Holdings) Ltd.

New scheduled services at Gatwick

Scheduled services to 15 new destinations from Gatwick airport have been announced so far this year, and the British Airports Authority says there is hope of more in the pipeline. The new routes are to Spain, Portugal, Gibraltar, France, Italy, Greece and Denmark, many with daily flights.

Serving Spain and Portugal are British Airways with scheduled flights to Alicante, Faro, Malaga and Palma using Boeing 737 aircraft. Gibair and British Airways are now serving Gibraltar with flights on alternate days, giving a daily service except for Mondays.

Following the air services agreement, SAS has started a daily service from Gatwick to Aarhus in Denmark, the first time that London has had a connection to the Danish mainland. On 1 June both SAS and British Airways start scheduled daily services to Copenhagen, giving Gatwick two services a day in each direction.

On 1 July British Airways sill start a scheduled daily services to Copenhagen, giving Gatwick two services a day in each direction.

On 1 July British Airways will start a on 1 November they will start operating their rationalised their joint Gatwick-Dublin route to give a return flight both morning and evening.

New daily scheduled services to Le Havre, Caen, Rennes, Morlaix and Quimper from Gatwick will be flown by Britair, a French third-level airline using Bandierante aircraft. Dan-Air services will start a service to Dijon on 1 May using its HS 748 aircraft.

Insurance advisers appointed

John Smith, Secretary of State for Trade, has appointed Mr P. A. Taylor, general manager, Royal London Insurance Society and Mrs Muriel Turner, assistant general secretary, Association of Scientific, Technical and Managerial Staffs, to his panel of insurance advisers. Six members have been re-appointed: Mr I. R. Binney, chairman and chief executive, C. T. Bowring (Insurance) Holdings, Mr R. J. Kiln, Lloyd's, Mr E. J. Turner, director and manager, Guildhall Insurance Company (Sun Alliance and London Insurance), Mr M. A. Weinberg, managing director, Hambro Life Assurance, Mr G. L. Williams, general manager (home), Guardian Royal Exchange Assurance, and Mr J. Williamson, general manager for the UK, Royal Insurance Company.

The appointments of Mr Binney, Mr Kiln and Mr Williams are for two years and those of the other members for three years.

The panel of insurance advisers was set up in March 1976 to advise the Secretary of State for Trade on the exercise of his powers under the Insurance Companies Act 1974. The panel consists of 17 members drawn from all sections of the insurance industry and from its customers.

Altham — A Prime Industrial Site

A 195 acre, green field industrial estate in North East Lancashire, set in attractive countyside.

The M65, on which work is to commence this year, will be adjacent to the estate with direct access proposed.

Over ¼ million people within 6 miles of the site.

Approximately 30 acres already developed. Phase I of the Borough's 40 acre site now being serviced.

Suitable for medium and large units.

Plots available NOW.

Technology news

Madley 1 earth station in service

Inauguration of the Post Office's new satellite communication ground station at Madley, Herefordshire, on 11 April, marked the coming into service of the second Marconi earth terminal for the Post Office in six months. Marconi Communications Systems Ltd was the prime contractor for the new £6 million terminal, designated Madley 1.

Initially, Madley 1 will be used with the Indian Ocean Intelsat IVA satellite to provide a large capacity for telephone, telex and television traffic. The station has facilities for further expansion and it is foreseen that it will be used with the next generation of international telecommunication satellites, Intelsat V, the system channel capacity would be doubled.

In terms of quantity of equipment, Madley 1, with its 32-m antenna, is one of the largest satellite earth stations operating in the Intelsat system. In all, 55 chains of receiving equipment, 14 chains of transmitting equipment and 10 high-power amplifiers give the station the capability to communicate with about 40 countries simultaneously and Marconi is already manufacturing equipment to extend this capacity.

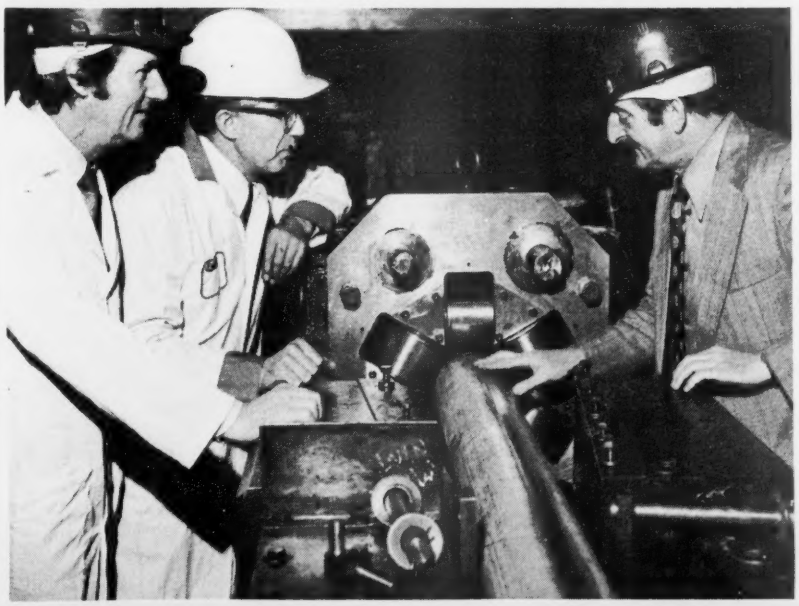
The complete station is built up in modular fashion from a number of individual subsystems. The largest of these is the fully steerable 32-m parabolic antenna which is mounted on a building which houses the steering and control equipment. Also in this building are the high-power transmitter amplifiers with low-loss combiners and intermediate and super-high frequency transmit drives, with their associated control logic, primary antanna feed and low-noise, cryogenically-cooled broadband receivers.

In the Post Office central equipment building is installed the Marconi ground communication equipment. This consists of super-high frequency branching, super-high and intermediate frequency downconverters, demodulators, modulators and base-bands equipment. Also in the building is the cross-site make-up amplifier operating at the super-high receiver frequency, fixed station test facilities and all associated control and monitoring equipment.

As prime contractor, Marconi Communication Systems has co-ordinated the efforts of an international team of sub-contractors including Mitsubishi Electric Corporation, Japan, for the antenna sub-system and Comtech of the United States for the low-noise amplifiers.

Roller die produces hexagonal nuclear fuel tubes

Fred Morrow of the UK Atomic Energy Authority, Roy McGavin of Exors of James Mills Ltd (EJM) and Mr H. F. Mather of British Nuclear Fuels check out a new type of roller die, designed by EJM to produce Nimonic alloy sections to meet the stringent specifications of the authority. The sections, formed into nuclear fuel element wrapper tubes for use in the latest type of fast breeder, are round cornered hexagons. They measure just over 5½ in across the flats and range in length from 9 ft to 13 ft. Each reactor core houses about 300 tubes, each containing mixed oxide fuel rods fitted together in the form of a honeycomb.



Swiss buy Prestel software

Agreement has been achieved for Prestel – the Post Office's telephone-tv-linked viewdata service – to be sold to Switzerland.

Already, the Post Office has sold its viewdata expertise to West Germany and the Netherlands, and is in the final stages of concluding a contract with the Hong Kong Telephone Company following a letter of intent obtained last August. The Post Office has also concluded a deal with Insac Data Systems – the company set up by the National Enterprise Board to market British computing systems and equipment abroad – under which Insac will set up a viewdata service in the United States during the coming 12 months.

The contract with Switzerland is for the sale of software – the programs, or instructions, which control the operation of the computer on which the information is stored. Like those with Germany and Holland, the Swiss deal is for the 'pilot trial' software, designed primarily for demonstration and information development. Because Switzerland is multilingual, all the index pages will be translated into French and German.

BAe completes European satellite payload study

A £120,000 study of the payload for a proposed earth resources survey satellite system for the European Space Agency (ESA) has been completed by British Aerospace Dynamics Group at Bristol, leading a team of European specialists.

The system which it is intended will start operating in the mid 1980s will provide new types of global data from land and sea surfaces, leading to better use of the earth's resources. Each satellite in the system will carry complementary payloads. Two such payloads have been the subject of parallel feasibility studies carried out by two industrial groups working for ESA. The group led by the Electronic and Space Systems (ESS) organisation at Bristol studied a coastal/oceans monitoring satellite system.

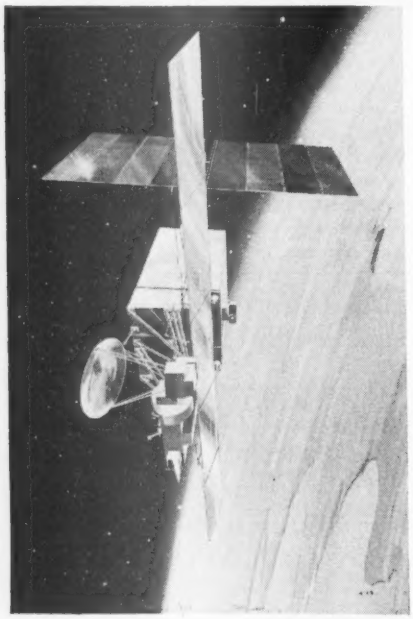
The payload will consist of a number of remote sensors to provide a range of data on such subjects as: coastal sedimentation and pollution; conservation and use of fish stocks; ship routing, making use of ocean currents; data on wave forces for use in the design of

offshore structures and wave power generating systems; and mapping of polar ice caps, ocean temperatures and winds for improved climate and weather forecasting.

The sensors presently under consideration are a multispectral ocean coloured monitor/infra-red mapper, a synthetic aperture radar, and an imaging microwave radiometer. The last two sensors operate in the microwave region of the spectrum and so are capable of providing imaging data through cloud cover, an essential characteristic of a system which is to provide land and sea surface data on a regular basis.

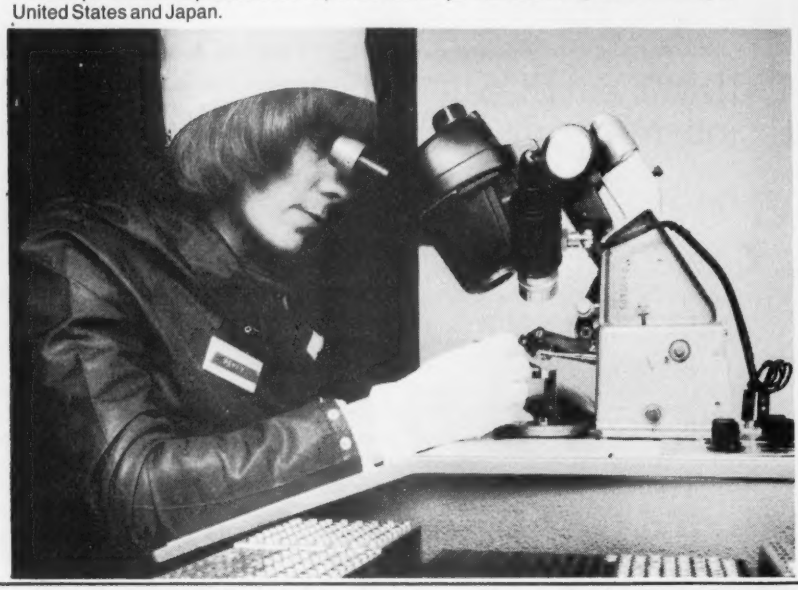
The ESS team includes specialists from Matra, France, who have had responsibility for defining the ocean colour monitor, the Technical University of Denmark who have been concerned with the imaging microwave radiometer, and Logica in the United Kingdom who supported ESS in the specialist fields of image quality analysis and ground data processing. The team has optimised the complete payload, defining the basic characteristics and performance of the sensors, and the requirements of the payload on the satellite service module, which together comprise the system. The need of communications, ground processing and data distribution also formed important parts of the study.

In this impression, the size of the European earth resources satellite is indicated by the 10-m long synthetic-aperture radar antenna facing the earth.



Latest silicon technology at new Centronic plant

Ultrasonically binding on extremely fine aluminium wire lead to the active area of a silicon chip at Centronic Ltd's new production facility at New Addington, Surrey. Opto-electronic components incorporating silicon photo-sensors, fibre optic components and systems, photomultiplier and cathode ray tubes form the fastest growing area of Centronic's activities. Over 60 per cent of its products are exported with major markets being western Europe, United States and Japan.



Mass spectrometer extends Harwell's analytical services for industry

A computerised VG Micromass Ltd ZAB-1F mass spectrometer with ultra-high resolution and sensitivity, due to go into operation next month, will extend the analytical services of the Harwell laboratory of the UK Atomic Energy Authority. The £136,000 facility will be housed in the physico-chemical measurements unit alongside the wide range of nuclear magnetic resonance, infra-red and other equipment already available for studying the structures of pure materials and the compositions of complex mixtures.

The new machine is suited for environmental work. Much of its time will be spent doing work for university groups. However, the unit is keen to expand its already substantial contract research services to industry, in particular into the field of hazardous organic materials. The ZAB-1F mass spectrometer should enable the unit's customers to extend their own research facilities and to call more readily upon Harwell to assist them in times of breakdown.

Typical problems the unit has previously been able to solve in the analytical area covered by the new machine include identification of factory emissions into the atmosphere through the analysis of trapped or condensed samples; quantification of specific toxic materials, such as nitrosamines, polychlorinated biphenils or bis-chloromethyl ether using high-resolution gas-chromatography or mass spectrometry; identification of manufacturing routes by the detection of traces of intermediate reaction products; and elucidation of the structures of new drugs and drug impurities, flavours and metabolites.

Further information is available from Terence Carter, PCMU, Building 551, Harwell, Oxfordshire OX11 0RA, tel. Abingdon 24141, ext. 4151.

Installation of Harwell's new computerised mass spectrometer.

Intelligent tape transport system for the needs of the 1980s

With the introduction of its EMI 8800 'Superdrive', SE Labs (EMI) Ltd is offering the computer peripheral market-place an industry-compatible digital magnetic tape transport that is claimed to be in advance of any other equivalent equipment at present available. It is designed to meet the technical and operational needs of digital tape transport users over the next decade and offers many design innovations. Three of these are a microprocessor-controlled drive mechanism; interactive microdiagnostics with error code display; and an integral formatter that offers dual, PE or NRZ options at seven or nine-track densities.

The EMI Superdrive is microprocessor-controlled, which means that its tape-handling operations are greatly simplified and the machine is truly intelligent. Specifically, it carries out automatically several functions that are usually undertaken manually such as finding beginning of tape with automatic re-wind if the tape has been loaded by hand beyond the beginning, and automatic slow down at the end of a full tape re-wind to ensure gentle tape handling on unloading. This new intelligent tape drive also provides a fast file search capability, with a re-wind speed of 2450 inches per second and includes 'power on' diagnostics for automatically checking out plug connections and correct power supply operation when switching on.

The interactive microdiagnostics module incorporated within the Superdrive is accessible from the front of the machine for ease of operation. It can be removed as a self-contained plug-in unit if desired, and since it fits easily into the pocket, it can be carried by an installation or service engineer for use with any other EMI 8800. This microdiagnostics facility provides a large number of self-test routines which allow the user to check out the drive completely; in the event of a malfunction, a specific error code is displayed which enables rapid identification and correction.

The integral industry-standard formatter offers dual, PE or NRZ capability at seven or nine-track densities. It thus completely satisfies the needs of existing as well as future digital magnetic tape transport users. EMI has also extensively used custom large scale integration circuit techniques in the design of the formatter, reducing its size considerably; this has enabled it to be incorporated into the machine itself, and thus avoid taking up additional rack space. Interfaces to a range of popular minicomputers are also available.

Further information: circle 392

Tape handling operations are greatly simplified.

Computer output plotted at high speed on microfilm

The model EP 340 computer plotter introduced by Ferranti Cetec Graphics Ltd is designed for recording large volumes of graphic of alphanumeric computer output data at high speed. Data can be recorded on 35 mm or 16 mm, perforated or unperforated roll film, or 105 mm microfiche. At the end of each page or plot the frame is advanced automatically. The EP 340 can be operated either on-line or off-line.

When handling computer alphanumeric output, it records data at the rate of, at least, 75 pages per minute – at 120 or 132 characters per line and 64 lines per page. This is about five times the speed of a conventional computer output line printer. A choice of upper and lower case texts in two fount sizes is available. Graphic data recording facilities include automatic line, arc and circle interpolation. Four types of line can be recorded (continuous, dotted, dashed, or chain-dotted), each at any one of 10 density levels.

An optional feature that can be incorporated in the EP 340 microfilm plotter is a storage-tube display which will enable the accuracy of graphic data being plotted to be verified without the need to wait for the whole film to be developed.

Operating in conjunction with computer data banks and other computerised records, typical applications of the EP 340 in engineering, business and architecture include the prompt production of up-to-date engineering drawings that include the latest design modifications, graphical representations of management information for decision making, and detailed plans of buildings created from the association of basic modular units.

Monitor detects excessive centrifuge vibration

Servodyne Controls Ltd has introduced a continuous and automatic monitoring system to provide early warning of excessive vibration in centrifuges. Known as the out-of-balance monitor mark III it is stated to reduce machine downtime and increase production, cut risk to plant and operators, and reduce maintenance costs. This monitor, together with a transducer mounted on to the centrifuge itself, continuously monitors the vibration levels and compares them with pre-set levels. When these are exceeded, signals are initiated to give either audible/visual alarms or to trip the running centrifuge.

Out-of-balance conditions in centrifuges are generally due to an uneven build-up of product and, at certain times, high levels of vibration amplitude must be tolerated. While centrifugal design allows for these vibration levels, genuine excess levels must be detected before progressive failur occurs, a process made more difficult by the need to sense the excess against a background of normal vibration.

Vibration at different speeds and points in the operating cycle can be handled by Servodyne's monitor. Two warning levels are thus available, with a built-in delay ensuring that momentary but harmless judders do not cause an alarm. Relays in the circuit raise an alarm or institute automatic remedial action which is varied according to machine type. For example, a sudden shut-down for feeding or emptying can be as dangerous as excessive vibration and may therefore be interrupted to permit balance to be restored.

The monitor is supplied in a weatherproof case. Intrinsically safe transducers are available for use in hazardous areas, with cables being fed through appropriate safety barriers incorporated in the monitor panel.

Further information: circle 394

Process control system incorporates latest micro-electronics technology

Kent Instruments Ltd has launched its P4000 system, a new electronic integrated process control system designed to meet the changing environment of the 1980s. P4000 is a broad-based control system incorporating the latest technologies, including microprocessors and large scale integrated circuits. The wide range of equipment available utilises common modules and gives freedom of choice of control strategy to enable systems to be tailored to users' particular needs and preferences.

Although suitable for industrial processes on almost any scale, P4000's major use will be in larger plants such as oil refineries, petrochemical and chemical plants, metallurgical

processes and public utilities, such as power, water and sewage.

The system can economically handle a small number of control loops, which if necessary can be ultimately extended to accommodate a major comprehensive control system involving computer control and management information systems. In general terms, the concept is essentially one of choice of system configuration to meet specific application needs. The use of common modules throughout the system offers advantages in costs and operational simplicity. Major emphasis is placed upon the centralised display system which can be used with both discrete panel board instrumentation or rack-mounted split architecture systems. P4000 also extends into a range of digital interface equipment for the well-proven K70 and K90 process computer system.

In the design of P4000, considerable attention has been applied to control loop integrity, flexibility of control strategy, systems reliability, engineering costs and documentation. New technologies of the electronics industry have been employed within the design and also included within the manufacturing process. Many functions previously performed by analog or discrete circuits are now replaced by microprocessor and large-scale integrated circuits. Mechanical indicators and displays are replaced by new display techniques requiring no maintenance.

P4000 conventional instrument displays may also be used in conjuction with the centralised display system. This self-contained unit allows instrument data to be concentrated on a semi-graphic CRT colour display unit interactively controlled by means of a simple operators keyboard. The centralised display system represents development in plant/operator communications, being both simple to use and powerful in operation.

Further information: circle 395

Fast and automatic measurement of electrical component valves

Wayne Kerr Ltd's B605 automatic component bridge is a new fully automatic electronic component measuring instrument based on a microprocessor. It features autorange and autotrim with an accuracy of 0.1 per cent over a wide dynamic range. The instrument is compact with simple front-panel push-button controls and combines fast measurements with reliable performance and easy operational characteristics.

Component bridge and JU4 adaptor provides easy measurement to a high accuracy.

The B605 has a five-digit liquid crystal display with measured units identified and can measure inductance, capacitance, resistance, Q-factor and its reciprocal. It covers all values likely to be encountered in electronic and electrical engineering. The capacitance range for example, extends to 160 millifarads.

To use the bridge the component for measurement is simply connected across the terminals or to a quick-attachment device for production work, the parameter button pressed and the frequency (three buttons, 0.1, 1.0 or 10 kHz) chosen. Readings appear within 300 milliseconds.

The autorange button will make the B605 select the correct impedance range for the component being measured. This will then be held for subsequent measurements until the button is released. Autotrim is carried out under MPU control and is fully automatic. Once the control has been pressed, the machine takes four readings on each of the three operating frequencies, stores the results – and then averages them. This ensures that residual trim errors do not affect the final results.

The B605 terminals are suitable for two-, three- or four-terminal measurements, but a small matching component adaptor, the JU4 (left foreground in the picture) provides for single-handed loading and removal of components with axial, radial or preformed leads. Two inline slots on the top of the JU4, give positive connection for parallel wires and spring-loaded jaws on the front of the unit, opened by depressing the platform, provide firm connection for axial wired components.

Heat reclaimed from cold stores and cabinets

A system to reclaim heat from the refrigeration compressors of the frozen-food cabinets in stores and supermarkets and use it to heat water has been developed by a retail firm. Equally suitable for most processing industries that utilise reciprocating refrigeration equipment, the system offered by Hall and Kay Engineering Ltd as a complete package of parts and the know-how necessary for its installation.

Operation of the system is based on the principle of reclaiming hot-gas superheat from the refrigeration compressors. This heat normally is vented to atmosphere through roof-mounted condensers and is wasted. In the system, however, heat exchangers transfer the heat to a hot-water storage tank sited between compressor and condensers. As only superheat is removed, normal working of the condensers is virtually unaffected.

The installation, say the developers, can pay for itself in 1 to 3 years by cutting water-heating bills. A pilot scheme, installed at their store in Winchester, is reported to have cut annual fuel costs by 75 per cent. In this project, water from the mains at 15.5° C was pumped through each of five interconnected heat exchangers at a rate of approximately 2¼ litres/min to raise the water temperature to nearly 50° C, giving a heat regain of approximately 5¼ kW for each of the refrigeration compressors.

Water consumption at the store ran at an average of 245 litres/h, which was well within the normal capacity of the heat exchangers. However, as most hot water was used during certain peak periods – for example, when the canteen dishwashers were running – the heated water was fed into a 4550 litre storage tank, where electrical heaters maintained its temperature at 60° C. Supplementary heating was also required to counteract the 35 per cent heat losses through the system, even though pipes and tanks had been lagged, and to help start the equipment on Monday mornings.

Portable extractor removes oil-mist hazard

A portable extractor for removing the potential hazard of oil mist created by the cutting oils on lathes and other machinery has been developed by Marland Designs Ltd. The equipment, which operates from the normal compressed-air supply in a factory, draws mist away, passing it through two filters, and exhausts warm air to the surrounding area.

A suction head is placed near the source of the oil mist which is drawn into a glass-reinforced plastics box which houses a 5-mm extractor, designed on the venturi principle. The box withstands the chemical action of the oil and its impurities and is mounted on castors to facilitate moving it from machine to machine.

Freed from any oil-mist hazard.

The oil mist first passes to a glassfibre pad to remove any heavy material and to hold the initial mist. The main filter retains any of the oil mist passing through the pre-filter and also permits the warm exhaust air to pass through. When the machine is shut down at the end of a working day, trapped oil falls into a collecting tray in the box. This recovered oil can be drawn off periodically and re-cycled for further use.

The pre-filter normally needs to be taken out every two days for removal of surplus oil. The main filter, say the firm, should be checked every five days, and should last for several weeks before becoming saturated, provided the pre-filter is cleaned regularly.

New publications

Viewdata is here to stay

When the first book appears on a new area of technology, it may be argued that the subject has taken a major step towards establishing itself as part of our lifestyle. If this is so, viewdata must be said to have arrived. In fact Prestel – the Post Office viewdata system – has recently extended its market trial to include a London residential service, as a prelude to the full public service later this year. So the publication of just such a book 'Viewdata: a public information utility', by Dr Adrian Stokes must be regarded as a timely event.

Viewdata is a computer-based information system accessed through the normal telephone system and modified television. In his review, Dr Stokes traces the development of the system, and assesses its potential to both the public and the business community. The system is compared to the existing teletext systems of the BBC and IBA (Ceefax and Oracle) and similar systems that are being developed overseas are also examined.

The author sees the business potential of viewdata not merely as a cheap and efficient means of obtaining information, but also as a form of internal communication and as a means of advertising goods and services to the public.

This step-by-step explanation of these new services, supplemented by a handy glossary that assists the reader through the jargon which surrounds them, should provide a concise and useful introduction for those who intend to exploit this new media, either as a source of information or as a means of dissemination. Three pages of coloured illustrations give some idea of the impact of the system on the user via a colour television set.

Post Office viewdata system.

Viewdata: a public information utility, by Adrian Stokes. Input Two-Nine Ltd, 7 Banstead Road, Purley CR2 3ER. 1978. 95 pages; paperback £9.95 (ISBN 0 905897 21 8).

Publications and opinions expressed on this page do not necessarily reflect the views of the government. Inquiries and submissions for review should be sent to *Trade and Industry*, New Publications Page, Room LG 17A, 1 Victoria Street, London SW1H 0ET, tel. 01-215 4136.

Japan trade index

A new edition of the 'Standard trade index of Japan' has been published at a time when the need for a general up-to-date English-language directory has never been greater – particularly as the other such major directory has not appeared for over five years now.

Compiled and published by the Japan Chamber of Commerce and Industry in Tokyo, the directory provides comprehensive data on both products and companies. There are separate listings identifying the manufacturers of specific types of products and providing information on individual companies – such as their assets, activities, products, and how they may be contracted.

The book includes a significant section of English-language advertisements, and these are also of considerable interest in assessing the variety of the market.

The detailed product listing should prove particularly valuable, although occasionally the English terminology used may not be quite appropriate.

The directory covers over 27 000 products and 8000 companies, and forms a useful starting point for exporters or market researchers wishing to investigate potential buyers or competitors in Japan.

Standard trade index of Japan 1978-79. Compiled and published by the Japan Chamber of Commerce and Industry; orders to be sent to Newman-Howells Associates Ltd, Wolvesey Place, Winchester, Hants SO23 9NB. 1979. Various pagings. £58.00 (including sea mail postage from Japan); £74.00 (including air mail postage).

Trade union handbook

A comprehensive reference work on British trade union structure and personnel is provided in the 'Trade union handbook'. It is not simply a list of trade unions and their senior officials, but provides an introductory background to the movement. Covering the beginnings of trade unions during the industrial revolution, the author (a senior research fellow in industrial relations, at St Edmund Hall, Oxford) takes the reader up to the present-day Trade Union and Labour Relations Act and the Employment Protection Act.

The main section of the book consists of a directory of British trade unions. An interesting feature is the amount of factual detail provided including names and addresses of national officers and area officers, membership figures, branch structure, and the policy of the union where applicable. A list of registered unions at 31 December 1977, a bibliography of official trade union histories and a list of addresses of government and other industrial relations institutions provide useful back-up appendices to a work which should be on the bookshelves of all those working in the field of industrial relations.

There is also a section on international trade union organisations, confederations, federations and trades councils.

Trade union handbook: a guide and directory to the structure, membership, policy and personnel of British trade unions, by Arthur Marsh. Gower Press, 1979. x, 369 pages. £15.00 (ISBN 0 566 02091 2).

Ideas for smart streets

Town planners, architects, designers and all others with an interest in the urban environment will find a wealth of ideas in a guide on how to improve the street environment issued by the Design Council. Attractively produced and well illustrated, it looks at recent methods for tackling urban renewal, examining developments in Europe and north America. The guide examines the design of individual components of the street scene – lighting, advertising, information signs, seating and ground surfaces. The criteria for enhancing visual quality are looked at critically. Many fine examples of well-designed streets are included, which should prove of interest to those in the industrial design field.

Also included are a list of interested organisations and an index of manufacturers. This well-presented book can be used in conjunction with two Design Centre catalogues of street and park furniture, which have also recently been published.

Streets ahead. Design Council in association with the Royal Town Planning Institute. Design Council, 28 Haymarket, London SW1Y 4SU. 1979. 111 pages; paperback £6.50 (ISBN 0 85072 081 8).

A library for exporters

Trade and other economic statistics from almost every country in the world, including the UK, are available for reference in the Statistics and Market Intelligence Library at Export House, 50 Ludgate Hill, London EC4M 7HU, tel. 01-248 5757 ext. 368/369, telex 886143 (DTI Export LDN). A modern well-equipped library of over 100 000 volumes, it has a public reading room equipped with microfiche readers and photocopying facilities. Among the documents available are foreign trade directories covering some 170 countries and selected trade fair catalogues. The library is open from 09.00 to 17.30, Monday to Friday (last passes for the building are issued at 17.15).

European community news

EIB loans of nearly £12m for Scotland and Wales

Loans of £11.65 million, nearly equally divided between Scotland and Wales, have been made by the European Investment Bank.

Industrial projects in Wales

Loans totalling £5.75 million have been made by the European Investment Bank for industrial projects in Wales.

One of the three loans is for £2.6 million for seven years to Tetra Pak Rausing and Co for construction of a factory at Wrexham which will process carton paper for drink and liquid food packs. The factory, of which the total cost is put at £6.5 million, and the capacity as equivalent to 1000 million packs per year, should come on stream towards the end of this year, providing initially about 50 jobs with a possibility of a further 60.

A loan of £2.5 million for 10 years has been made to Rockwood Ltd for construction of a mineral wool factory near Bridgend at an estimated cost of £13 million. Two production lines are planned, each at 18 000 tons-per-year capacity. One is due to come on stream this year and the other in1981, creating some 200 jobs.

The third loan is for £650,000 for seven years to Blaenau Plastics Ltd for a new factory at Blaenau Ffestiniog which will produce plastics compounds and components for the car, furniture and electrical goods industries. The factory, which it is estimated will cost £2.1 million, should be fully on stream by 1981, providing about 110 jobs.

These loans have been made in various foreign currencies, but each of the companies has obtained cover against exchange rate fluctuations for a charge of 1 per cent under a scheme introduced by the UK government to help promote the bank's lending for investment in assisted areas. This scheme is operated through the regional offices of the Department of Industry in England, the Scottish Economic Planning Department, the Welsh Office Industry Department and the Department of Commerce in Northern Ireland.

Scottish new town development

A loan of £5.9 million has been granted by the European Investment Bank for road, water supply and drainage schemes needed for further development of Livingston New Town, Lothian Region, Scotland.

The loan has been made to Lothian Regional Council for 15 years at 9.5 per cent and will cover about 50 per cent of the expected cost, put at close to £12 million.

Livingston – one of five new towns in Scotland built as economic growth centres and to take population overspill from congested city areas – began to be developed in the early 1960s. Its population is now about 35 000 and nearly 10 000 jobs have been attracted to the town.

The works which the EIB is helping to finance will improve road links between Livington and the east, notably Edinburgh, and the north, via the Forth Bridge, and also improve access to industrial zones; water supplies will be reinforced, with additional local storage capacity; and new industrial zones connected to the sewer network.

Including this loan, the bank has provided over £400 million for industrial and infrastructure development in and/or directly benefiting Scotland (not counting a further £56 million for development of off-shore oil and gas fields) since the United Kingdom's accession to the community in 1973. The total for the UK comes to £1,360 million.

Patent agreements to be exempted from rules of competition

The European commission has published a draft regulation which, if implemented, would exempt certain patent licensing agreements which would otherwise be prohibited by article 85(1) of the treaty of Rome.

The commission considers that patent licensing agreements, as defined in the draft regulation, contribute in general to improving the production of goods and to promoting technical progress. The regulation therefore exempts patent licensing agreements which contain only the clauses listed in the regulation.

It also lists clauses which may not be included in such agreements if they are to benefit from the exemption in the regulation but this does not preclude individual notification and requests for exemption of agreements containing those clauses.

The draft was published in the *Official Journal of the European Communities*, C58, 3 March, available from HMSO bookshops.

The commission intends to implement the regulation on 1 January 1980 but before doing so has invited all those interested to send their comments on the draft, by 3 June to: Commission of the European Communities, Directorate-General for Competition, Industrial Property Rights Division, 200 rue de la Loi, B-1049 Brussels.

General information on the EEC rules of competition is available from the Department of Prices and Consumer Protection, Fair Trading Division 1b, Room 2009, Millbank Tower, Millbank, London SW1P 4QU, tel. 01-211 5122.

Directory of community level organisations being prepared

A new edition of the directory of industrial, commercial and professional organisations set up at community level is being prepared by the European commission.

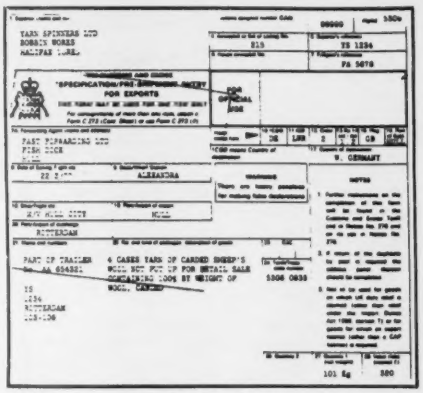
The directory, often known as the 'Neapolitan repertoire', also includes entries for service industries, for transport associations and for consumer groups.

Inclusion in the directory does not imply formal recognition by the commission but does offer a useful means of drawing to the attention of community officials and others the existence and composition of European bodies. Updated or new entries should be submitted as soon as possible, normally by the European level organisation concerned, to Mme A. op de Beek, Directorate General III, Commission of the European Communities, Rond-Point Schuman 6, 1049 Brussels.

The directory is essentially concerned with European level organisations representing member organisations throughout the community. Where no fully representative European body exists, however, the commission will consider, but not necessarily accept, entries for bodies with a more limited geographical membership. In submitting applications, such bodies should explain fully the grounds on which they consider themselves eligible for inclusion in the directory.

Towards better commodity descriptions

As an article moves in international trade from manufacturer to consumer it has to be described and coded in many different ways for many different purposes. These differences can increase the possibility of errors, are costly in time, and make the comparison and transmissions of data between organisations difficult. The increased use of computers and automatic data transmission systems during recent years has underlined the need to find some means of improving this situation. This article outlines the background to the Harmonised System and describes the present position.



The system will simplify Customs documentation.

The aim of the Harmonised System [1] being developed by the Customs Co-operation Council (CCC) is to simplify matters by providing a consistent, widely adopted nomenclature which can be used for such purposes as customs, production and trade statistics, freight tariffs, and insurance. There will be considerable advantages from uniformity of description.

But it may be that some groups of users might require to introduce additional detail beyond that of the Harmonised System itself. It is reckoned that this will be possible. For example, some groups of users may require to split down the sub-heading for: a 'sodium sulphites' into two divisions for b 'sodium hydrogensulphite' and c 'other sodium sulphites'. This will be possible and Harmonised System will not be distorted, provided that subheadings b and c together cover the identical range of goods as sub-heading a. Thus, the EEC and the UK will be at liberty, as now, to, operate their own divisions by breaking down the sub-headings of the Harmonised System.

Why a harmonised system?

The system is being based on the correlated versions of the CCC Nomenclature (CCCN) and the United Nations' Standard International Trade Classification (SITC). The four-digit headings of the CCCN, revised as appropriate, will continue to provide in the Harmonised System the broadest sub-division of goods. Within these four-digit headings there will be, in addition, sub-headings coded with one or two extra digits, that is five or six in all, and forming a structured nomenclature. As well as the Explanatory Notes to the CCCN headings, there will be explanatory notes to help clarify the contents of the subheadings, and there will be an alphabetical index. Detailed lists of goods, known as commodity descriptors, may also be included within the system.

Commodity descriptors

The descriptors would be presented in groups corresponding to the sub-headings of the structured nomenclature. Each commodity descriptor would be self-contained to describe a particular commodity, which may or may not appear independently in the structured nomenclature, as completely as is possible within the framework of the Harmonised System. So far, however, work on the system has been concerned principally with revision of the CCCN four-digit headings and with the further development of sub-headings to form the structured nomenclature.

Consultations

Representatives of many national administrations attend the meetings of the harmonised system committee (HSC), together with representatives of the United Nations' Statistical Office and the Commission of the European Communities. Many other international organisations, for example the International Chamber of Commerce (ICC), the International Chamber of Shipping (ICS), the International Standards Organisation (ISO), the International Air Transport Association and the International Union of Railways (UIC) are also present and the Simplification of International Trade Procedures Board (Sitpro) together with its French counterpart Simpro-France have made a valuable contribution to the development of the system.

Membership does not however extend to regional or national organisations representing particular sectors of trade or industry. It is, therefore, important that organisations interested in the goods covered by particular chapters of the system ensure that their views are made known to the government department from which they received the papers. Usually, it is better for views to be co-ordinated through the appropriate trade association but, nevertheless, representations may be made direct.

Proposals system

Proposals for each chapter of the Harmonised System are prepared initially by a technical team of the HSC and these are passed by Customs and Excise to the Department of Industry or the Ministry of Agriculture, Fisheries and Food for their own consideration and for distribution to interested trade associations. Comments received from all sources are channelled back to Customs and Excise, which co-ordinates UK views on the proposals and presents them at the international meetings. Before the proposals are discussed in the full HSC, preliminary meetings are held in the EEC with the object of submitting agreed observations to the HSC. It is, therefore, also important that, whenever possible, UK trade associations should discuss the proposals of the technical team with their European colleagues and, if possible, let the appropriate UK department know the results.

So, to give all those interested an opportunity to make representations, the process of consultation is fairly lengthy. Several months may elapse between the issue of proposals for a chapter by the technical team and the consideration by the HSC of those proposals together with comments on them co-ordinated by the EEC or national administrations.

Proposals by the technical team have been published for all chapters. Any organsiations wishing to comment on the chapters not yet considered by the EEC or HSC should let the UK department concerned know as soon as possible.

To avoid unnecessary work guidance is given here on some factors that need to be taken into account in assessing the proposals of the technical team.

It must be stressed that the Harmonised System is intended to be a framework on which governments and commercial interests can build their own tariffs, statistical nomenclatures, etc, by further sub-divisions; the subheadings of the system will not therefore include all the sub-headings found in national tariffs, etc, but only those which represent a major volume of world trade.

What is necessary is that the further detail required for national pruposes should be easily obtained by dividing the sub-headings. If such division seems to be difficult or if the proposals of the technical team appear not to give separate status to really important groups of goods, it may be necessary to suggest different or further sub-headings. If this is so, any proposed sub-heading must cover a well-defined group of goods which can be readily identified, precisely described and clearly distinguished from goods of other sub-headings. Also, the goods must represent a significant volume of world trade; there is no hard and fast rule as to what is significant but, in general, a proposal to specify goods where there is less than about £5 million trade a year between the EEC and the rest of the world is unlikely to succeed.

Progress

The technical team has prepared proposals for all 99 chapters of the existing CCC Nomenclature. Proposals for 58 chapters have so far been considered and provisionally agreed texts have been issued by the HSC for a majority of these. The HSC us aiming for completion of its proposals for the 4-digit CCCN headings and the 6-digit structured nomenclature parts of the system by the end of 1981. Taking into account the subsequent work on explanatory notes, etc, and the legal and administrative processes needed to implement the Harmonised System in many different countries, there is an increasing acceptance that it will not be possible to bring the system into operation widely before about 1985. The following list, which will be

[1] See also, *Trade and Industry*, 11 April 1975, page 73 and 17 September 1976, page 728.

up-dated in subsequent issues of this magazine, shows the present position:

Chapters considered by the HSC

1* Live animals.
2* Meat and edible meat offals.
3* Fish, crustaceans and molluscs.
4 Dairy produce; birds' eggs; natural honey; edible products of animal origin not elsewhere specified or included.
5* Products of animal origin not elsewhere specified or included.
6 Live trees and other plants; bulbs, roots and the like; cut flowers and ornamental foliage.
7* Edible vegetables and certain roots and tubers.
8* Edible fruit and nuts; peel of melons or citrus fruits.
9* Coffee, tea, maté and spices.
10* Cereals.
11* Products of the milling industry; malt and starches; gluten; inulin.
12 Oil seeds and oleaginous fruit; miscellaneous grains, seeds and fruit; industrial and medical plants; straw and fodder.
13 Gums, resins and other vegetable saps and extracts.
14 Vegetable materials.
15* Animal and vegetable fats and oils and their cleavage products; prepared edible fats; animal and vegetable waxes.
16* Preparations of meat, of fish, of crustaceans or molluscs.
17 Sugar and sugar confectionery.
18 Cocoa and cocoa preparations.
19 Preparations of milk, cereals, flour or starch; pastry cooks' products.
20* Preparations of vegetables, fruit, nuts or other parts of plants.
21 Miscellaneous edible preparations.
22 Beverages, spirits and vinegar.
23 Residues and waste from the food industries; prepared animal fodder.
24* Tobacco and manufactured tobacco substitutes.
25* Salt; sulphur; earth and stone; plastering materials, lime and cement.
26* Ores, slag and ash.
28* Inorganic chemicals; organic and inorganic compounds of precious metals, of rare earth metals, of radio-active elements and of isotopes.
29* Organic chemicals.
30* Pharmaceutical products.
33* Essential oils and resinoids; perfumery, cosmetics and toilet preparations.
34* Soap, organic surface active agents, washing preparations, lubricating preparations, artificial waxes, polishing and scouring preparations, candles and similar articles, modelling pastes and 'dental waxes'.
41 Raw hides and skins and leather.
42 Articles of leather; saddlery and harness; travel goods, handbags and similar containers; articles of animal gut (other than silk-worm gut).
43 Furskins and artificial fur; manufactures thereof.
44 Wood and articles of wood.
45 Cork and articles of cork.
46 Manufactures of straw, of esparto and of other plaiting materials; basketwork and wickerwork.
47* Pulp of wood or of other fibrous cellulosic material; waste and scrap of paper or paperboard.
48* Paper and paperboard; articles of paper pulp, of paper or of paperboard.
49* Printed books, newspapers, pictures and other products of the printing industry; manuscripts, typescripts and plans.
64* Footwear, gaiters and the like; parts of such articles.
65* Headgear and parts thereof.
66* Umbrellas, sun umbrellas, walking sticks, seat sticks, whips, riding crops and parts thereof.
67* Prepared feathers and down and articles made of feathers or of down; artificial flowers; articles of human hair.
68* Articles of stone, of plaster, of cement, of asbestos, of mica and of similar materials.
69* Ceramic products.
70* Glass and glassware.
71* Natural or cultured pearls, precious or semi-precious stones, precious metals, metals clad with precious metals, and articles thereof; imitation jewellery; coin.
74* Copper and articles thereof.
75* Nickel and articles thereof.
76* Aluminium and articles thereof.
77 See chapter 81.
78* Lead and articles thereof.
79* Zinc and articles thereof.
80* Tin and articles thereof.
81* Other base materials; cermets; articles thereof.
82* Tools, implements, cutlery, spoons and forks, of base metal; parts thereof.
84 Boilers, machinery and mechanical appliances; parts thereof.

* Provisionally agreed texts issued.

Co-ordinated EEC views prepared for HSC

27 Mineral fuels, meneral oils and products of their distillation; bituminous substances, mineral waxes.
31 Fertilisers.
32 Tanning and dyeing extracts; tannins and their derivatives; dyes, colours, paints and varnishes; putty, fillers and stoppings; inks.
35 Albuminoidal substances; glues.
36 Explosives; pyrotechnic products; matches; pyrophoric alloys; certain combustible preparations.
37 Photographic and cinematographic goods.
85 Electrical machinery and equipment; parts thereof.
90 Optical, photographic, cinematographic, measuring, checking, precision, medical and surgical instruments and apparatus.

Further information

Inquiries about the harmonised system should be made to the Department of Industry, Economics and Statistics Division 5B, 1 Victoria Street, London SW1H 0ET, tel. 01-215 5850 or to HM Customs and Excise, International Customs Division B1, King's Beam House, Mark Lane, London EC3R 7HE, tel. 01-626 1515 ext. 2532.

Copies of the technical team proposals and of texts provisionally agreed for the harmonised system may be obtained from the above.

No co-ordinated EEC view prepared

38 Miscellaneous chemical products.
39 Plastic materials and rubber in primary forms; unvulcanised rubber in plates, sheets or strip.
40 Semi-manufactures and articles of plastic materials or rubber.
50 Silk.
51 Wool, fine or coarse animal hair; yarn of horsehair and woven fabric thereof.
52 Cotton.
53 Other vegetable textile fibres; paper yarn and woven fabrics of paper yarn.
54 Man-made filaments.
55 Man-made staple fibres.
56 Wadding, felt and non-wovens; special yarn; twine, cordage, ropes and cables and articles thereof.
57 Textile floor coverings.
58 Knitted or crocheted fabrics; pile and chenille fabrics; tufted textile fabrics; woven fabrics of metallised yarn; gauze, tulles and other net fabrics; lace; embroidery; tapestries; narrow woven fabrics; trimmings.
59 Impregnated and coated fabrics; elastic fabrics; textile articles of a kind suitable for industrial use.
60 Articles of apparel and clothing accessories, knitted or crocheted.
61 Articles of apparel and clothing accessories, not knitted or crocheted.
62 Other made up textile articles.
63 Old clothing and old textile articles; rags.
72 Pig iron, iron and steel.
73 Articles of iron and steel.
83 Miscellaneous articles of base metal.
86 Railway and tramway locomotives, rolling stock and parts thereof; railway and tramway track fixtures and fittings; traffic signalling equipment of all kinds (not electrically powered).
87 Vehicles, other than railway or tramway rolling stock, and parts thereof.
88 Aircraft and parts thereof.
89 Ships, boats and floating structures.
91 Clocks and watches and parts thereof.
92 Musical instruments, sound recorders or reproducers; television image and sound recorders or reproducers; parts and accessories of such articles.
93 Arms and ammunition; parts thereof.
94 Furniture and parts thereof; bedding, mattresses, mattress supports, cushions and similar stuffed furnishings; lamps and lighting fittings not elsewhere specified or included.
95 Articles and manufactures of carving or moulding material.
96 Brooms, brushes, feather dusters, powder puffs and sieves.
97 Toys, games and sports requisites; parts thereof.
98 Miscellaneous manufactured articles.
99 Works of art, collectors' pieces or antiques.

It is essential that any comments on these chapters are made as soon as possible.

Commission approves drug joint research and development agreement

The European commission has granted exemption from article 85(1) of the Treaty of Rome to a joint research and development agreement between the Beecham Group Ltd and Parke, Davis and Company. The agreement was amended at the commission's request.

The aim of the agreement is to create a pharmaceutical product for the long-term prophylactic treatment of people with a family medical history of hypertension or heart disease caused by the impairment of blood circulation.

The agreement sets out two stages. The first, the project, completed in May 1978, was intended to identify promising substances and to conduct tests on them. The most promising substances are now to be developed in the second stage – the development programme – which is expected to last for a further five to 10 years.

The agreement provides, for example, for the companies to share all details of work undertaken, to hold regular meetings to appraise the work and to keep strictly confidential all information and data obtained from the project or disclosed for its furtherance. Each firm will have the right to apply for patents in its own name covering results deriving from its contribution and applications may be made for joint patents for joint results. Also each company will have the right to receive from the other a non-exclusive royalty-free licence, with power to sub-licence, to manufacture, use and sell products under any know-how or letters patent other than Japanese patents.

The commission considers that the agreement provides for joint research which will lead to technical and economic progress and that the consumer will receive a fair share of the benefits. An important factor in the commission's assessment of the case is that the necessary investigations and tests are unusually long and costly. The risks and costs involved to the parties individually are considerably reduced by the agreement to act jointly and the pooling of resources is a major factor in providing a reasonable likelihood of success. As a result of the agreement, therefore, the consumer is more likely to see quicker and better results.

The decision was published in the *Official Journal of the European Communities*, L70, 21 March, available from HMSO.

Further general information on the EEC rules of competition is available from the Department of Prices and Consumer Protection, Fair Trading Division 1b, Room 2009, Millbank Tower, Millbank, London SW1P 4QU, tel. 01-211 5122.

Do you use statistics?

The Government Statistical Service (GSS) prepares a wide range of reliable and detailed figures on the United Kingdom. It is usually worth checking to see if what you want is available from them. You can see many Government statistical publications at your local public library, buy them from HMSO or refer to the comprehensive collection held at the Statistics and Market Intelligence Library, Export House, 50 Ludgate Hill, London EC4N 7HU (tel. 01-248 5757 ext. 368).

A free pamphlet, *Government Statistics – a brief guide to sources*, gives up-to-date contact points in Departments for further information. You can obtain copies from regional officers of the Department of Industry or by writing to the Central Statistical Office Press and Information Service, Great George Street, London SW1P 3AQ.

Overseas trade news

Tokyo summit will tackle economic expansion

The next summit meeting of the heads of state and government of Canada, France, Germany, Italy, Japan, the UK and the United States will be held in Tokyo on 28 and 29 June at the invitation of Prime Minister Ohira. The European community will be represented by the president of the council and the president of the commission in sessions dealing with matters within the community's competence.

The participants at the Tokyo summit will discuss policies for the stable expansion of the world economy in the spirit of mutual co-operation that has been fostered by the previous summit meetings. Having reviewed progress made on the five specific areas covered in their declaration at the 1978 Bonn summit, they will deal with current economic problems requiring immediate attention and will examine the basic issues that confront them in the longer term. Preparatory work is now going ahead on an agreed basis.

ECGD backs Polish loan

The repayment of a £5 million line of credit which Midland Bank has made available to Bank Handlowy w Warszawie of Poland is being guaranteed by the Export Credits Guarantee Department.

The loan is available to help finance capital goods and associated services contracts placed in the UK by Polish buyers. UK exporters receive 85 per cent of the contract price from the loan; the remaining 15 per cent is payable from the buyers' own resources. To qualify under the terms of the loan a contract must have a minimum value of £20,000 and be placed by April 1980.

Exporters interested in this facility should contact Mr C. J. N. Luby of ECGD, tel. 01-606 6699 ext. 7574 or Mr S. J. Ferguson of Midland Bank, tel. 01-606 9944 ext. 4267.

Brochure on London Impo Expo issued

A new brochure describing London Impo Expo 1979 has been distributed to governments and national trading organisations in more than 90 countries around the world. The brochure is to tell them what London Impo Expo 1979 can do to help their exports to European markets.

London Impo Expo 1979 (to be staged from 16 to 27 July) opens with a five-day seminar in the Tara Hotel, London, designed to explain to representatives of the developing countries how best to sell to the EEC. This is followed by a five-day exhibition at the Wembley Conference Centre where the nations will display products and produce to buyers from all EEC countries.

Osaka display centre

As part of the modernisation of the offices of the British consulate-general in Osaka approximately 50 m^2 of display area can be made available to visiting British businessmen or local agents for the display of British products.

The space is available, in total or in part, during normal office hours free of charge which should make it an attractive proposition for small-scale exhibitions.

Interested companies should write to Keith Mutter, British Consulate-General, Hong Kong Bank Building, 4-45 Awajimachi, Higashi-ku, Osaka 541, Japan.

Marketing consumer goods in West Germany

A new edition of the booklet 'Marketing consumer goods in West Germany', prepared by the British embassy in Bonn, has been published by the British Overseas Trade Board.

The booklet provides a useful and informative guide both to firms new to the West German consumer market and to those wishing to update their existing knowledge.

Copies are available at a charge of £3 plus 20p postage from BOTB Publications Sales Unit, Room J 30, Export House, London EC4M 7HU, tel. 01-248 5757 ext. 569.

Gulf states the target for EIA mission

Gulf states are the target for a mission from 16 to 30 November being organised by the Engineering Industries Association (EIA). The centre of operations is Kuwait, but delegates are free to travel independently throughout the Gulf states.

The Gulf states have realised, says the association, they must diversify away from their dependence on oil and aim at providing self-sustaining economies by establishing basic industries. Opportunities for British exporters exist now for the supply of machinery and transport equipment. Good prospects also exist in the field of infrastructure and in the expansion of telecommunication facilities. With British exports to Kuwait increasing dramatically, Kuwait in particular remains an excellent market for exporters.

Non-members of EIA will be equally welcome to participate on this mission which has British Overseas Trade Board support.

Further information from: Anna Small, Engineering Industries Association, 16 Dartmouth Street, London SW1H 9BL, tel. 01-222 2367.

Innovation in engineering industries: seminar

A seminar on the techno-economic aspects of fabrication processes and quality control in the engineering industries, is to be held in Turin from 9 to 13 June 1980, under the auspices of the United Nations' Economic Commission for Europe.

Subjects expected to be considered include: innovation and its techno-economic influence in recent years; manufacturing systems; metal working by power laser and electron beam techniques; energy and material saving processes, re-cycling; metal forming from solid phase; design problems with advanced polymeric materials; economic aspects of product reliability; automatic non-destructive control and testing methods.

Technical visits to nearby industries will be arranged during the seminar.

Any individual or organisation wishing to attend the seminar or to submit a paper is invited to get in touch with Mr J. E. M. Lilley, Department of Industry, giving the title, the theme, and the author's name of any paper. Mr Lilley can be contacted, preferably by 15 June, at Dean Bradley House, 52 Horseferry Road, London SW1P 2AG, tel. 01-212 6873/8994.

Overseas marketing register available

A register of UK exporters with overseas marketing set-ups has been compiled by the British Overseas Trade Board. It contains over 200 entries which the firms are prepared to make available to other UK companies seeking overseas outlets for complementary non-competing products.

The register is available, free of charge, to UK businesses interested in taking advantage of the facilities offered. Its purpose is to enable firms interested in this kind of co-operation to approach potential partners direct. The board itself will not be responsible for arranging such discussions and will not take part in them.

Applications for the register should be made in writing, on the firm's letter heading, to Ian Webster, Room G12, Export House, 50 Ludgate Hill, London EC4M 7HU.

JCB in Indian joint venture

Gilbert Johnston, chief executive of JCB, shakes hands with Rajan Nanda, vice chairman and joint managing director, Escorts Ltd, following the signing of a joint-venture project for the manufacture of JCB excavator loaders in India. The new company is to be known as Escorts JCB Ltd. Escorts hold a 60 per cent stake and JCB 40 per cent. A new factory is to be built on a 10-hectare site at Faridabad, about 25 miles from Delhi, and the first machines are scheduled to roll off the production lines early next year. The factory will have an initial capacity for 500 machines a year. JCB's investment so far is £250,000.

Bonded warehouses: proposed new policy

HM Customs and Excise is reviewing its policy as it affects the approval of bonded warehouses for wines and spirits.

For many years bonded warehouses approved for the storage of wines and spirits were operated by public warehousekeepers, who had no direct interest in the ownership of the goods. These warehouses were operated for the use of traders in general and were intended to serve the needs of the trade in a particular geographical area. They tended to be run by old-established public warehousing companies or else by quasi-official bodies such as the Port of London Authority or National Carriers. But in recent years as companies in the wine and spirit trade expanded, some sought bonded facilities of their own, so as to be able to exercise more control over their own operations and distribution activities. For these and other reasons of trade economy, Customs and Excise began to receive applications for warehouse approval from the proprietors of the goods themselves. This permission was granted subject to the requirement that the warehouse should be made available for the use of trade in general although Customs and Excise was aware that many proprietors were not in fact storing goods other than their own.

This approval gave the proprietor of the goods a competitive advantage. More applications were then received and with their granting the traditional public warehouses began to lose trade, to the point where, in some cases, they were mainly serving the smaller traders.

Two other developments bear on the question of whether the present policy fully satisfies the needs of the trade. The first is the growth of conglomerates with vertically integrated structures from producer/importers to retailers. The second is the development of supermarkets selling wines and spirits on the basis of minimum stocks and quick turnover. These developments have led to applications for networks of distribution warehouses, some to be operated by the conglomerates who would store only the goods of their constituent companies, and others by distributors who supply the supermarkets.

Although warehouses operated by either of these two types of applicant would serve a large geographical area, they would not in themselves necessarily satisfy the needs of competing traders.

In addition, some proprietors who want to hold stocks duty-free but are reluctant to use existing facilities, have sought approval of their own premises. This desire is obviously stimulated if competing traders have already obtained it. Some of the larger freight forwarders also seek approval of their own premises on the basis that having warehouse facilities will enable them to offer an integrated service to their customers.

The following proposals have been put to the principal trade associations for discussions.

Any new policy designed to meet the trade's expectations of the bonded warehouse system as above is bound to lead to an increase in official staff; the government's cash limits policy means that this increase must either be met by economies, preferably from elsewhere within the warehousing field, or the cost must be recovered from those standing to benefit from the policy change. These economies might be secured by not renewing the approval of some existing warehouses when they come up for review, and one method of recovering costs might be to charge, for example, a licence fee for warehouses not catering for *general* trade use.

It is thought that, under the new policy, approval would be granted to any suitable applicant able to provide and operate a bonded warehouse having a substantial volume of business and of a standard of efficiency that would permit official control to be exercised in an economical fashion. Each such warehouse would be expected to provide for a significant part of the overall needs of the trade. This would mean that its capacity should be several times greater than the minimum storage area criteria set many years ago when the trade was much smaller than it is now. Moreover, modern methods, such as palletisation, racking and high-speed machinery, make it inappropriate to consider superficial storage area alone. The criteria for determining whether there is a substantial volume of business might therefore be:

☐ A stock-holding capacity of at least 125 000 cases; or

☐ A stock-holding capacity of at least 80 000 cases plus an annual throughput of at least 300 000 cases (probably with a stipulated minimum quantity to be cleared at any one time); or

☐ A bottling capacity of at least 5000 cases per week, with appropriate and related storage facilities.

It would not be realistic to expect that all applicants could necessarily achieve these levels of business immediately. Initially, therefore, approval would be given for not more than two years, during which time the warehousekeeper would be expected to establish a trade of not less than 80 per cent of the relevant criteria. The position would then be reviewed and, if thought fit, a further period of approval would be allowed to enable the full level of trade to be achieved. Further renewals of the approval would be conditional upon the prescribed level of trade being maintained.

To contain the costs of revenue administration, Customs and Excise intends to phase out existing warehouses doing less than half the level of trade stipulated for new approvals. So, there would be a critical appraisal of each warehouse when the renewal of its approval was being considered.

Special considerations would however apply to warehouses catering for specialised export needs; and Customs and Excise would also be prepared to make exceptions to permit the maintenance of sufficient public warehousing facilities for, for example, the smaller traders who are unable to obtain approval of their own warehouses.

Customs and Excise would also seek, in appropriate cases, the introduction of changes at warehouses which would enable the cost of official control to be reduced.

The non-renewal of an approval has been a rare event in the past and it is not expected to be commonplace under the new policy. But so that approval can be given to the additional warehouses which are being sought without increasing public expenditure it is essential that the existing arrangements are modernised and that warehouses which require a disproportionate allocation of official resources to control them are progressively eliminated.

Woolverton heads ODM's Middle East development division

Kenneth Woolverton is the new head of the British development division in the Middle East. He succeeds John Rowley.

The development division is based in Amman, Jordan, and advises both British embassies and high commissions and the Ministry of Overseas Development in London on the development needs of the middle east. It is also responsible for advice on paid technical co-operation schemes in Saudi Arabia and the Gulf states.

Mr Woolverton, 52, has worked at the Ministry of Overseas Development for the past 12 years.

Hints to exporters booklets

Revised editions of the booklets on the People's Republic of China, and the Philippines have been published.

British exporters can order these booklets by post, accompanied by the appropriate remittance, from the Department of Trade, Publications Sales Unit, Export House, 50 Ludgate Hill, London EC4M 7HU at £1 per copy, plus postage and packing as follows: 1 copy, 20p; 2 to 4 copies, 30p; 5 to 7 copies, 40p; more than seven post free.

Copies may also be purchased by personal callers at Export House and at the offices of the Department of Industry at Newcastle upon Tyne, Cockermouth, Manchester, Leeds, Nottingham, Birmingham, Bristol; from the Scottish and Welsh Offices; and from the Department of Commerce, Belfast.

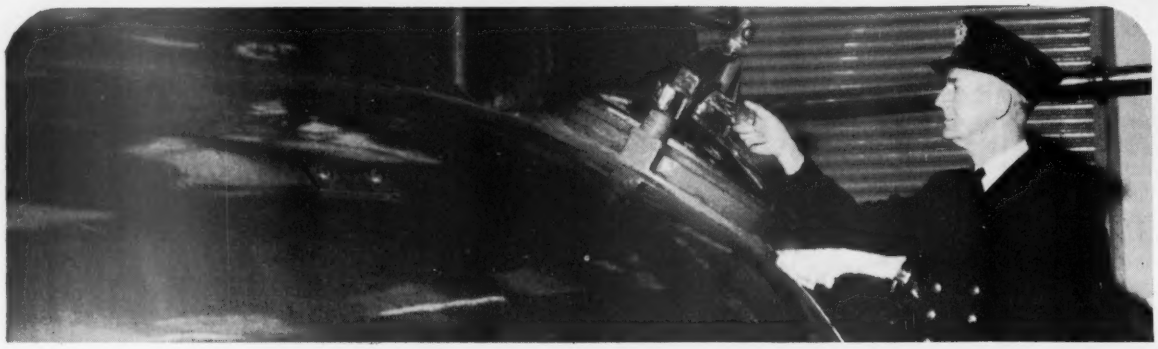
Disclosure of import information

Consideration is being given, under section 3 of the Finance Act 1967, to the disclosure of information on the following goods:

SITC(R2)/Trade description	Code no.
752.5	
Peripheral units, storage units	8453 6100
Imput and/or output units	8453 6500
Other	8453 6900
759.9	
Parts n.e.s. of and accessories for data processing machines	8455 9600

The government is consulting the Association of British Chambers of Commerce, 6-14 Dean Farrar Street, London SW1H 0DX, on these proposals and the association will take into account any views received from importers by 11 May 1979.

Inquiries may be addressed to Economics and Statistics Division 5, Branch B2, Department of Industry, 1 Victoria Street, London SW1H 0ET, tel. 01-215 5770.



Customs notices of interest to exporters

The following public notices issued by HM Customs and Excise relate to various aspects of export procedure. Copies of these notices may be obtained from local offices of Customs and Excise, addresses of which appear in the telephone directory or from the Secretary, HM Customs and Excise, 39-41 Mark Lane, London EC3R 7HE.

7	Drawback of excise duty on mixed or blended beers.

828	EEC preferences – rules of origin.

Overseas trade exhibitions

Furs to the fore at Munich fashion week

From D T Cox, British consulate-general, Munich

A quiet fair but highly satisfactory results sums up the attitude of the 41 British exhibitors at the Munich fashion week, held for the thirty-ninth time (between 1 and 5 April) at the fair grounds and in hotels and fashion houses throughout the city. Thirty of these firms took part in a joint venture between the Clothing Export Council and the British Overseas Trade Board.

There were a total of 1815 exhibitors from 27 countries, approximately one-third of this number being from outside the federal republic. The fair organisers claim that some 48 000 visitors from Germany and overseas were attracted to this Mode Woche, 5000 more than at this time last year, but exactly the same as the October 1978 event.

Of the 30 firms in the British joint venture, 24 had previous experience of the Munich fair. Many are by now regulars, convinced of the value of continued participation at this twice-yearly event for maintaining contacts and meeting new ones.

The joint venture has a nicely balanced look. The April event is of course the main one for furriers and of these Fantasia Furs Ltd, with firm orders of around £120,000 was outstanding, as were M. Edelson Ltd and Saul Sandler & Son, the latter despite the misfortune of having three valuable furs stolen during the fair.

The continued popularity of kilts and quality knitwear in this part of the world was underlined by the success of such Mode Woche 'old hands' as Laird Portch of Scotland, with orders of £36,000, F. J. Bacon, £55,000 and more than 120 serious inquiries and Clan Laird Fashions. One of our most consistently successful joint-venture participants, Crochetta, reported more than 300 serious inquiries for its range of knitwear: the stand was visibly popular throughout the event. The ability of British evening, cocktail and bridal wear to compete in this demanding market was illustrated once again by Ellis and John Charles, with orders of £79,000. Ladies' and girls' dresses by Shubette of London and Willow Modes, and skirts by R. J. Freedman (Sportswear) consolidated their excellent reputations for quality which they have built up here over the years. Most of the six newcomers felt their initial participation had been worthwhile and, having learned much by it, would consider coming back next time. This positive attitude was typified by Emcar (suits and dresses) which was in the process of appointing an agent here (and was incidentally the company used as the model for the recent 'self-organised groups' study by the Clothing and Allied Products Industry Training Board) and Scotnord Ltd (Scottish knitwear) whose stand was made even more eye-catching by the highland regalia sported by its three representatives.

The next Munich fashion week takes place between 7 and 11 October 1979.

Enthusiastic response to NAB convention

From Ronald Harrison, British consulate-general, Dallas

Twelve British companies took part in a joint venture, sponsored by the British Overseas Trade Board and the Electronic Engineers Association, at the National Association of Broadcasters Convention, held in Dallas from 25 to 28 March. All received a substantial number of serious inquiries and all intend to exhibit at the next NAB show at Las Vegas 13 to 16 April 1980.

The reason for their enthusiasm is that the NAB is the world's largest show of broadcasting equipment and is regarded by many as the most important.

Its significance as a national event was recognised by President Jimmy Carter who chose to visit Dallas for the first time since his election, to address the opening session of the convention. Sessions were also addressed by James Schlesinger, United States Secretary of Energy, Charles Ferris, chairman of the Federal Communications Commission.

Throughout the convention there were separate radio and television work-shops. Attendance at the show included more than 7000 broadcasters and over 6300 customers and potential customers invited by exhibitors. There were 330 exhibitors and 375 booths.

NAB members can exhibit and only companies can obtain membership. This means that United States' overseas companies must exhibit under the names of their United States' subsidiaries or agents.

About 40 overseas exhibitors participated in this way including Agfa-Gevaert, Angenieux, Bosch-Fermseh, Canon, Sony, Fuji, Hitachi and Philips. The 13 British exhibitors included English Electric Valve, Marconi, Racal Acoustics, Rank-Taylor Hobson, Neve Quantel and W. Vinten.

The British companies all found the show useful as a forum for demonstrating their technology, for gaining technical information, for keeping any eye on their competitors' pricing and products and for meeting existing customers and making new contacts with potential buyers. The potential buyers came not only from different parts of the United States, but also from other countries, notably Mexico, Brazil, Colombia, Argentina, Nigeria, Taiwan, Japan, Australia and several European countries.

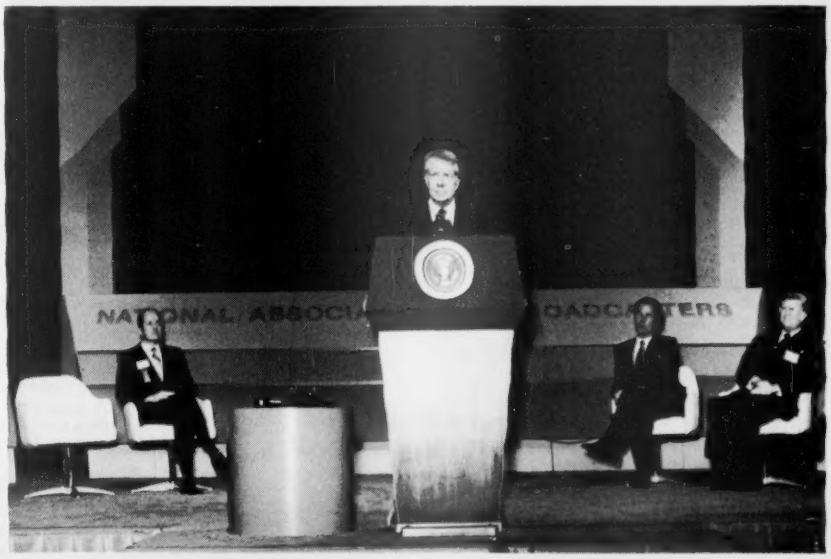
Britain shows the way at Medic Asia

From John Wilde, British high commission, Singapore

The 36 British manufacturers exhibiting at the first international medical and hospital equipment exhibition in Singapore from 20 to 24 March were a little surprised to find that they had almost no competition for visitors' attention. The five other national stands were small in comparison and could not, in any case, compete with the highly attractive and distinctive stand sponsored by the British Health-Care Export Council and the British Overseas Trade Board.

Visitors, who included the minister for health, the director of medical services

President Jimmy Carter addresses the NAB convention.



from Singapore and many doctors and health-care officials from Singapore, Thailand, Malaysia and other Asian countries, were impressed by the wide range of equipment and services on show on the British stand. From hospital beds and furniture to sophisticated electro-medical and electro-surgical equipment; from dressings and other nursing aids to hospital planning and management services, there was something for everyone.

Several companies, like Clement Clarke International and Jacob, White (Hospital Equipment), sold all their exhibits off the stand, and others received even more significant orders. Eschmann Bros and Walsh sold several operating tables to customers from Thailand and Taiwan, and Western Medical group received orders well over £50,000 for its water-beds.

With several thousand visitors from throughout south-east Asia – and beyond, from Japan and Australia, for example – the first Medic Asia exhibition was a success.

But thanks, and hopefully rewards, must go in no small measure to the impressive British presence and to the enthusiasm and professionalism of the British exhibitors.

Petro Expo at Houston breaks all records

From F. Paul Pedersen, British vice-consul (commercial), Houston

Over 40 000 people from the petrochemical industry, including 3500 chemical engineers and scientists from many parts of the country and of the world, were in Houston from 2 to 5 April for the eighty-sixth annual national meeting of the American Institute of Chemical Engineers.

The AIChE conference is held yearly in conjunction with the AIChE petroleum and refining exposition and was larger this year than any time in its 10-year history. Over 159 new companies registered this year to exhibit at Petro Expo.

The four days of activities started on Monday with a diversified technical programme of 89 sessions geared toward the solution of present and future problems in the petroleum and petrochemical industries. The major emphasis of the programme focused on such important areas as oil, gas, coal, shale and solar energy.

This year's British exhibit was the second joint venture sponsored by the British Overseas Trade Board and the Council of British Manufacturers of Petroleum Equipment and included the following firms: Capper-Neill, Compeda, Eltron (London), Graphite Equipment, Isopad, Measurement Technology, Teddington Bellows, Triangle Valve, Truflo and Charles Winn (Valves).

The overall reaction of British participants was that the exhibition this year far exceeded their expectations in attendance and calibre of visitors. Although, as anticipated, there were no sales made on the stands during the show, many participants indicated response to their products or services was overwhelming.

Houston and the surrounding gulf coast is recognised as the world's petroleum refining capital and the centre of this nation's greatest concentration of petrochemical and chemical industries.

Houston presently is the nation's fifth largest city and is home to a growing cosmopolitan population of more than 2¼ million. It is the heart of a complex petrochemical, petroleum, agricultural region through which flows much of the export-import business of the southwest. Houston has the third largest deep-water port in the United States and is the number one manufacturer and distributor of oilfield and related equipment.

OTAR: help for exporters

Overseas Tariffs and Regulations Section (OTAR), Export Services and Promotions Division, Department of Trade, Export House, 50 Ludgate Hill, London EC4M 7HU, tel. 01-248 5757 can give you directly, or through your regional office, up-to-date information on the tariffs and customs regulations of overseas countries, import licensing regulations and restrictions including import quotas; certificate of origin; consular invoices and fees; labelling and marking requirements; and regulations on foodstuffs, drugs and pharmaceuticals, agency legislation setting up of a subsidiary company and the import of samples. It also provides information, in collaboration with the Ministry of Agriculture, Fisheries and Food, on health regulations for livestock, meat, animal products and plants and seeds. In short, OTAR can help on almost all legislation which affects the entry of British goods into overseas countries.

Inquiries which concern the countries of more than one sub-section (excluding inquiries involving only EEC countries) should be made to OTAR's co-ordination sub-section of 01-248 5757 extension 452 or 454.

For information on specific countries, phone the number and extension given below

01-248 5757

extension

Sub-section A
1 Co-ordination of EEC regulations requirements and common customs tariff (CCT), Denmark, France incl. overseas territories, Greece, Turkey, Cyprus

408 Denmark (incl. Faroe Islands and Greenland). EEC legislation on tariff and non-tariff barriers relative to community trade
423 France and French overseas departments, French overseas territories, Comoros

BMT packages for Budapest and Copenhagen fairs

Barry Martin Travel is offering a choice of inclusive travel packages for three important forthcoming trade fairs at Copenhagen and Budapest. Copenhagen is the venue for the Scandinavian furniture fair (2 to 6 May) and the international food fair (22 to 27 May), and Budapest hosts the annual spring trade fair (23 to 31 May) for precision engineering and light industry. Group and individual arrangements are available for the furniture fair; individual arrangements only are available for the international food and spring trade fairs.

Copenhagen travellers will be accommodated at the Scandinavia Hotel which is handily placed for the exhibition site at Bella Center. There is a choice of departure dates for furniture fair visitors on a group basis – staying one night only – departing London 09.25 on 3 and 4 May, and returning 19.00 on the following day.

Rates per person are £138.50 (single room) or £125.50 (twin room). Individual rates on a minimum six-night stay basis are £372 (single) or £300 (twin). Arrangements for the food fair are based on individual travel and minimum six-night stay at £384 (single) or £293 (twin). Apex rates are also available at £348 (single) or £241.75 (twin) for seven nights (minimum).

Visitors to the Budapest fair are offered accommodation at the Hilton, Intercontinental, Gellert, Royal, and Astoria hotels. Rates for three nights range from £204 to £258 depending on choice of hotel.

Each BMT package includes scheduled air flights from London, airport/hotel transfers, continental breakfast (except Hilton and Intercontinental), and the services of BMT's on-site representative at Copenhagen.

Tradewinds starts US split charter service

Tradewinds' new split charter service to the United States started on 24 March. Operating once weekly Tradewinds One will depart London Gatwick Airport every Saturday at 2200 hours, arriving in New York's J. F. Kennedy Airport at 2300 hours eastern standard time.

Since being granted its licence in mid December, Tradewinds has expanded its services to and from the United States, up to a current level of three flights a week. It is intended to operate five scheduled round trip flights per week.

One of the company's most important contracts is for the Formula One Association, for which Tradewinds carries the racing cars for the various United States grand prix meetings. One of the most recent of these flights, carried 24 racing cars and 32 tonnes of spares for the formula one race at Long Beach, California.

Sea/road container service to Iran resumed

The sea/road container service to Iran operated by Manchester Liners has been reopened.

The company's service from Manchester to Iskenderun, Turkey, combined with integrated on-carriage by overland truck to Iran, was suspended at the beginning of the year because of the political problems in Iran.

Full container load cargo bookings have been opened by Medliners-Iran for the next container vessel sailing from Manchester.

Further information: circle 401

Local agents appointed for Saudi services

To strengthen its groupage and full load container services to Saudi Arabia, the T and K Freight Group has appointed Red Sea Trading and Shipping Establishment as its local agents in Jeddah.

This agency agreement, which has been in operation since the beginning of February, will, the company claims, considerably enhance the benefits users of the service receive in Saudi Arabia. Red Sea will work in close co-operation with the T and K's middle east commercial delegate, who is permanently based in Jeddah, to give on-the-spot assistance with port clearances, customs formalities and on-forwarding.

Red Sea has its own warehouse and fleet of vehicles and the capability to deliver containers to any destination in Saudi.

Further information: circle 402

Ferrymasters, the haulier within PO European Transport Services' operations, has chartered the ro-ro vessel *Dana Hafnia* for a two-month period. She will operate Ferrymasters' scheduled ro-ro service between the UK and Sweden.

CHINESE TRANSLATION AND TYPESETTING

Will your Chinese publicity, tender, contract, instruction manual say precisely what you mean? Should it be in Mandarin or Cantonese? Will it be specially adapted by a Chinese writer or translated by an experienced translator?

Eurolinga has positive professional answers for British companies opening up trade with the Peoples' Republic of China. We translate technical material into current, idiomatic Chinese and typeset it too, using only mother-tongue translators and typesetters. As we do in Arabic, Japanese, Russian and every major world language.

Overseas trade country data

Australia

Iron and steel products. The Australian Industries Assistance Commission has issued a draft of its report on the question whether assistance should be granted to the manufacture of basic products of the iron and steel industry. The draft is being made available to give interested parties an opportunity to examine and comment on it before final recommendations are made to government.

To receive submissions on the draft the commission will hold a further public hearing on Tuesday, 29 May, at the Public Inquiry Room, Industries Assistance Commission, Marland House, 570 Bourke Street, Melbourne.

A copy of the draft report may be obtained on loan from Department of Trade, Room 336, 1 Victoria Street, London SW1H 0ET.

Inquiries: CRE 01-215 5319.

Ref: CRE 1463/74

Ships, boats, etc. The Australian Industries Assistance Commission has issued a draft of its report on whether assistance should be accorded the production in Australia of vessels not exceeding 6000 tons gross register of a kind falling within items 89.01, 89.02 or 89.03 of the customs tariff.

The draft is being made available to give interested parties an opportunity to examine and comment on it before final recommendations are submitted to government.

To receive submissions on the draft the commission will hold a further public hearing commencing at 10.00 hours on Tuesday, 15 May, in the Public Inquiry Room, Industries Assistance Commission, 16th Floor, 59 Goulburn Street, Sydney, NSW.

A copy of the draft report may be obtained on loan from Department of Trade, Room 336, 1 Victoria Street, London SW1H 0ET.

Inquiries: CRE 01-215 5319.

Ref: CRE 863/77

Further information

In many cases further information on the notices published on these pages is available to British exporters from the Department of Trade. The main branches concerned are: Commercial Relations and Exports (CRE) Divisions, 1 Victoria Street, London SW1H 0ET (tel. direct dialling); and Overseas Tariffs and Regulations Section (OTAR), Export Data Branch, Export Services and Promotions Division, Export House, 50 Ludgate Hill, London EC4M 7HU, tel. 01-248 5757. In each case, the relevant information source is indicated at the end of the notice by its initials (OTAR or CRE) and, in the case of OTAR, the telephone extension.

Surgical swabs. The Australian government has received a request for temporary protection against the import into Australia of pre-injection surgical swabs falling within tariff item 30.04.100.

Requests for temporary protection are initially considered by the department concerned and at a later stage they may be referred to the Temporary Assistance Authority (TAA) for inquiry and report within 45 days of the date of the reference. Any temporary protection which may be accorded on the recommendation of the TAA is in the nature of a holding action pending government consideration of the general question of long-term protection for the industry.

Those interested either in support of, or in opposition to, the request may submit their views to the Department of Industry and Commerce, PO Box 80, Canberra, ACT 2600, for consideration.

A further notice will be issued, giving date and location of the public hearing, should the matter be referred to the TAA.

Inquiries: CRE 01-215 5319.

Ref: CRE 734/79

Spanners. A notice in *Trade and Industry*, 27 October 1978, reported the date of the public hearing by the Industries Assistance Commission (IAC) on the question whether assistance should be accorded the local production of spanners, etc, falling within tariff item 82.03.2.

The government has now considered the recommendations of the IAC and has decided that short-term assistance should not be provided in the case of the production of adjustable spanners.

The IAC has not yet reported to government on the question of long-term assistance to the industry.

Inquiries: CRE 01-215 5319.

Ref: CRE 1466/78

Cameroon

Public works contracts. Following a presidential decree all contracts of over 50 million CFA francs in value will now be processed and awarded by the presidency. Public works contracts of less than 50 million CFA francs can, however, be awarded by provincial commissions.

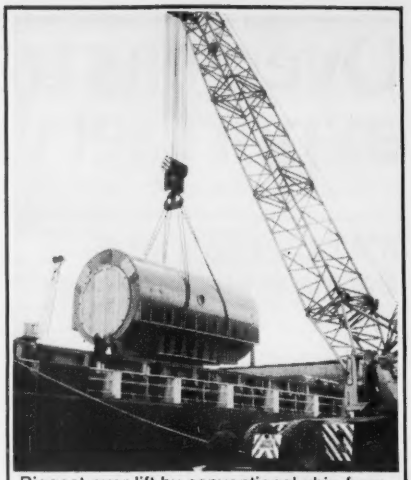
Inquiries: CRE 01-215 5334.

Fiji

Weights and weighing instruments. The Fiji government has issued an amendment to the Customs (Prohibited Imports) Order 1975 prohibiting the importation of the following:

Weights or measures, or weighing or measuring instruments, graduated in imperial or in both imperial and metric units, and used for the purpose of trade.

Inquiries: OTAR 01-248 5757 ext. 468/469/401.



Biggest ever lift by conventional ship from the Port of Manchester – a 210-tonne power station stator core – carried by the Golden Cross Line, for the Sundance hydro-electric power scheme in Canada.

Greece

Consumer tax. In a recent Greek press report it was announced that a consumer tax is now levied on the following items being imported into Greece.

Tuner-amplifiers, classified under BN 85.15 A3 will be subject to a 25 per cent consumer tax, except those intended for industrial use. Household articles, such as china and sanitary equipment, classified under BN 69.10, 69.11 and 69.12, will be subject to a 15 per cent consumer tax.

Inquiries: OTAR 01-248 5757 ext. 439.

India

Budget 1979/80. The Indian Finance Minister has presented the new budget. The expansionary tone of last year's budget and the pattern of public expenditure have been continued, reflecting the generally satisfactory progress being made by the Indian economy. A marked shift is evident in indirect taxation where duties have been lowered on agricultural inputs for cottage industries and increased on a wide range of consumer goods for urban and higher income groups.

The Finance Bill 1979 proposes numerous changes in excise duty rates which, if confirmed, would be effective as from 1 April 1979. In the main these changes only affect indigenous goods.

The most important change, however, is that item 68 of the excise tariff, which relates to all goods not covered by a specific excise tariff item, is to attract duty at 8 per cent *ad valorem* instead of 5 per cent *ad valorem*.

When this residuary item was introduced into the excise tariff in 1975, imported goods classified under this heading were exempt from the corresponding countervailing duty. As a measure of protection to indigenous goods it is proposed to withdraw this exemption. Imported goods falling into item 68 will thus be liable to a countervailing duty of 8 per cent *ad valorem*, based on the customs duty paid value, if this proposal becomes effective.

No further information is available.

LJUBLJANA: International Timber Fair. June 1980. Joint venture with appropriate trade association. Miss H. Goldberg ext. 7205. Cut off date not yet arranged.

1981

PARIS: International Agricultural Exhibition. March 1981. Joint venture with appropriate trade association. F. Sullivan ext. 7211. Cut off date not yet arranged.

Aircraft and aeronautical equipment

1979

PARIS: 33rd International Aeronautics and Space Exhibition. 9-17 June 1979. Joint venture with Society of British Aerospace Companies Ltd. Miss H. Goldberg ext. 7205. Cut off date passed.

NICE: International Airport Construction and Equipment Exhibition. 15-18 October 1979. Joint venture with appropriate trade association. Miss H. Goldberg ext. 7205. Cut off date 20.4.79.

TOKYO: Japan International Aerospace Show. 17-25 November 1979. Joint venture with Society of British Aerospace Companies. J. L. Ackroyd ext. 7317. Cut off date passed.

1980

SHANGHAI: British Aerospace Exhibition. March/April 1980. Joint venture with appropriate trade association. J. L. Ackroyd ext. 7317. Cut off date not yet arranged.

Books and periodicals

1979

JERUSALEM: International Book Fair. 19-25 April 1979. Joint venture with the Book Development Council. P. Crowe ext. 571. Cut off date passed.

LOS ANGELES: Annual Convention and Exhibition of the American Booksellers Association. 26-29 May 1979. Joint venture with Book Development Council. Mrs J. Robinson ext. 7204. Cut off date passed.

WARSAW: International Book Fair. May 1979. Joint venture with Book Development Council. B. G. Rice ext. 7246. Cut off date passed.

HONOLULU: Special Libraries Association Congress. Conference: 9-14 June 1979. Exhibition: 10-13 June 1979. Joint venture with Association of Learned and Professional Society Publishers. Miss J. Robinson ext. 7204. Cut off date passed.

MOSCOW: International Book Fair. 4-10 September 1979. Joint venture with Book Development Council. H. Giles ext. 7213. Cut off date passed.

FRANKFURT: International Book Fair. 10-15 October 1979. Joint venture with appropriate trade association. Miss J. D. Mooney ext. 7201. Cut off date not yet arranged.

1980

CAIRO: International Book Fair. January/February 1980. Joint venture with the Book Development Council. R. F. Impey ext. 602. Cut off date not yet arranged.

BOLOGNA: International Book Fair for Children and Youth. April 1980. Joint venture with appropriate trade association. P. Crowe ext. 571. Cut off date 1.11.79.

WARSAW: International Book Fair. May 1980. Joint venture with appropriate trade association. B. G. Rice ext. 7246. Cut off date not yet arranged.

CHICAGO: Annual Convention and Exhibition of the American Booksellers Association. 7-11 June 1980. Joint venture with appropriate trade association. Mrs J. Robinson ext. 7204. Cut off date not yet arranged.

USA: Special Libraries Association Congress. June 1980. Joint venture with appropriate trade association. Mrs J. Robinson ext. 7204. Cut off date not yet arranged.

FRANKFURT: International Book Fair. 8-13 October 1980. Joint venture with appropriate trade association. Miss J. D. Mooney ext. 7201. Cut off date not yet arranged.

Building, public works and construction equipment

1979

HONG KONG: International Building Exhibition (IBEX '79). 9-12 May 1979. Joint venture with Building Centre Group. A. G. Campbell ext. 7011. Cut off date passed.

TOKYO: British Export Marketing Centre (Construction Equipment and Materials Exhibition). 29 May-2 June 1979. Sponsored by the Building Centre Group. Contact D. Clayton tel. 01-637 1022/1197. R. Grindley ext. 360. Cut off date passed.

SINGAPORE: 2nd International Construction Equipment and Public Works Exhibition (Conpex Asia '79). 25-29 June 1979. Joint venture with Birmingham Engineering and Building Centre. D. Chapman ext. 7097. Cut off date passed.

SINGAPORE: 2nd International Exhibition of Materials Handling and Construction Machinery (IMAC '79). 25-29 June 1979. Joint venture with Birmingham Engineering Building Centre. R. D. Chapman ext. 7097. Cut off date passed.

CAIRO: International Exhibition of Building and Construction Equipment and of Furniture and Woodworking Machinery (Interbequip). 11-20 October 1979. Joint venture with Building Materials Export Group. R. Impey ext. 602. Cut off date passed.

PARIS: International Building Exhibition (Batimat). 16-25 November 1979. Joint venture with Building Materials Export Group. F. Sullivan ext. 7211. Cut off date passed.

1980

JEDDA: Middle East Construction Exhibition and Conference. 20-26 January 1980. Joint ventures with:
Building Materials Export Group.
Federation of Manufacturers of Construction Equipment and Cranes.
British Furniture Manufacturers Federated Associations.
R. Impey ext. 602. Cut off date 31.5.79.

USA: National Association of Home Builders Exposition. January 1980. Joint venture with appropriate trade association. Miss J. Robinson ext. 7204. Cut off date not yet arranged.

BRUSSELS: International Building Materials Exhibition (Batibou) W. February 1980. Joint venture with appropriate trade association. Miss H. Goldberg ext. 7205. Cut off date not yet arranged.

LAS VEGAS: World of Concrete Exposition. 2-6 March 1980. Joint venture with appropriate trade association. Miss M. Thorogood ext. 7094. Cut off date not yet arranged.

SINGAPORE: International Building Exhibition (SIBEX). 26-29 March 1980. Joint venture with Building Centre Group. R. D. Chapman ext. 7097. Cut off date not yet arranged.

MUNICH: International Construction Machinery Fair (BAUMA). 10-26 April 1980. Joint ventures with:
Federation of Manufacturers of Construction Equipment and Cranes.
British Internal Combustion Engine Manufacturers Association.
Miss J. D. Mooney ext. 7201. Cut off date 30.4.79.

HELSINKI: International Building Fair (Finnbuild '80). April 1980. Joint venture with appropriate trade association. Miss W. Titley ext. 7207. Cut off date not yet arranged.

TOKYO: Heatex/Buildex. September 1980. Joint venture with appropriate trade association. J. L. Ackroyd ext. 7317. Cut off date not yet arranged.

BAHREIN: Arabbuild. 9-14 November 1980. Joint venture with appropriate trade association. G. M. Lyndsell ext. 7314. Cut off date not yet arranged.

1981

BILBAO: Exhibition (Ambiente '81). March 1981. Joint venture with appropriate trade association. Ms P. A. Norfield ext. 7092. Cut off date not yet arranged.

Chemicals and allied industries, including plastics

1979

CHICAGO: National Plastics Exposition. 18-22 June 1979. Joint venture with Birmingham Chamber of Commerce. D. Malley ext. 265. Cut off date passed.

TORONTO: 11th International Congress of Biochemistry. 9-12 July 1979. Joint venture with British Laboratory Ware Association. Miss M. Thorogood ext. 7094. Cut off date passed.

DUSSELDORF: International Fair for the Plastics Industry (Kunstoffe). 10-17 October 1979. Joint venture with British Plastics Federation. Mrs C. Miller ext. 7203. Cut off date passed.

1980

MUNICH: International Exhibition and Congress for Bio-Chemical and Instrumental Analysis (Analytica). 28 April-2 May 1980. Joint venture with appropriate trade association. J. Irving ext. 690. Cut off date not yet arranged.

PHILADELPHIA: Chemical Plant Equipment Exposition. 5-8 May 1980. Joint venture with appropriate trade association. D. Malley ext. 265. Cut off date not yet arranged.

BRATISLAVA: International Chemical Exhibition (Incheba). June 1980. Joint venture with appropriate trade associations. B. G. Rice ext. 7246. Cut off date not yet arranged.

TORONTO: Plastics Show of Canada. 16-20 October 1980. Joint venture with appropriate trade association. R. D. Chapman ext. 7097. Cut off date not yet arranged.

TOKYO: International Plastics Fair. November 1980. Joint venture with appropriate trade association. J. L. Ackroyd ext. 7317. Cut off date not yet arranged.

Clothing

1979

DUSSELDORF: International Fashion Trade Fair (Igedo). 22-26 April 1979. Joint venture with Clothing Export Council. Mrs C. Miller ext. 7203. Cut off date passed.

COLOGNE: International Men's Fashion Week. 24-26 August 1979. Joint venture with British Menswear Guild. H. M. Johnson ext. 7045. Cut off date not yet arranged.

PARIS: European Menswear Exhbition (SEHM). 8-11 September 1979. Joint venture with appropriate trade association. F. Sullivan ext. 7211. Cut off date not yet arranged.

PARIS: Children's Fashion Exhibition. 8-11 September 1979. Joint venture with appropriate trade association. F. Sullivan ext. 7211. Cut off date not yet arranged.

DUSSELDORF: International Fashion Trade Fair (Igedo). 9-12 September 1979. Joint venture with Clothing Export Council. Mrs C. Miller ext. 7203. Cut off date 31.5.79.

SPONSORING A JOINT VENTURE?

For all your members travel and hotel requirements consult the experts

Barry Martin Travel Limited

our services include:

- ★ Savings of up to 30%.
- ★ Block bookings of hotels.
- ★ On Site Service of **B.M.T.** British Representative.
- ★ All tours adhere to Department of Trade **'Fringe Benefit'** regulations.
- ★ Catering services at major trade fairs.
- ★ Comprehensive visa service.

PARIS: International Exhibition of Women's Ready to Wear Clothing (Pret-a-Porter). October 1980. Joint venture with appropriate trade association. F. Sullivan ext. 7211. Cut off date not yet arranged.

1981

PARIS: Childrens Fashionwear Exhibition. February 1981. Joint venture with appropriate trade association. F. Sullivan ext. 7211. Cut off date not yet arranged.

PARIS: European Menswear Exhibition (SEHM) Spring Edition. February 1981. Joint venture with appropriate trade association. F. Sullivan ext. 7211. Cut off date not yet arranged.

PARIS: Knitting Industries Exhibition. February 1981. Joint venture with appropriate trade association. F. Sullivan ext. 7211. Cut off date not yet arranged.

DUSSELDORF: International Fashion Fair (Igedo). March 1981. Joint venture with appropriate trade association. Mrs C. Miller ext. 7203. Cut off date not yet arranged.

Display and shop equipment

1979

PARIS: International Shop Fitting and Trade Equipment Exhibition (Equip-Mag). 25-29 October 1979. Joint venture with Shop and Display Equipment Association. Miss H. Goldberg ext. 7205. Cut off date passed.

Engineering, electrical and electronic, including radio and television

1979

CANNES: International Television Programme Market (Mip-Tv). 20-26 April 1979. Joint venture with Film Production Association of Great Britain. Miss H. Goldberg ext. 7205. Cut off date passed.

BAHRAIN: Middle East Electronic Communications Show and Conference (Mecom). 23-26 April 1979. British Group with Electronic Engineering Association. G. M. Lyndsell ext. 7314. Cut off date passed.

NEW YORK: Institute of Electrical and Electronic Engineering (Electro '79). 24-26 April 1979. Joint venture with Electronic Engineering Association. Miss M. Thorgood ext. 7094. Cut off date passed.

ATLANTA: National Microfilm Association Annual Convention and Exposition. 8-10 May 1979. Joint venture with Business Equipment Trade Association. I. Maclean ext. 7242. Cut off date passed.

BRUSSELS: Computer Peripheral, Small Computer and System Exhibition (Compec). 8-10 May 1979. Joint venture with London Chamber of Commerce. Miss H. Goldberg ext. 7205. Cut off date passed.

MONTREUX: International Television Symposium and Technical Exhibition. 27 May-1 June 1979. Joint venture with Electronic Engineering Association. Ms P. Norfield ext. 7092. Cut off date passed.

LOS ANGELES: Audio Engineering Society Convention. May 1979. Joint venture with the Association of Sound and Communication Engineers. I. MacLean ext. 7242. Cut off date passed.

CHICAGO: Consumer Electronics Show. 3-6 June 1979. Joint venture with Federation of British Audio. I. MacLean ext. 7242. Cut off date passed.

NEW YORK: National Computer Conference. 4-7 June 1979. Joint venture with Business Equipment Trade Association. I. MacLean ext. 7242. Cut off date passed.

BERLIN: International TV and Radio Exhibition. 24 August-2 September 1979. Joint venture with British Radio Equipment Manufacturers' Association. J. A. Irving ext. 690. Cut off date passed.

SAN FRANCISCO: Western Electronics Show (Wescon). 18-20 September 1979. Joint venture with Electronic Engineering Association. Miss M. Thorogood ext. 7094. Cut off date April 1979.

GENEVA: World Telecommunication Exhibition (Telecom). 20-26 September 1979. Joint venture with Electronic Engineering Association. Miss P. A. Norfield ext. 7092. Cut off date passed.

WIESBADEN: Military Electronics (Defence Equipment) Exhibition. 25-27 September 1979. Joint venture with the Electronic Engineers Association. Miss J. D. Mooney ext. 7201. Cut off date passed.

VIENNA: International Industrial Electronic Exhibition. 10-13 October 1979. Joint venture with the Scientific Instrument Manufacturers Association. P. Crowe ext. 571. Cut off date 30.4.79.

NEW YORK: Information Management Exposition (INFO '79). 15-18 October 1979. Joint venture with appropriate trade association. Miss L. E. Novell ext. 318. Cut off date not yet arranged.

CHICAGO: Instrument Automation Conference (ISA). 22-25 October 1979. Joint venture with SIRA Institute. Miss M. Thorogood ext. 7094. Cut off date passed.

BUDAPEST: International Exhibition of Industrial Electronics and Instrument Production (Mipel). 23-28 October 1979. Joint venture with SIRA Institute. H. Giles ext. 7213. Cut off date passed.

MUNICH: Exhibition and Congress for Electronics Production (Productronica). 6-10 November 1979. Joint venture with SIRA Institute. J. Irving ext. 690. Cut off date passed.

SINGAPORE: British Electrical and Allied Manufacturers Association Seminar. 12-15 November 1979. Contact B. Masters tel. 01-437 0678. FPB contact P. Greig ext. 363. Cut off date passed.

NEW YORK: Audio Engineering Society Convention. November 1979. Joint venture with appropriate trade association. I. MacLean ext. 7242. Cut off date not yet arranged.

BUCHAREST: 'Systemtechnik '79'. 3-8 December 1979. Joint venture with British Electrical Manufacturers Assoc. H. Giles ext. 7213. Cut off date passed.

SINGAPORE: International Electronic Communication Show (Communicasia '79). 5-8 December 1979. Joint venture with Electronic Engineering Association. R. D. Chapman ext. 7097. Cut off date 1.5.79.

1980

TOKYO: Internepcon. 23-26 January 1980. Joint venture with Westminster Chamber of Commerce. J. L. Ackroyd ext. 7317. Cut off date not yet arranged.

PARIS: 15th International Lighting Exhibition. January 1980. Joint venture with appropriate trade association. Miss H. Goldberg ext. 7205. Cut off date 1.6.79.

PARIS: Festival Du Son – Audio Exhibition. March 1980. Joint venture with appropriate trade association. F. Sullivan ext. 7211. Cut off date not yet arranged.

ZURICH: Semiconductor Equipment and Material Convention (Semicon – Europa). March 1980. Joint venture with appropriate trade association. Ms P. A. Norfield ext. 7092. Cut off date not yet arranged.

ANAHEIM: National Electronic Packaging and Production Conference and Exhibition (Nepcon West). March 1980. Joint venture with appropriate trade association. Miss M. Thorogood ext. 7094. Cut off date September 1979.

CANNES: International Television Programme Market (Mip-Tv). April 1980. Joint venture with appropriate trade association. Miss H. Goldberg ext. 7205. Cut off date not yet arranged.

BOSTON: Institute of Electrical and Electronic Engineering (Electro '80). April 1980. Joint venture with appropriate trade association. Miss M. Thorogood ext. 7094. Cut off date November 1979.

PARIS: Exhibition of Electronic Components. April 1980. Joint venture with appropriate trade association. F. Sullivan ext. 7211. Cut off date not yet arranged.

BRUSSELS: Computer Peripheral, Small Computer and System Exhibition. May 1980. Joint venture with appropriate trade association. Miss H. Goldberg ext. 7205. Cut off date not yet arranged.

TOKYO: British Export Marketing Centre. Professional Recording Equipment, Photographic and Audio Visual Exhibition. June 1980. Sponsored by appropriate trade association. R. Grindley ext. 360. Cut off date not yet arranged.

ANAHEIM: National Computer Conference. June 1980. Joint venture with appropriate trade association. I. MacLean ext. 7242. Cut off date not yet arranged.

CHICAGO: Summer Consumer Electronics Show. June 1980. Joint venture with appropriate trade association. I MacLean ext. 7242. Cut off date not yet arranged.

WIESBADEN: Military Electronic (Defence Equipment) Exhibition. October 1980. Joint venture with appropriate trade association. Mrs J. Collings ext. 7201. Cut off date not yet arranged.

TOKYO: Electronic Show. October 1980. Joint venture with Electronic Engineers Association. J. L. Ackroyd ext. 7317. Cut off date not yet arranged.

NEW YORK: Society of Motion Pictures and TV Engineers Exhibition. October-November 1980. Joint venture with appropriate trade association. I MacLean ext. 7242. Cut off date not yet arranged.

MUNICH: International Trade Fair for Production in the Electronic Industry (Electronica). November 1980. Joint venture with appropriate trade association. J. Irving ext. 690. Cut off date not yet arranged.

1981

PARIS: Festival Du Son. March 1981. Joint venture with appropriate trade association. F. Sullivan ext. 7211. Cut off date not yet arranged.

ZURICH: Semiconductor Equipment and Material Convention (Semicon Europa). March 1981. Joint venture with appropriate trade association. Ms P. A. Northfield ext. 7092. Cut off date not yet arranged.

PARIS: Exhibition of Electronic Components. April 1981. Joint venture with appropriate trade association. F. Sullivan ext. 7211. Cut off date not yet arranged.

Engineering, other

1979

TORONTO: National Industrial Production Show. 7-11 May 1979. Joint venture with Birmingham Chamber of Commerce and Industry. Miss M. Thorogood ext. 7094. Cut off date passed.

SEOUL: British Machine Tool Exhibition. 21-26 May 1979. Sponsor: Machine Tool Trades Association. Contact: D. Bromige (01-402 6671). R. Grindley ext. 360. Cut off date passed.

SEOUL: British Machine Tool Seminar. 21-26 May 1979. Sponsor: Machine Tool Trades Association. Contact: D. Bromige (01-402 6671). R. Grindley ext. 360. Cut off date passed.

HANOVER: International Trade Fair for Machinery and Equipment for the Wood Industry (Ligna). 23-29 May 1979. Joint venture with Machine Tool Trades Association. H. M. Johnson ext. 7045. Cut off date passed.

DUSSELDORF: International Foundry Trade Fair (GIFA). 9-15 June 1979. Joint venture with Foundry Equipment and Supplies Association Ltd. Mrs C. Miller ext. 7203. Cut off date passed.

DUSSELDORF: 3rd International Trade Exhibition for Industrial Furnaces and Thermic Production Processes (Thermprocess '79). 9-22 June 1979. Joint venture with Birmingham Chamber of Commerce and Industry. Mrs C. Miller ext. 7203. Cut off date passed.

DUSSELDORF: International Trade Fair for Metalurgical Technology and Equipment (Metec). 16-22 June 1979. Joint venture with the Birmingham Chamber of Commerce and Industry. Mrs C. Miller ext. 7203. Cut off date passed.

FRANKFURT: Chemical Engineering, Exhibition and Congress (Achema). 17-23 June 1979. Joint ventures with:
Process Plant Association.
British Laboratory Ware Association.
Scientific Instrument Manufacturers Association.
Miss J. D. Mooney ext. 7201. Cut off date passed.

MELBOURNE: International Engineering Exhibition. 23-28 July 1979. The Department of Trade will organise a British pavilion at this event. R. D. Chapman ext. 7097. Cut off date passed.

SEOUL: International Shipbuilding, Shiprepairing, Ports and Harbours Exhibition. 28 July-4 August 1980. Joint venture with appropriate trade association. R. Grindley ext. 360. Cut off date not yet arranged.

BRNO: International Engineering Fair. September 1979. Joint ventures with appropriate trade associations. B. G. Rice ext. 7246. Cut off date passed.

MILAN: 3rd International Machine Tool Exhibition (EMO). 10-18 October 1979. Joint venture with Machine Tool Trades Association. P. Crowe ext. 571. Cut off date passed.

SINGAPORE: The 2nd South East Asian Production Machinery and Engineering Equipment Show (Machine Asia '79). 15-19 October 1979. The Department of Trade will organise a British pavilion. R. D. Chapman ext. 7097. Cut off date passed.

STOCKHOLM: International Technical Fair. 18-24 October 1979. Joint venture with Engineering Industries Association. Miss W. J. Titley ext. 7207. Cut off date passed.

BAHRAIN: Middle East Materials Handling Show and Conference. 22-25 October 1979. Joint venture with Birmingham Engineering and Building Centre. G. M. Lyndsell ext. 7314. Cut off date passed.

ZURICH: 9th International Hydraulics and Pneumatic Exhibition. 29 October-3 November 1979. Joint venture with British Compressed Air Society. Ms P. A. Norfield ext. 7092. Cut off date passed.

UTRECHT: International Mechanical Handling Exhibition (Invia). 8-15 November 1979. Joint venture with London Chamber of Commerce and Industry. P. Crowe ext. 571. Cut off date passed.

CHICAGO: Triple Engineering Show. 13-15 November 1979. Joint venture with Association of Hydraulic Equipment Manufacturers. Miss M. Thorogood ext. 7094. Cut off date 6.7.79.

OSLO: Materials Handling, Storage and Packaging. 20-24 November 1979. Joint venture with appropriate trade association. Miss W. J. Titley ext. 7207. Cut off date not yet arranged.

PARIS: 7th International Hydraulics and Compressed Air Exhibition (Mecanelem). 3-8 December 1979. Joint venture with Association of Hydraulic Equipment Manufacturers. Miss H. Goldberg ext. 7205. Cut off date passed.

1980

BAHRAIN: Middle East Machinery, Light Industry and Maintenance Show. 17-21 February 1980. Joint venture with Birmingham Chamber of Industry and Commerce. G. M. Lyndsell ext. 7314. Cut off date 6 July 1979.

ZURICH: International Trade Fair for High Precision Techniques Dimensional Measurement and Control (Microtechnic). February 1980. Joint venture with appropriate trade association. Ms P. A. Norfield ext. 7092. Cut off date not yet arranged.

GOTHENBURG: Machine Tools Exhibition (ISM '80). 20-25 March 1980. Joint venture with appropriate trade association. Miss W. J. Titley ext. 7207. Cut off date not yet arranged.

MILAN: International Exhibition of Hydraulic, Pneumatic and Lubricating Apparatus (Fluid). March 1980. Joint venture with appropriate trade association. P. Crowe ext. 571. Cut of date 31.8.79.

How the British Overseas Trade Board can help you promote your goods overseas

Under the direction of the British Overseas Trade Board's Export Services and Promotions Division, the Department of Trade *supports British firms at trade promotions* overseas through its Fairs and Promotions *Branch.*

In 1978, the British Overseas Trade Board supported some 7700 firms exhibiting at 318 trade fairs in 71 countries, and 12 store promotions. In 1978, 252 outward missions were supported and some 3200 firms were helped in that way.

Joint ventures

Under its joint venture scheme the BOTB provides space and a shell stand for each firm taking part in a group display sponsored by a trade association or other non profit-making body at an overseas trade fair. In addition, for joint ventures held outside western Europe, the BOTB pays half the return tourist air fares of two representatives from each firm manning their stand for the duration of the event and half the freight charges for returning unsold goods exhibited at the event. Firms taking part in a joint venture display will be charged £15 per sq m of space and shell stand occupied. FOR JOINT VENTURES TAKING PLACE AFTER 1 APRIL 1979, THE CHARGE WILL BE £18 PER SQ METRE. A discount of 50 per cent on these rates will be available to firms for their first two participations at a particular joint venture.

British pavilions

At some overseas trade fairs, usually those where participation is organised on a national basis, the BOTB organises British pavilions. Space and shell stands are provided to participating firms at attractive rates. Firms taking space in a British pavilion, provided the event is held outside western Europe, are also eligible for assistance similar to that given under the joint venture scheme towards the costs of representatives' travel and of returning unsold exhibits.

Symposia

In certain circumstances British firms taking part in symposia organised in association with a trade association may be given support.

Information stands

At the more important trade fairs, especially in western Europe, the BOTB provides an official information stand staffed by diplomatic service commercial officers. Apart from dealing with commercial inquiries, these Information Stands serve as a focal point for British firms exhibiting at the event either directly or through local agents.

British Export Marketing Centre, Tokyo.

See also page 14

Up to 10 official export promotions and trade exhibitions will be held each year in the British Export Marketing Centre in Tokyo. These will be arranged in conjunction with a trade association. In addition the centre is available to British companies or their agents in Japan for mounting individual product exhibitions or promotions.

Store promotions

Promotions of British goods involving a substantial volume of new buying are put on by overseas department stores. The BOTB assists the store by providing an agreed contribution towards the store's promotional expenses.

Outward missions

Trade missions to overseas markets are sponsored by a trade association, chamber of commerce or similar non profit-making body. Their purpose is to assess the prospects for British exports in selected markets or to sell or to promote the sale of British products. For approved outward missions the BOTB contributes towards the costs of each participant according to a fixed scale.

Inward missions

The BOTB through the Special Export Services Branch offers financial assistance to trade associations and other non profit-making bodies sponsoring visits to Britain by groups of overseas businessmen wishing to purchase British products or assess the latest developments in British industry.

1 OVERSEAS FAIRS AND SYMPOSIA
where BOTB support is planned or under consideration

LOS ANGELES: Western Metal and Tool Exposition (Westec). March 1980. Joint venture with appropriate trade association. Miss M. Thorogood ext. 7094. Cut off date not yet arranged.

CHICAGO: Design Engineering Show. April/May 1980. Joint venture with appropriate trade association. Miss M. Thorogood ext. 7094. Cut off date not yet arranged.

CHICAGO: Plant Engineering and Maintenance Show. April/May 1980. Joint venture with appropriate trade association. Miss M. Thorogood ext. 7094. Cut off date not yet arranged.

BRUSSELS: International Industrial Equipment Exhibition. May 1980. Joint venture with appropriate trade association. Miss H. Goldberg ext. 7205. Cut off date not yet arranged.

SEOUL: British Industrial Exhibition for the Metalworking and Allied Industries (Britmet '80). 2-9 June 1980. All British Fair organised by Industrial and Trade Fairs International Ltd. R. Grindley ext. 360. Cut off date not yet arranged.

TOKYO: International Mechanical Handling Show. June 1980. Joint venture with appropriate trade association. R. Grindley ext. 360. Cut off date not yet arranged.

LJUBLJANA: International Timber Fair. June 1980. Joint venture with appropriate trade association. Miss H. Goldberg ext. 7205. Cut off date not yet arranged.

BASLE: International Wire Exhibition. June 1980. Joint venture with appropriate trade association. Ms P. A. Norfield ext. 7092. Cut off date not yet arranged.

ST LOUIS: International Electric Vehicle Exposition. 20-22 May 1980. Joint venture with appropriate trade association. R. D. Chapman ext. 7097. Cut off date not yet arranged.

GENEVA: International Exhibition for the Vehicle Industry (Sitev). May 1980. Joint venture with appropriate trade association. Ms P. A. Norfield ext. 7092. Cut off date not yet arranged.

Give them a conference they'll be talking about long after the talking's over

If you want to set up a conference that will become a conversation piece, consider Iceland.

Apart from the staggering scenery, the clear, invigorating air and the hospitable people of this incredible island, Reykjavik has one of the best conference centres in the world. The Hotel Loftleidir. For creature comforts, it has everything you'd expect of a major international hotel catering for up to 434 guests.

And for conferences themselves, there's a 100-seat auditorium fully equipped with all the necessary audio-visual hardware and a large airy conference room that can accommodate 200 delegates with ease. All this is waiting in Iceland, the mid-Atlantic meeting place, just 2½ comfortable hours from London by the jets of Loftleidir and Icelandair.

Write now for more information on where to run a conference that'll become the talk of the town.

Icelandair & Loftleidir Icelandic
73 Grosvenor Street, London W1X 9DD. Tel: 01-499 9971
11 Royal Exchange Square, Glasgow G1 3BD. Tel: 041-248 3166.
Please send me your Convention wallet giving full details of facilities in Iceland.

British Export Marketing Centre Tokyo

The British Overseas Trade Board considers that the Japanese market continues to offer new and exciting growth prospects for a wide range of British exports. For a single fee of £300 or whatever rate is applicable at the time of the exhibition firms can participate in official trade exhibitions being held in the British Export Marketing Centre, Tokyo, which was opened in September 1973. The board will provide free of charge the floor space and a shell stand and mount the exhibits. It will also arrange to ship all exhibits to Tokyo free of charge from a central point in Britain. Before each exhibition it will mount a major advertising and publicity campaign in Japan to attract potential customers. In addition, exhibiting firms will be able to claim £505 towards the cost of sending each of up to two representatives to man the stands during the exhibition. The centre is available to British companies, or their agents, wishing to mount individual product exhibitions for a charge of approx. £122 a day. It is also available to companies wishing to hold seminars and conferences and there are facilities for audio-visual presentations and catering and simultaneous interpretation. A charge of approx. £12 an hour will be made. Further information on the centre and its facilities can be obtained from Fairs and Promotions Branch (01-248 5757 ext. 663/7317/360).
The programme of exhibitions for 1980 is now under consideration and information may be obtained from the Board's Export to Japan Unit (01-248 5757 ext. 614/232).

Official British trade exhibitions May 1979 to March 1980

Furniture Exhibition. 15-19 May 1979. Sponsored by BFM Exports (J. Diab, 01-724 0857/8). FPB contact R. Grindley ext. 360. Cut off date passed.

Construction Equipment and Materials Exhibition. 29 May-2 June 1979. Sponsored by the Building Centre Group (D. Clayton, 01-637 1022). FPB contact R. Grindley ext. 360. Cut off date passed.

Household Textiles Exhibition. 12-16 June 1979. Sponsored by Household Textiles Association. FPB contact J. L. Ackroyd ext. 7317. Cut off date passed.

Outdoor Leisure Exhibition. 24-28 July 1979. Sponsored by the Camping Trades Association (R. Saunders, Ruislip (71) 34191). FPB contact R. Grindley ext. 360. Cut off date passed.

Housewares and Giftwares Exhibition. 4-8 September 1979. Sponsored by the Hardware Manufacturers Association (Richard Grier, 02403 21431). FPB contact J. L. Ackroyd ext. 7317. Cut off date passed.

Do-It-Yourself and Hobbycraft Equipment Exhibition. 13-17 November 1979. Sponsored by the Birmingham Engineering and Building Centre (D. Perkins, 021-643 1914). FPB contact R. Grindley ext. 360. Cut off date passed.

Clothing Exhibition (Provisional). January 1980. FPB contact R. Grindley ext. 360. Cut off date not yet arranged.

Medical Equipment Exhibition (Provisional). 31 January-3 February 1980. Sponsored by British Health-Care Export Council (J. Harris, 0000 0000). FPB contact J. L. Ackroyd ext. 7317. Cut off date not yet arranged.

Energy Saving Exhibition (Provisional). 19-23 February 1980. FPB contact J. L. Ackroyd ext. 7317. Cut off date not yet arranged.

Carpets Exhibition (Provisional). 25-29 March 1980. Sponsored by British Carpet Manufacturers Association (G. H. Davidson 01-839 2145). FPB contact R. Grindley ext. 360. Cut off date not yet arranged.

1981

BASLE: European Educational Materials Exhibition (Didacta). March 1981. Joint venture with appropriate trade association. Ms P. A. Norfield ext. 7092. Cut off date not yet arranged.

UK businessmen going overseas

British businessmen intending to travel overseas are urged in their own interests to make the earliest possible contact, before going abroad, with the Export Services and Promotions Division of the Department of Trade (at the appropriate regional office for firms outside London, and Export House, 50 Ludgate Hill, London EC4M 7HU for firms in London and south-east England). The department, in co-operation with commercial officers at embassies, high commissions and consulates overseas, is in a position to provide advice when it is required, and to help, where appropriate, in making trade contacts related to the purpose of the visit. Even where a businessman does not require specific assistance it is valuable for him to meet the commercial officers to get up-to-date information about the market. The Department of Trade would therefore welcome receiving notification of any businessmen intending to travel overseas.

To enable the overseas commercial officers to be of the greatest assistance to UK visitors the department needs to be able to brief the overseas officers as fully as possible.

2 STORE PROMOTIONS

Where BOTB support is planned or under consideration

BOTB contact for all Store Promotions: T. G. Webb, tel. 01-248 5757 ext. 7090 or ext. 7183.

PARIS: Expozoo. May 1981. Joint venture with appropriate trade association. F. Sullivan ext. 7211. Cut off date not yet arranged.

COPENHAGEN: 10-26 May 1979. Magasin Du Nord A/S (six stores). Mr Bjarke Vilstrup, Kongens Nytorv 13, DK-7050 Copenhagen K, telex 15975.

The world's leading independent exhibition organisers—that's ITF.

In the past 20 years, we have built up an unrivalled record of success with exhibitions featuring products across the entire industrial spectrum.

And we've done it all over the world—from Argentina to Venezuela.

Currently, we are engaged in the organisation of over 30 exhibitions and trade fairs, which are listed below.

Contact ITF. We'll show you the world.

Match the incentive to meet the need..

You already know the value of incentives — but to succeed in today's competitive world the choice of incentive is more important than ever.

At Brighton, during May 8-11, you can make the right choice from literally thousands of premium, incentive and promotional ideas. Admission plus a Show Guide costs just £1.00.

Full details of the exhibition — and the two seminars being presented — are in the free information brochure. Send now for yours!

You need to keep ahead

If you are in business you need to know the facts.

Every Friday, *Trade and Industry* brings you up-to-date information. It can help you keep ahead.

If you're not reading the current copy of *Trade and Industry* you're reading old news. And these days, news, if it's old news, is not much good to you – or your business.

Ensure you're the first with the facts. Ring our Circulation controller on 01-215 5021 and ask about a subscription. Or write to Trade and Industry, Freepost, London SW1H 0YZ.

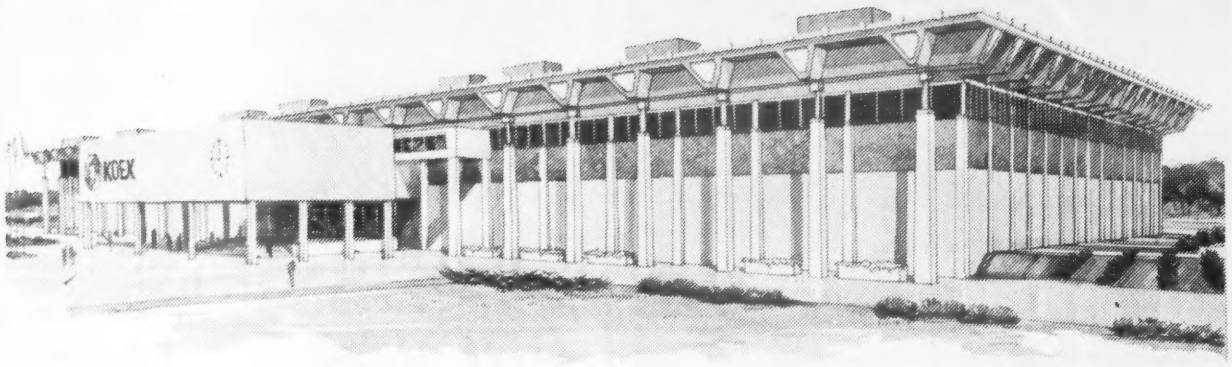
Korea's New International Shopwindow
KOREA EXHIBITION CENTER



Grand Opening on July 3 in Seoul!

All Buyers, International Fair Organizers & Exhibitors Throughout the World are Cordially Invited to Visit the Inaugural Fair, July 3 — August 1, 1979.

THE LARGEST:

The 27,500m² floor space of the Korea Exhibition Center (KOEX) complex is built on a landscaped site of 131,000m². It includes National Hall, Trade Expo Halls, Exhibition Hall and Conference Hall, and outdoor exhibition areas, totalling approximately 32,000m² of display space. The Exhibition Hall, designed for various exhibitions, fairs and other events, has an area of 7,500m² and can be divided into 3 separate halls.

THE MOST UP-TO-DATE:

Korea's fully integrated new exhibition center is equipped with the most modern facilities for the maximum convenience of exhibitors and visitors — no internal columns and no dead space, high ceiling of 11 to 15m, heavy floor loading of 15 ton/m², underfloor service duct system, etc.

SYMBOL OF PROSPERITY:

Economic experts throughout the world have hailed the remarkable growth of Korea's economy. Almost day by day living standards rise. KOEX has been designed and built by Korea to celebrate this new prosperity and to display Korea's abundant capabilities. The National Hall contains a display of the old, new and future Korea.

EFFICIENT BUSINESS CENTER:

All kinds of Korean goods are displayed on a year-round basis in the 7,900m² Trade Expo Halls. Buyers can inspect and select quality goods at any time capably assisted by the friendly staff of exhibitors, while foreign salesmen will meet plenty of potential customers. Moreover, the pleasant atmosphere and good offices of KOEX will shorten the time usually needed to buy and sell.

A LOT MORE:

A multi-purpose Conference Hall and all necessary supporting and service facilities will meet all demands of exhibitors and visitors, ensuring trouble-free profitable business.

See your travel agent now to reserve your trip to Korea, and enjoy the host of business opportunities offered at this splendid center!

Watches and clocks

1979

MELBOURNE: 4th Melbourne Watch, Clock and Jewellery Trade Fair. August 1979.

UK businessmen going overseas

British businessmen intending to travel overseas are urged in their own interests to make the earliest possible contact, before going abroad, with the Export Services and Promotions Division of the Department of Trade (at the appropriate regional office for firms outside London, and Export House, 50 Ludgate Hill, London EC4M 7HU for firms in London and south-east England). The department, in co-operation with commercial officers at embassies, high commissions and consulates overseas, is in a position to provide advice when it is required, and to help, where appropriate, in making trade contacts related to the purpose of the visit. Even where a businessman does not require specific assistance it is valuable for him to meet the commercial officers to get up-to-date information about the market. The Department of Trade would therefore welcome receiving notification of any businessmen intending to travel overseas. To enable the overseas commercial officers to be of the greatest assistance to UK visitors the department needs to be able to brief the overseas officers as fully as possible.

1980

SYDNEY: 5th International Watch Clock and Jewellery Fair. February 1980.

MELBOURNE: Melbourne Watch, Clock and Jewellery Fair (concurrent with next event). August 1980.

Water, effluent and air treatment plant including anti-pollution, cleaning and refuse disposal equipment

Main conference area for lectures/ reports etc

The new Gatwick Park Conference Centre is flexible enough to let your ideas take wing.

Gatwick's emergence over the past few years as an international cross-roads makes it ideally suitable as a conference location. But until now it has not had the conference facilities to match it.

With the new purpose-built conference centre at the Gatwick Park, the situation is redressed.

A complete complex, designed to be both comprehensive and adaptable, gives the conference planner (whether old hand or freshman) every kind of opportunity and assistance.

Complete audio-visual and presentational facilities. Flexible seating plans. Large concourses for presentations. Small studies for special projects. Self-contained catering facilities for bar, buffet or refectory. And a tally of study bedrooms intelligently equipped for the comfort and amenity of the special delegate or guest.

Behind all this is a staff of experts as experienced as they're helpful. Who will, if you like, help you formulate your plans. And then see that they're unconstrainedly put into effect.

Add the fact that all this is housed, both functionally and elegantly, in a new wing abutting on Gatwick's recently-opened premier hotel (with a bar that evokes the luxury of the Brighton Belle, a restaurant that is already drawing the discerning for miles around, and bedrooms that cosset the hard-worked delegate with every comfort including free in-house movies on TV) and you have a location that's as conducive to mental exertion as it is to physical well-being.

If our brief outline has already started to give you ideas, get in touch and we'll furnish you with more.

But don't leave it too late. To judge by our Reservations Book, our plans have already inspired considerable activity.

For more information, ring our Sales Office on Horley (02934) 5533.

EUROPE RULES OK-?

A VITAL TWO-DAY CONFERENCE IN LONDON

IMPORTANT TO SENIOR MANAGEMENT IN INDUSTRY, COMMERCE AND FINANCE

E.E.C. Laws and regulations already in force are biting NOW. Heavy penalties for breaking or ignoring them are being imposed NOW.

And yet, according to 'Financial Weekly,' many U.K. institutions and businesses 'have not come to terms either with the Community's operations or with its long term implications'.

Europe's Rules ARE O.K.– if we know them and use them skilfully. This conference will deal with such important issues as Company and Tax Law, Labour Law, Competition Policy, Finance and Consumerism. Dick Taverne, Q.C., who has been making a special study of the organisation will set the scene. Distinguished speakers from Brussels and London will deal with their specialised subjects, and the broader aspects of opportunities provided by the Community will be handled by John Pardoe, M.P. and Sir Fred Catherwood. The Conference will be chaired by Robert McKenzie.

The Time: THURSDAY AND FRIDAY 14th/15th JUNE, 1979.
The Place: GREENWOOD CONFERENCE THEATRE, LONDON.

For full details of the TWO DAY CONFERENCE please complete and mail coupon without delay
(no stamp required on envelope)
OR TELEPHONE 01-727 0554 9.30 am–5.30 pm

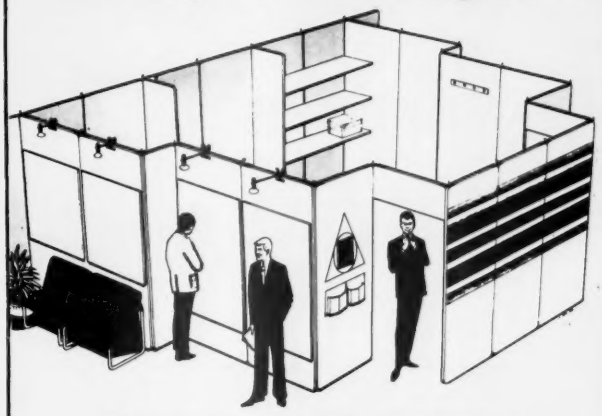
INSYSTEM*

The subtle lightweight system that stays in the background



The plain and simple answer for those who need re-useable stands

Most other systems dominate exhibition stand designs with their own characteristics. 'Insystem' does not impose – it quickly and easily creates a background, a setting within which you have complete freedom to express yourself with colour, pictures, textures, etc.

The justification for using modular systems is to reduce the cost of exhibiting – this is mainly achieved by saving time and re-using components. Unfortunately systems having many components suffer from mishandling which results in considerable costs of replacement and refurbishing. 'Insystem' has only two components – big, flat, lighweight panels and our exclusive fixing sprigots, – but it is remarkably versatile because the sprigots can be made to virtually any angle to achieve almost any modular layout.

about Co design

Co design is an established creative design and communications unit working for national and international clients on a wide range of commissions.
Our design facilities are of course available for planning your stand, creating graphics and complete production down to the last detail – even a liveried towing trailer.

1ST INTERNATIONAL ENGINEERING EXHIBITION

Korea

ENKOR

KOREA EXHIBITION CENTER
SEOUL
3-8 NOVEMBER 1980

Korea's first major International Engineering Exhibition (ENKOR '80) is to be held at the New Korea Exhibition Center in Seoul 3rd-8th November 1980 and is planned as an annual event.

Having in mind the demands of Korea's 4th Five Year Economic Development Plan, "Interfama" have created an exhibition specification to cover all possible requirements, not only for the development of Korea's modern infrastructure but also to cater for the equipment and machinery resources demanded by their vast overseas projects.

The category of exhibits at "ENKOR '80" will be:

1. **Materials Handling Machinery and Equipment**
2. **Construction Plants and Building Materials and Equipment**
3. **Electrical and Electronic Engineering**
4. **Public Works Technology**
5. **Chemical Processing Engineering**
6. **Machine Tools and Metallurgy**
7. **Agricultural and Food Processing Technology**
8. **Transportation and Communications Technology**
9. **Textile Machinery and Allied Equipment**
10. **Papermaking, Printing and Packaging Machinery**

Write now for details of "ENKOR '80" and the "Market Profile" to:

Interfama
177 Brighton Road, South Croydon, London CR2 6EG, England

Irish Republic

Excise duties. From 1 March, the two-tier VAT rates of 35 per cent and 40 per cent applying to cars, motor-cycles, televisions and records have been replaced by the single rate of 10 per cent. This reduction of VAT has coincided with new excise rates as follows:

	Duty
Vehicles	
Category A motor vehicles (ie motor vehicles, excluding ambulances and hearses) which are designed, constructed or adapted for the carriage of not more than 16 persons (inclusive of the driver), including such vehicles designed, constructed or adapted for the carriage of both passengers and goods or materials and which are of not more than 3 tons unladen weight and have, to the rear of the driver's seat, roofed accommodation which is fitted with side windows or which is constructed or adapted for the fitting of side windows):	35%
Category B motor vehicles (ie all motor vehicles not included in category A):	11.5%
Excise duty is not charged on motor vehicles designed and constructed primarily for off-road use (except for racing vehicles, scrambling vehicles and other sporting vehicles), agricultural tractors, two-wheeled tractors, fire-engines, fire-escapes, road sweepers, invalid carriages or armoured fighting vehicles.	
Televisions	
Colour televisions	
Maximum dimension of screen not exceeding:	
17 inches	£45 per television
17-24 inches	£56 per television
Over 24 inches	£69 per television
Monochrome televisions	
Maximum dimension of screen not exceeding:	
17 inches	£14 per television
Over 17 inches	£22 per television
Gramophone records	30%

Full details of the changes in excise duty are given in SI No. 57 of 1979: Imposition of Duties (No. 326) (Excise Duties on Motor Vehicles, Televisions and Gramophone Records) Order, 1979, available from the Government Publications Sale Office, GPO Arcade, Dublin 1, price 40p plus 8p postage.

SI No. 61 of 1979: Televisions and Gramophone Records Regulations, 1979, prescribes methods of securing and collecting the excise duties payable on televisions and gramophone records. It also lays down conditions relating to the licensing of manufacturers of televisions and gramophone records and to the warehousing of such goods (price 30p) available from GPSO, Dublin.

Inquiries: OTAR 01-248 5757 ext. 466/467.

Italy

Avoiding customs delays. All concerned with exporting goods to Italy (such as chambers of commerce) should add an Italian translation to the description of the exported goods, appearing on all export documents, including health certificates and certificates of origin.

Without an Italian translation Italian customs inspectors often find it difficult to identify the nature of the goods from the English description, which results in the consignment being inspected and thus leading to irritating delays.

Inquiries: OTAR 01-248 5757 ext. 466/467/288.

Jordan

Foodstuffs, etc. The British embassy in Amman has recently sent copies of the following 22 standards which are in force in Jordan:

Standard	Title
3	Olive oil
4	Liquid milk
7	Finished and concentrated feeds for chickens
14	Finished and concentrated feeds for dairy cattle
18	White sugar
21	Beer
32	Sodium chloride
35	Glucose Syrup
36	Methods of testing and analysis for white sugar
40	Vegetable ghee
41	Tomato paste
42	Finished and concentrated feeds for sheep
43	Hard candies
44	Milk ices, ice creams
47	Jams
66	Canned foul medames
67	Macoroni, spaghetti and vermicelli
68	Canned fish (anchovies, sardines, tuna)
71	Evaporated milk and skimmed sweetened condensed milk
73	Pickles
77	Artificial drink, natural drink, and artificial drink powder
79	Luncheon meat

Copies of the above standards are available, in Arabic only, from OTAR 01-248 5757 ext. 4062/420.

Kenya

Weights and measures. The Minister for Commerce and Industry announced on 7 March (Kenya *Gazette* supplement 11, 16 March), that from that date the Liquid Fuel (Bulk Measures) Rules 1979 will replace those of 1973.

Inquiries: OTAR 01-248 5757 ext. 472.

Luxembourg

Foodstuffs. The Luxembourg *Memorial* A-19, 9 March, published a decree dated 27 February 1979, fixing the maximum levels of hydrocarbon chlorine residues in foodstuffs of animal origin.

Copies of this decree (in French) are available from OTAR 01-248 5757 ext. 288/466/467.

Cosmetics. The Luxembourg *Memorial* A-21, 21 March, published a decree dated 5 March 1979, amending the decree of 24 October 1978 concerning cosmetic products. Copies of the decree (in French) are available from OTAR 01-248 5757 ext. 288/466/467.

Nigeria

Import controls. The Federal Commissioner for Finance, in the context of a recent budget statement, announced the following changes which have been published in the supplement to the *Official Gazette Extraordinary* 16, Vol. 66, 1 April 1979:

1 Additional prohibited imports: artificial flowers or fruits or parts thereof tariff no. (67.02), fireworks (36.05), footwear uppers (excluding soles and heels), toothpaste (33.06 B).
2 Further goods subject to import under licence only: frozen beef: 04.03; 10.01-10.04; 10.06; 10.07; 11.01; 17.01; 33.06; 39.02 D, 39.07 I J; Ch 39 (polythylene and regenerated cellulose film): 48.21; 55.05 A; 55.06 A; 57.03; 57.04; 62.01; footwear soles and heels: 68.12 B; 73.13 A; 73.17 C; 73.18 C; 84.41; and 87.14 B.
3 Various tariff amendments in respect of 03.01; 03.03; 25.18; 25.31; 32.13 A; 37.03; 39.02; 39.07 I J; 48.01 B; 49.11 C; 70.10 A; 73.13 C; 73.17 C; 73.18 C; 73.21 B; 76.04 A, 76.08 B; 84.12 B; 84.15; 84.41; 85.15 C; 87.03 A B; 92.11 B; and 92.12 A.
4 Machinery for irrigation can be imported duty free under an extension of the approved user's scheme; and a nominal excise duty was announced in respect of the sale of sound recorders, reproducers and record players; kerosene and gas cookers; clocks and watches; socks and stockings; mattresses and pillows; glassware; calendars, and greeting cards.

Inquiries: OTAR 01-248 5757 ext. 473.

Saudi Arabia

Foodstuff standards. The Saudi Arabian Standards Organisation has issued the following standards which are in force in Saudi Arabia:

Standard	Title
29	Edible maize oil
30	Physical and chemical methods for testing edible oils and fats
32	Methods of sampling prepackaged fruit and vegetable products
40	Pasteurised milk
43	Methods of microbiological examination of liquid milk
45	Methods of physical and chemical analysis of meat and meat products
47	Canned tuna
48	Methods of sampling fish, shell fish and their products
49	Methods for physical and chemical analysis of fish, shell fish, and their products
69	Cheese, hard semi-hard soft
70	Methods for the chemical analysis of cheese
71	Edible vegetable oils and fats
72	Methods of test for permitted additives in edible oils and fats
73	Benzoic acid sodium benzoate and potassium benzoate used in preservation of foodstuffs
74	Methods of test for benzoic acid sodium benzoate and potassium benzoate used in preservation of foodstuffs
75	Hermetically sealed round tin cans used for canning foodstuffs
76	Methods of test for hermetically sealed round tin cans used for canning foodstuffs
97	Sterilised milk
98	Raw milk
100	Methods of test for carbonated water and beverages
Other standards which are not at present in force are:	
88	Orange juice, concentrated orange juice and orange juice powder
89	Diluted orange juice, orange drink and orange nectar
90	Methods of test for fruit juices
95	Dried milk
96	Methods for the analysis of dried milk
101	Honey
102	Methods of test for honey
103	Methods of microbiological examination of meat, fish, shell fish and their products
104	Salts of sulphurous acid used in preservation of foodstuffs
105	Methods of test for salts of sulphurous acid, used in preservation of foodstuffs

Copies are available from OTAR 01-248 5757 ext. 7062/420.

South Africa

Tariff application. Customs tariff application list 11/79, published in the South African *Government Gazette*, 30 March, contains applications to the Board of Trade and Industries for increase in duty on:

1 Forged or rolled flanges, of iron or steel (excluding stainless steel), machined or unmachined:
A With an inside diameter of 200 mm or more but not exceeding 610 mm (excluding the slip-on type);
B Slip-on type, with an inside diameter of 200 mm or more but not exceeding 1210 mm;
classifiable under tariff subheading 73.20.90.

2 Plain shaft bearings, by the substituting of the following for tariff subheading 84.63.50:

Per cent

Tariff heading/Description	Rate of duty General
84.63.50	
Plain shaft bearings and bushes, including half shaft bearings, whether or not in sets:	
.10 Spherical plain shaft bearings	Free
.20 With an inside diameter not exceeding 125 mm per bearing (excluding spherical plain shaft bearings)	35
.90 Other	20

The above duties to be applicable also to plain shaft bearings and bushes, including half shaft bearings, whether or not in sets, imported with unassembled motor vehicles (not incorporated in engines), classifiable under tariff subheadings 87.01.60, 87.02.15, 87.02.22, 87.02.24, 87.02.60, 87.02.67 and 87.02.70, and with unassembled chassis (not incorporated in engines), classifiable under tariff subheadings 87.04.20 and 87.04.25.

Note: This notice supersedes tariff application list 15/78 published on 16 June 1978, *Government Gazette* 6034, 2 June 1978.

Those British trade organisations thought to be interested in the applications are being informed. Any British firm affected which wishes to make representations to the South African Board of Trade and Industries and belongs to a trade organisation should, therefore, first contact its own trade association.

If any firm proposes to make independent representations to the South African Authorities and requires further information concerning the applications, it should address inquiries to CRE 01-215 5274.

Customs tariff changes. The following amendments were published in the South African *Government Gazette*, 16 March:

R.484, CCCN 38.19: Subheading 38.19.70 is restated.
R.485, CCCN 59.08 and 59.12: Subheadings 59.08.90 and 59.12.70 are restated.
R.486, CCCN 82.14: Subheading 82.14.01 is restated.

Industrial rebate
R.487, item 311.04, CCCN 58.07: The provision for a rebate of duty on fringing for the manufacture of shawls is withdrawn.

Inquiries: OTAR 01-248 5757 ext. 471/472/473/462.

Tariff application. Customs tariff application list 12/79, published in the South African *Government Gazette*, 6 April, contains applications to the Board of Trade and Industries for increase in duty on:

1 The under-mentioned azo pigment dyestuffs of the following description and international colour index numbers:
A CI pigment, yellow 12, no. 21090, and
B CI pigment, yellow 13, no. 21100,
classifiable under tariff subheading 32.05.90.
2 Hairbrushes, beard brushes, hair dyeing brushes and bath brushes, classifiable under tariff subheading 96.01.13.20.
Note: This application supersedes the application published in tariff application list 10/79.

Those British trade organisations thought to be interested in the applications are being informed. Any British firm affected which wishes to make representations to the South African Board of Trade and Industries and belongs to a trade organisation should, therefore, first contact its own trade association.

If any firm proposes to make independent representations to the South African authorities and requires further information concerning the applications, it should address inquiries to CRE 01-215 5274.

Sweden

Agricultural import levies. The State Agricultural Board has announced that the agricultural levies for certain items contained in the following headings have been amended from 2 April 1979:

11.02, 17.01, 17.02, 23.02, 23.03, 23.06

Inquiries: OTAR 01-248 5757 ext. 459.

United States

Lifesaving equipment. The *Federal Register*, 15 March, published an advance notice of proposed rulemaking, by the Department of Transportation, which establishes structural and performance standards for inflatable personal flotation devices (PFDs), and procedures for granting approval to those devices which meet these standards. PFDs have previously been precluded from Coast Guard approval.

Comments must be received on or before 15 June 1979.

Inquiries: CRE 01-215 5629.

Acidified foods. The *Federal Register*, 16 March, published a final rule by the Food and Drug Administration revising the current good manufacturing practice for low acid canned foods in hermetically sealed containers.

A copy of the text is available from OTAR 01-248 5757 ext. 456/457/7312.

Worcester firm builds rotary transfer machines for Romania

One of two identical eight-station rotary transfer machines purpose-built by Mechanised Assembly of Worcester to finish machine jaw and keyholes in four sizes of chuck for a major Romanian manufacturer. The control system is solid state, incorporating logic cards, and with independent switching of drill heads. Rotary transfer table and fixtures index hydraulically while heads are electrically driven and hydraulically operated to give infinitely variable rates of feed.

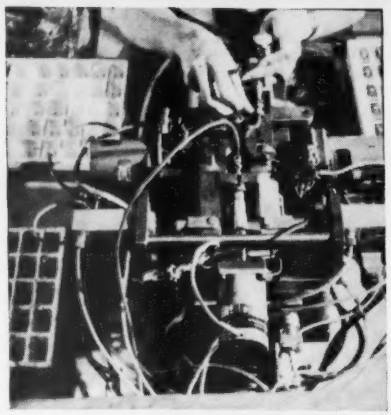
Electrical engineering recovery confirmed



The first article in this series (*Trade and Industry*, 22 September 1978) showed that electrical engineering, order IX of the Standard Industrial Classification 1968, fell broadly into two groups of minimum list headings, respectively comprising those based on electrical, and those based on electronic, technology.

The earlier article also showed that, in terms of 1970 prices, the two were almost equal, with the electrical group slightly higher than the electronic. By 1975, however, the positions had been reversed, the electrical group having declined, and the electronic group having increased commensurately.

Output

On the 1970 base, output of the electrical engineering industry as a whole, and of each of its separate parts, followed a roughly similar pattern characterised by rapid growth to a 1974 peak, a fall to a 1976 trough, and a mild recovery through 1977. Re-basing on 1975 has not disturbed this pattern, but it has had the effect of dampening down the 1970-74 and 1975-76 movements, and strengthening the post-1976 recovery which, as table 1 clearly shows, continued into 1978 at an appreciably faster rate in the electronic than in the electrical group. These movements are reflected in the sales of principal products of the various sectors of the industry shown in table 2.

Published here is the latest available performance of the electrical engineering industry. The tables, originally published on a 1970 = 100 basis, are now based on 1975 = 100, and the index of production weights of each minimum list heading (MLH) in that year are shown in table 1.

Overseas trade

Tables 3 and 4 show that throughout the seventies, with the exception of 1973-74, the electrical engineering industry enjoyed a favourable crude trade balance which from 1970 to the end of 1978 had accumulated to a figure exceeding £2,000 million in terms of current prices.

The disquieting feature of this otherwise satisfactory situation is that the surplus of exports over imports occurred almost entirely in the electrical group which at the latest date had declined to not much more than a third of the total trade in electrical engineering. The electronic group was in deficit on visible trade account throughout the whole period 1970 to 1978; this was attributable mainly to consumer electronics and computers, and it may be expected to continue.

Employment

Between 1970 and 1978 the number employed in the electrical group fell by over 12 per cent, exactly in line with the fall in manufacturing industry generally. The fall in the number of those employed in the electronic group, at over

6 per cent, was less marked and in consequence employees in the electrical engineering industry declined by a little over 9 per cent.

In the most recent months, there have been signs that the fall in employment may have ended, and in some sectors numbers have risen. Such movements have been too small, however, to justify any confidence that an upturn may in fact have started.

Inquiries: Mr J. E. M Lilley, Dean Bradley House, 52 Horseferry Road, London SW1P 2AG, tel. 01-212 6873.

Notes

The index of production shown in table 1, measures net output at constant prices of all establishments classified to each minimum list heading. Table 2 shows sales at constant 1975 prices of those products which are regarded as characteristic or principal products of a minimum list heading as revealed by the series of quarterly production inquiries conducted by the Business Statistics Office. Sales of waste products and work done by establishments classified to the industry have been deducted, while sales of the principal products by establishments classified to other minimum list headings have been added to the totals which also include an estimate of the sales of those products by firms which are too small to be covered by the quarterly inquiries. The import and export figures shown in tables 3 and 4 are obtained from the overseas trade statistics by combining those trade headings which correspond most closely to the principal products of each minimum list heading, and they show the value of trade in terms of current prices. It should be noted that tables 1 and 5 are on an industry basis whereas the other tables relate to principal products.

Combined engineering sectors: sales and orders up to January

The January indices of sales and orders for the combined engineering industries are severely affected by special factors which render any assessment of the underlying trends highly uncertain. The industrial disruption caused by the lorry drivers' (and other) disputes has combined with severe weather conditions to produce a very large fall in sales and new orders in January. It is probable, however, that output was not as badly affected as sales during this period and that a significant proportion of sales lost will be made up in subsequent months.

Before the addition of the January figures the trend of total sales had been virtually flat for nearly a year and new orders were on a steeply rising trend attributable largely to the recent Central Electricity Generating Board orders in connection with the Drax power station. Any trending process will spread the effect of a narrow peak or trough over a longer period. In this case the very poor January results have adversely affected the given trend series as far back as October. Some upward revisions to these estimates can be expected as the figures reflecting the return to normality become available. Greater reliance must then be placed upon the seasonally adjusted figures provided; on this basis total sales fell back by nearly 20 per cent in January and total new orders fell by an even greater amount. Total orders on hand showed no appreciable change.

The January fall in sales to the home market was slightly less steep than for engineering sales as a whole. Home new orders reacted sharply to the difficult conditions but the net affect on order books was minimal.

Foreign shipments were particularly difficult in January hence the export market was the worst hit sector, sales falling by 25 per cent from their December level. New orders from abroad fell by about the same amount but remained higher than sales so that order books actually lengthened slightly over the period.

The revised figures published in this table are based on the monthly engineering inquiry relating to January 1979. The response rate of 75 per cent to the inquiry for January 1979 is judged sufficient to justify publication of provisional indices for this month. Taking into account late returns now received for October, November and December response rates for these months were 92, 90 and 88 per cent respectively.

Inquiries: Department of Industry, Room 607, Dean Bradley House, 52 Horseferry Road, london SW1P 2AG, tel. 01-212 5770.

Notes to table

[1] This ratio shows the number of months work in the order book in the base year at the then average rate of sales. [2] For orders-on-hand the percentage changes compare the level at the end of the latest period shown with the corresponding level for the earlier period. The percentage changes have been based on the unrounded values and are given to the nearest half percentage point. p Provisional.

Table 4 on next page

Revised figures confirm that steel consumption in 1978 was slightly over 15½ million tonnes. This is about the same level as in the previous three years but some 2 million tonnes below the average level achieved in the early 1970s. There was a sharp fall in consumption in the fourth quarter of the year, particularly in the mechanical engineering, motor vehicle and construction industries.

Even though consumption remained depressed, stocks of steel held by consuming industries continued to decline steadily, falling by over 300 000 tonnes during 1978. With stocks held by stockholding merchants also falling and imports increasing, deliveries from UK production destined for home consumption fell to just under 12 million tonnes.

Notes

1 Data from the third quarter of 1977 have been calculated on a slightly different basis from the previous figures and therefore the series are not strictly comparable before and after that date. The discontinuities in the aggregate figures are, however, fairly small.

2 The large movements in consumption in the first and fourth quarters of 1978 cannot be explained fully in terms of the output of the main steel consuming industries. It is possible, therefore, that the quarterly adjustments made do not accurately reflect any changes in the seasonal variations that have taken place in 1978.

Inquiries: Department of Industry, Dean Bradley House, 52 Horseferry Road, London SW1P 2AG, tel. 01-212 0856.

Price Commission index: March

The rise in the Price Commission index over the six months to March was 11.8 per cent expressed as an annual rate. The corresponding figure for February was 10.0 per cent.

Oil prices hit index

Charles Williams, chairman of the Price Commission, said that the commission index this month reflects another round (the second this year) of oil company increases resulting from the decisions by the Organisation of Petroleum Exporting Countries on crude oil prices and the interruption of Iranian supply. 'These notifications have a considerable impact on the index; furthermore, increases on a lot of products other than petrol take a long time to get through to retail prices, whereas in our index they all show up straightaway. This factor serves to reinforce our frequently stated view that our index should be treated as an indicator of future trends in, rather than a precise predicter of the future level of, the retail price index.

'It is difficult to adjust for the delayed effect of oil company increases, and it is no use trying to pretend that all the increases will not be felt in the end, but it may be worth noting that if we were to give the same weight to petroleum products in our index as in the RPI, the increase would be quite significantly lower than the figure we have given. It may also be worth noting that there are certainly more oil company rounds to come.'

Over the 12 months to March the index rose by 8.0 per cent, compared with a rise of 7.2 per cent in the 12 months to February.

Index of retail prices for March

The index of retail prices for all items for 13 March 1979 was 210.6 (15 January 1974 = 100). This represents an increase of 0.8 per cent on February 1979 (208.9) and of 9.8 per cent on March 1978 (191.8).

The rise in the index in March was due mainly to increases in the prices of alcoholic drinks, vegetables and petrol; to an increase in the level of mortgage interest payments; and to increases in the prices of a number of household goods and articles of clothing and footwear.

The movements for the main groups in the index are shown in table 2.

Notes

1 The retail prices index measures the change from month to month in the average level of prices of goods and services purchased by most households in the UK. The expenditure pattern on which the index is based is revised each year using information from the family expenditure survey. The expenditure of certain higher income households and households of retired people dependent mainly on social security benefits is excluded.

2 The index covers a large and representative selection of nearly 350 separate goods and services, for which price movements are regularly measured in more than 200 towns throughout the country. Approximately 150 000 separate price quotations are used each month in compiling the index.

3 Seasonal variations in the index of retail prices are due largely to a very few items of 'seasonal food' that is, those items of food the prices of which show significant seasonal variations. These items account for less than 5 per cent of total retail expenditure. If the variation caused by these items is removed, the underlying trend of the figures can be seen more clearly

4 Rates of change of indices can be calculated over periods of any length. However, rates calculated over periods as long as 12 months are slow to detect changes in trend, while calculations over periods as short as three months give rather volatile results. To help in assessing trends, rates of changes in the all items index and the index for all items except seasonal food are shown in table 1 over successive periods of six months.

5 The index is given in full in the *Department of Employment Gazette*.

Inquiries: Watford 28500 ext. 630.

Retailers' stocks in February

Based on the non-seasonally adjusted data of table 1, the level of stocks at book values in February was £85 million higher than in the previous month and 16 per cent higher than in the same month a year earlier; at constant (1975) prices it was 8 per cent higher than a year earlier.

The estimate of the value of physical increase of retailers' stocks at 1975 prices and seasonally adjusted (table 2) suggests little change in February. With most of the effects of the backdated tax reductions and lorry drivers' dispute appearing to have worked themselves through, the ratio of stocks to retail sales (table 3) now stands at the average level of the first three quarters of last year.

Inquiries: Department of Trade, Economics and Statistics Division 6C, Room 351, Sanctuary Buildings, 20 Great Smith Street, London SW1P 3DB, tel. 01-215 3705.

Notes

1 The book values are valued exclusive of VAT.

2 For the estimates at constant prices, it should be borne in mind that, when price increases are large, the various problems associated with revaluation of the value series to constant prices become more acute. Thus the relative accuracy with which constant price changes have been measured is likely to have been reduced in recent periods.

3 The statistics given in table 2 were introduced in an article in *Trade and Industry*, 28 March 1975, and those in table 3 were introduced in an article in the issue of 17 March 1978.

4 Long-run series back to 1970 for table 1 and to 1967 for table 2 were included in the article in *Trade and Industry*, 22 September 1978.

Notes for table 3

1 The index numbers of the level of stocks relate to the end of each time period; the index of sales refers to retail sales during the period.

2 The 1971 = 100 index of retail sales has been rebased on the fourth quarter of 1974 for the purpose of this table.

3 The index numbers of the stocks sales ratio are calculated from unrounded estimates of the data in the previous two columns.

New centralised store for Otis Elevator Co, Kirkby. For smaller components the company chose a Dexion slotted angle narrow-aisle installation, serviced by an order-picker, which offers 6000 locations in Dexion P.60 Maxi bins.

Wholesale price indices in March

Output prices

The provisional price index for the home sales of manufactured products increased by ¾ per cent in March to 162.9 (1975 = 100).

The index for manufactured products other than food, drink and tobacco was 1 per cent higher. More than a quarter of this increase was caused by the residual effects (see note) of February's price increases for petroleum products. This index rose 3¾ per cent in the latest three months.

Higher prices for iron castings, copper tubes and aluminium castings made the most significant contribution to the 1½ per cent increase in the index for the metal manufacturing industries. This index rose by 4¼ per cent in the latest three months.

Almost three-quarters of the 1¼ per cent increase in the index for the bricks, cement, etc, industries was accounted for by higher prices for asbestos cement goods and pre-cast concrete goods. This index also rose 4¼ per cent in the latest three months.

Higher prices for weft knitted fabrics and warp knitted fabrics in the piece accounted for almost one half of the 1¼ per cent increase in the index for the textile industries.

Higher prices for printing and writing paper, toilet paper and household tissue products accounted for two-thirds of the 1¼ per cent increase in the index for the paper industries.

The index for the output of the food manufacturing industries increased by ¼ per cent in March as a result of slightly higher prices throughout the sector. This index has increased by 1¾ per cent in the latest three months.

The change in the index for all manufactured products measured over a 12-month

period was 8½ per cent, the same as in February, on revised figures. The increase in the index over the latest six months also remained unchanged at 4½ per cent.

Input prices

The provisional price index for materials and fuel purchased by manufacturing industry increased by 1¼ per cent in March to 153.8 (1975 = 100). This index rose by 8¼ per cent over the last 12 months.

The 1¾ per cent increase in the index for coal, gas and electricity was due to increased prices for coal.

The index for materials purchased by manufacturing industry other than the food, drink and tobacco industries increased by 1½ per cent. The index for materials other than crude oil rose by 2½ per cent; higher prices for carbonising coal and further higher prices for hides and skins made the most significant contributions; there where also higher prices for several metals, especially copper and lead.

Higher prices for copper, lead, cobalt and nickel were also responsible for most of the 3¼ per cent increase in the index for materials and fuel purchased by the non-ferrous metals industry. This index rose 14½ per cent in the latest three months.

More than one-half of the 2¼ per cent increase on the index for the clothing and footwear industries was accounted for by higher prices for leather for footwear and warp knitted fabrics in the piece.

Higher prices for coal and, to a lesser extent, for hard coke accounted for almost three-quarters of the 2 per cent increase in the index for the steel industries. Higher prices for coal, in conjunction with higher prices for sand and gravel (uncoated), also made the most significant contribution to the 2 per cent increase in the index for the bricks, cement, etc, industries. The latter index rose 5¼ per cent in the latest three months.

Higher prices for imported softwood were responsible for two-thirds of the 1¼ per cent increase in the index for the timber industries and, in conjunction with higher prices for copper tubes and sand and gravel (uncoated), also made the most significant contribution to the 1¼ per cent increase in the indices for construction materials and house building materials.

Higher prices for home produced cereals made the most significant contribution to the ½ per cent increase in the index for materials purchased by the food manufacturing industries.

Note

The indices relate to the average prices for the month. The full effect of a price change within a month will only be reflected in the index for the following month.

Notes on wholesale price indices

1 Detailed notes on index numbers of wholesale prices were last shown in *Trade and Industry*, 20 October 1978.

2 The index numbers are constructed on a net sector basis. This is to say, the price movements used to compile the index for a particular sector of industry are only those relating to transactions between the sector and other sectors. Transactions between undertakings in the same sector are excluded. Thus index numbers for the whole of manufacturing industry are not weighted averages of sector index numbers.

3 All the index numbers are compiled exclusive of value added tax and (before its abolition) of purchase tax. Revenue duties (on cigarettes and manufactured tobacco, alcoholic liquor, matches and mechanical lighters) are included. The duty on hydrocarbon oils is excluded from output price series that cover these products (unless specifically noted to the contrary) but is included in series for materials and fuel purchased by sectors of industry.

4 Firm and provisional indices, at all levels of aggregation, include imputation for items for which there is no current price information. Additional provisional figures will be published for those indices where there are insufficient returns to allow accurate imputation.

5 Revisions to firm index numbers will only be made if they are significant. These revisions will be notified when the series are next published.

6 Some indices in tables 3 and 4 were only published at intervals of four months on base 1970 = 100. Commencing in December 1978 all available indices on base 1975 = 100 are published every month.

7 Where extension of indices on base 1970 = 100 is required for contract purposes the multiplication factors and explanatory notes are shown in *Trade and Industry* 15 December 1978.

Motor spirit (including duty) [1]	130.9	130.9	130.9	133.8	135.6
Gas/diesel oil (including duty) [1]	166.0	166.2	166.2	172.4	176.3
Gas oil fuel (including duty) [1]	168.6	168.6	168.6	175.8	180.5
Derv (including duty) [1]	160.3	160.3	160.3	163.9	166.0
Medium fuel oil (950 seconds including duty) [1]	169.5	169.5	169.5	174.1	177.1
V Chemicals and allied industries					
271 **General chemicals**	143.1	149.7	154.3 p	155.7	157.8
271/1 **Inorganic chemicals**	150.8	158.3	161.6 p	162.0	162.9
Inorganic acids and oxygen compounds of non-metals	131.5	137.0	139.0 p	139.3	139.6
Metallic oxides, hydroxides, peroxides and other inorganic bases	154.5	161.1	162.5	163.7	165.1
Metallic salts and peroxy salts of inorganic acids	152.7	161.3	162.6	163.0	164.0
Soda ash	166.1	177.5	177.5	177.5	177.5
Metallic salts and peroxy salts of inorganic acids-other than soda ash	149.1	157.0	158.6	159.2	160.3
271/2 **Organic chemicals**	136.9	144.3	151.4	153.6	155.0
Hydrocarbons other than products of coal tar etc	124.2	142.7	157.5	159.7	161.0
Halogenated, sulphonated, nitrated or nitrosated derivatives of hydrocarbons	152.5	156.7	159.2	159.5	162.1
Alcohols, phenols and pheno-alcohols	130.1	131.7	138.2	143.7	145.1
Nitrogen function compounds	140.2	139.2	139.2	139.8	140.7
271/3 **Other chemicals**					
Bleaching materials	171.7	191.5	192.2	192.2	194.2
Plasticisers, mixed or unmixed	127.8	128.9	128.9	136.8	143.7
272 **Pharmaceutical chemicals and preparations**					
Pharamaceutical chemicals					
—central nervous system	166.6	173.1	177.5	178.3	180.1
Pharmaceutical preparations	148.8	159.8	160.1 p	161.6	162.3
—central nervous system	163.8	182.3	182.4	185.5	186.2
Anaesthetics	140.4	146.0	146.0	146.0	146.0
Analgesics	154.8	171.1	171.1	177.3	177.9
Psycho analeptics	177.3	182.3	182.3	182.3	182.3
—cardiovascular system	169.5	172.7	172.7	175.0	175.5
Plain hypotensives	170.7	171.2	171.2	171.2	171.2
—respiratory system	165.7	179.4	179.4	183.2	183.3
Cough and cold preparations	170.7	179.7	179.9	188.6	188.6
—alimentary tract and nutrition	136.7	152.4	152.7 p	152.8	155.4
—dermatologicals	150.9	152.9	153.9	154.6	155.1
—general anti-infectives					
Antibiotics	124.3	128.3	128.5	128.6	128.9
Penicillins	144.3	154.9	154.9	154.9	154.9
273 **Toilet preparations**	143.3	152.2	158.0 p	159.2	160.1
—specifically for men	144.1	151.3	157.5	157.7	158.0
After-shave, cologne and pre-shave lotions in alcoholic lotion form	159.0	166.5	176.4	176.4	176.4
—other than specifically for men	143.2	152.3	158.1 p	159.4	160.3
Hair preparations (excl. shampoos)	145.6	159.2	170.8	170.8	172.0
Talc and dusting powders and bath preparations					
Talc and dusting powders	148.4	159.3	162.6 p	164.3	164.5
Bath oils, cream and liquid essences	134.1	152.8	153.8	153.8	154.8
Make-up preparations	144.1	148.8	153.8 p	156.3	157.5
Lipsticks and lip glosses inc. lipsalve	143.6	149.4	151.7 p	152.9	154.8
Face powders	143.7	152.2	162.8 p	164.8	165.9
Liquid and cream facial make-up preparations	147.4	157.0	160.8 p	163.8	166.4
Eye shadow and mascara	150.5	153.2	160.9 p	162.2	163.0
Nail preparations	131.1	131.1	133.1	140.3	140.3
Creams and lotions	131.7	139.1	141.5 p	146.8	147.8
Facial beauty care preparations	128.3	137.6	141.0 p	143.3	143.7
Cleansing creams, cold creams, lotions and milks, moisturisers, nourishing and night creams	129.1	134.1	138.4 p	141.3	141.8
General creams and lotions					
Hand creams, lotions and gels	156.5	166.2	168.0 p	168.0	171.1
Deodorants, anti-perspirants and depilatories	131.4	135.8	141.3	141.9	142.8
Dental toothpaste and powder	145.3	152.0	156.3 p	156.3	157.1
Soapless shampoos	150.5	160.4	175.1	175.1	176.4
274 **Paint**	140.4	142.1	145.4 p	149.1	150.7
Air drying and stoving finishers, undercoats, primers, surfacers and sealers, varnishes and lacquers					
Building structural and preservative products	140.6	141.3	145.4 p	149.1	149.8
Emulsion paints	138.4	138.6	142.0 p	145.8	146.5
Filling and sealing compounds of all types	127.1	134.5	134.7	147.3	147.6
275 **Soap and detergents**	133.7	141.7	142.1 p	142.7	143.6
Fatty acids	133.7	148.7	145.8	143.3	149.8
Soap (excluding scouring preparations)	130.8	136.9	137.9 p	138.2	138.4
Toilet soap in tablet form	128.3	133.7	134.7 p	134.7	134.7
Finished synthetic detergents compounded materials primarily for washing purposes	132.0	140.8	141.3 p	142.6	142.6
276 **Synthetic resins and plastics materials and synthetic rubber**	141.1	143.1	144.6 p	147.1	150.1
276/1 **Synthetic resins and plastics materials**	140.9	142.8	144.3 p	146.6	149.9
Products of condensation, polycondensation and polyaddition	141.1	142.3	145.1 p	149.7	151.9
Products of polymerisation and copolymerisation	138.7	139.5	140.9 p	141.7	145.1
Acrylics	128.9	131.4	131.4	131.4	134.7
Polyethylene granules, compounds and powders	134.0	136.7	139.4 p	140.8	141.8
Styrene polymers and copolymers	136.4	131.7	134.6 p	136.7	138.3
Cellulosics and other plastics and modified natural resins	132.7	141.6	143.6	145.2	145.7
Intermediate forms between the resin and semi-fabricated stages	147.4	148.3	148.5 p	148.7	159.4
Semi-finished products	144.6	147.7	148.8 p	153.8	155.3
Polyvinyl chlorides	155.1	156.3	157.6	158.6	168.3
277 **Dyestuffs and pigments**	149.5	165.0	165.1 p	165.4	165.7
Pigments	149.9	165.6	165.7	166.1	166.5
Inorganic pigment colours	159.6	166.2	166.2 p	167.6	168.6
White lead [1]	150.4	194.0	207.7	225.0	236.1
278 **Fertilisers**	139.6	143.8	145.2	145.6	145.6
279 **Other chemical industries**	141.8	149.8	152.2 p	154.4	154.1
Explosives, fireworks, etc	152.3	162.6	164.2	165.1	165.6
279/4 **Formulated pesticides**	140.5	148.7	151.1 p	153.3	153.8
Disinfectants	133.9	146.0	148.1 p	148.6	148.9
Pesticides	149.6	155.3	159.8	164.6	165.6
Insecticides (other than seed dressings)	151.2	156.7	161.6	167.0	167.0
Containing organophosphorous compounds	130.6	127.2	126.9	126.9	126.9
Preparations for plant control					
Herbicides	139.1	142.6	144.6 p	146.6	147.0
279/6 **Surgical bandages, etc**	139.0	149.0	154.2	154.4	154.8
Surgical and medicated dressings	141.7	154.8	159.0	159.3	159.
Disposable sanitary goods					
Sanitary towels and tampons	136.6	143.7	150.0	150.0	150.8
279/7 **Photographic chemical materials**	143.5	147.2	148.6	151.7	151.9
VI Metal manufacture					
311/2 **Steel**	151.2	158.1	158.5	158.9	159.3
Non-alloy steels	151.2	157.4	157.8	158.1	158.5
Ingots, blooms, billets, slabs	160.7	165.0	165.0	165.0	165.0
Heavy rails, sleepers and fishplates, etc	148.6	148.9	160.1	160.1	160.1
Heavy rolled products, 80 mm and over	161.0	161.4	162.1	163.4	163.4
Angles, tees and other sections	156.6	156.9	158.0	160.2	160.2
Girders, beams, joists, columns	163.0	163.2	163.7	164.6	164.6
Rods and bars in coils	143.8	151.4	151.4	151.4	151.4
Steel strip (non-alloy)	145.9	158.1	158.1	158.1	158.1
Hot rolled strip (under 600 mm wide)	145.0	156.3	156.3	156.3	156.3
Plates in coils and cut lengths	132.1	134.4	134.4	134.4	134.4
Steel sheet (under 3 mm thick)	154.5	162.1	162.1	162.1	162.1
Uncoated steel sheet	158.7	167.6	167.6	167.6	167.6
Uncoated steel sheet hot rolled	140.4	152.0	152.0	152.0	152.0
Uncoated steel sheet cold reduced	160.6	169.2	169.2	169.2	169.2
Electrical steel sheet	158.7	167.7	167.7	167.7	167.7
Galvanised steel sheet	143.5	147.7	147.7	147.7	147.7
Light sections	143.1	145.1	145.8	147.0	147.0
Tinplate and blackplate	165.3	171.5	171.5	172.3	172.7
Tinplate	165.4	171.6	171.6	172.4	172.8
Blackplate	155.2	162.4	162.4	162.4	162.4
Bright steel bars, non-alloy	156.5	168.3	168.3	168.6	168.6
Forgings (other than drop forgings)	164.5	176.8	177.1	177.5	177.9
Non-alloy steel castings	152.9	169.8	170.1	170.1	170.1
Stainless and heat resisting alloy steels	146.3	153.4	153.4	153.4	153.4
Sheets (under 3 mm thick)					
Stainless steel sheets	154.7	166.9	166.9	166.9	166.9
Stainless steel castings	146.4	162.3	162.3	162.3	162.3
Alloy steels other than stainless and heat resisting	153.9	166.5	166.7	168.1	168.4
Ingots, blooms, billets, slabs (excluding tube)	159.7	172.5	173.1	176.8	176.8
Bars and rods other than in coil (excluding bright bars)	149.0	160.4	160.5	162.4	161.9
Plates in coils and cut lengths	124.6	138.4	138.4	138.4	138.4
Alloy steel castings	151.2	164.2	164.4	164.4	164.4

Table 3 Commodities produced in the United Kingdom (published monthly) *continued*

1975 = 100

1968 SIC order or MLH and industry	1978 Mar	1978 Dec	1979 Jan	1979 Feb p	1979 Mar p
	Structural steel	146.4	150.0	150.2	150.6	150.6
	Steel for reinforcement (cut, bent, and delivered)	150.6	158.9	158.9	158.9	158.9
	Light re-rolled bars and sections	143.9	148.3	148.5	148.9	152.4
312	**Steel tubes**	151.8	163.3	163.4 p	163.5	163.5
	Fittings for steel tubes	140.2	151.0	153.7 p	155.0	155.0
	Steel tubes (other than electric conduit tubes)	157.5	171.4	171.4 p	171.4	171.4
313	**Iron castings and pig iron**	147.8	159.8	161.9 p	166.0	169.3
313/3 313/4	**Iron castings**	148.4	161.2	163.6 p	166.0	168.8
313/3	**Engineering castings**	145.4	155.3	158.6 p	161.5	163.5
	Vehicle iron castings	141.4	151.4	157.3 p	160.2	161.0
	Industrial and marine iron castings	148.7	158.4	159.7 p	162.6	165.6
	Heavy engineering	147.4	157.5	158.6 p	164.8	166.1
	Light engineering and hydraulic	144.8	157.3	158.7 p	160.9	162.0
313/4	**Other iron castings**					
	Building and domestic goods	151.4	175.7	176.0 p	178.8	188.4
	Cast and spun iron pipes and fittings	150.7	164.5	164.5 p	164.5	166.3
321	**Aluminium and aluminium alloys**					
	Semi-manufactures (excluding castings and forgings)					
	Aluminium plate, sheet, strip, circles and blanks	185.7	180.6	180.3	185.7	185.7
	Aluminium extrusions and tubes (bars, rods, sections, etc)	174.9	186.7	185.6	184.8	184.8
	Aluminium forgings	171.5	191.5	191.5	191.5	191.5
322	**Copper, brass and other copper alloys**					
	Copper					
	Copper tubes	134.0	153.9	161.2	176.2	190.7
	Copper sheet and strip	130.9	150.3	157.1	172.5	177.3
	Brass and other copper alloys					
	—unwrought	118.0	133.7	138.5	157.7	161.3
	—semi-manufactures	118.6	139.0	142.7	156.0	160.6
323	**Miscellaneous non-ferrous metals**					
	Lead and lead alloys					
	—semi-manufactures	157.1	209.9	231.9	243.6	247.3
	Nickel [1]	121.3	105.2	99.4	107.4	125.7
	Titanium	155.8	208.4	212.0	212.0	212.0
VII	**Mechanical engineering**					
331	**Agricultural machinery**	159.8	174.8 p	176.1 p	176.4	177.4
	Soil preparation and cultivation machinery	159.3	169.8	170.6	171.0	173.9
	Harvesting, threshing, feed processing etc, machinery	160.6	179.3 p	181.4 p	181.8	182.0
	Pick-up balers	161.5	178.3	179.8	179.8	179.8
	Grinding mills and meal mixers excluding combined mills and mixers)	152.5	165.5	173.7	175.7	176.1
	Milking machinery					
	Milking machines, including parts	169.9	173.0	173.0	173.0	173.6
	Elevators and conveyors (excluding tractor mounted hydraulic loaders)	165.3	182.6	187.2 p	187.2	187.8
332	**Metal working machine tools**	152.1	166.7 p	169.0 p	169.7	170.7
332/1	**Metal cutting machine tools**	154.0	167.6	170.4	170.6	171.4
332/2	**Metal forming machine tools**	150.2	165.7 p	167.4 p	169.5	170.7
333	**Pumps, valves, compressors and fluid power equipment**	144.2	156.0 p	157.8 p	159.1	159.6
333/1	**Pumps**	147.1	157.3 p	159.3 p	160.8	161.0
	Centrifugal pumps	148.3	156.0 p	158.5 p	159.8	160.0
	Positive displacement pumps	144.0	163.5	163.5	164.4	164.4
	Kerbside petrol and oil measuring pumps and parts	143.3	149.2	152.1	160.2	161.1
333/2	**Industrial valves**	135.8	148.2	149.4 p	151.0	152.3
	Valves – ferrous metal	133.0	144.8	145.5 p	146.1	146.7 e
	Iron valves	147.8	160.6	161.1	162.9	163.5
	Steel valves	128.1	139.5	140.3 p	140.5	141.1
	Valves – non-ferrous metal	143.6	158.1	160.7	165.1	168.2
333/3	**Air and gas compressors**	155.2	166.7	167.2 p	167.9	169.2
333/4	**Fluid power equipment**	147.2	159.6 p	161.8 p	163.1	163.3
	Oil/hydraulic fluid power equipment	148.1	163.0 p	166.3 p	166.5	166.8
	Pneumatic control fluid power equipment	145.5	153.4	153.5	157.0	157.0
334	**Industrial engines**	161.6	172.6	180.3 p	182.6	183.6
	Diesel compression internal combustion engines	161.3	173.0	180.9 p	183.4	184.4
336	**Construction and earth-moving equipment**	164.1	175.7	177.9 p	178.6	178.8
	Excavators, trenchers, ditchers and digging machinery including parts	170.6	183.2	186.7	187.1	187.1
	Wheeled tractor shovels, crawler tractors, dumpers and other earth-moving equipment	163.9	176.4	178.1	178.8	178.9
	Dumpers and dump trucks	151.3	161.9	163.4	164.1	164.1
	Concrete mixing and placing machinery	152.2	161.7	166.6 p	168.8	170.7
	Crushing, pulverising and screening plant, including parts	151.6	163.6	165.7 p	166.5	167.1
337	**Mechanical handling equipment**	148.4	159.5	162.1 p	164.3	164.6
337/2	**Cranes and transporters**	149.4	160.2	165.0	166.1	166.1
337/4	**Lifting and winding devices**	147.8	160.7	162.9	163.3	163.6
337/5	**Powered industrial trucks and tractors**	155.6	166.2	169.3 p	174.6	174.7
339/1	**Mining machinery**	143.8	155.0 p	157.4 p	158.4	159.1
339/3	**Refrigerating machinery**	158.6	167.8 p	171.0 p	172.1	173.9 e
339/5	**Scales and weighing machinery (excluding precision balances)**	144.8	155.2	168.0	169.1	169.1
339/6	**Portable power tools**	146.7	157.7 r	158.2	158.9	160.2
	Portable power tools, non-electric – pneumatic					
	—for civil engineering, mining and quarrying	154.3	168.4	168.4	172.1	173.1
	—for general engineering	150.5	167.7	167.8	167.9	172.8
	Portable power tools, electric	144.0	151.5	152.2	152.2	152.5
	—power drills	150.9	156.6	157.1	157.1	157.1
339/7	**Food and drink processing machinery**	148.1	158.9 p	168.3 p	169.9	170.3
339/9	**Miscellaneous (non-electrical) machinery**	153.8	167.3 p	168.8 p	171.0	171.3
VIII	**Instrument engineering**					
352	**Clocks, watches and time recorders**	151.8	157.8	160.9 p	163.0 e	163.5 e

	Commercial vehicles and chassis exceeding 16 tons gvw	154.5	168.5	171.2	171.3	171.3
	Public service vehicles	156.3	175.8	177.8	177.9	178.0
XII	**Metal goods not elsewhere specified**					
390	**Engineers small tools and gauges**	165.3	181.6	182.4 p	186.3	188.3
	Engineers cutting tools	165.3	182.9	183.4 p	185.2	186.6
	Diamond tipped tools and diamond dies	155.7	201.9	211.8	224.9	224.9
	Saws					
	Hacksaw blades	186.0	201.8	203.0	214.0	216.6
	Milling cutters	149.3	163.4	163.4	163.4	165.7
	Engineers gauges and measuring instruments	162.8	183.6	183.8	190.9	192.1
391	**Hand tools and implements**	160.1	173.4	175.0	177.0	177.4
	Agricultural, horticultural and foresters hand tools	173.1	187.4	187.4	187.4	187.4
	Hand saws and hand saw blades	178.0	204.9	204.9	206.0	206.2
	Hand tools and implements excluding agricultural and foresters hand tools and saws and saw blades	156.7	169.7	172.1	175.1	175.5
	Pliers, pincers and nippers, etc	182.1	193.7	196.9	203.3	204.4
	Spanners and wrenches	160.3	173.6	175.7	181.6	182.6
	Planes, hammers, cold chisels etc, screwdrivers, wood chisels and gouges	155.3	174.7	176.1	176.1	176.1
	Measuring and marking out tools	146.1	155.4	155.4	155.6	155.7
392	**Cutlery, spoons, forks and plated tableware etc**	148.4	163.0	164.7	166.4	167.5
	Finished cutlery suitable for domestic or personal use	151.8	157.7	167.5	169.7	171.1
	Scissors and tailors' shears (including pinking shears)	158.2	164.5	168.0	171.8	171.8
393	**Bolts, nuts, screws, rivets etc**	165.4	172.5	172.6	172.8	174.3
	Precision standard bolts etc, of high tensile steel	150.1	152.5	152.7	152.7	153.8

Table 3 **Commodities produced in the United Kingdom (published monthly)** *continued*

1975 = 100

1968 SIC order or MLH and industry	1978 Mar	1978 Dec	1979 Jan	1979 Feb p	1979 Mar p
394 **Wire and wire manufactures**	145.9	156.9	158.8	161.5	168.0
Iron and steel wire	149.3	158.4	159.3	159.7	165.9
Single drawn wire other than alloy and high carbon steel	148.7	160.9	160.9	160.9	160.9
Wire ropes (excluding insulated electric wire and cable)	144.5	150.8	155.9	158.0	158.0
Iron and steel woven wire, cloth gauze fabric etc, (excluding netting and fencing) of square or rectangular mesh	158.3	159.4	159.4	160.6	173.8
—stainless steel	149.7	150.3	150.3	151.9	163.0
—other than stainless steel	162.7	164.1	164.1	165.1	179.3
Other wire manufactures, ie grille netting, fencing reinforcement fabric etc	147.4	157.3	157.3	157.3	158.4
Wire of copper, brass and other copper alloys					
Woven wire cloth, gauze fabric, etc, of copper and brass, etc	150.2	151.8	151.8	152.4	174.8
Reinforcement fabrics	143.3	150.3	150.3	150.3	151.7
Chain link fencing	155.4	170.0	170.0	170.0	171.3
399 **Metal industries not elsewhere specified**	150.9	163.0	164.6 p	166.6	167.8
399/1 **Metal furniture**	141.2	156.9	158.2	158.3	159.1
Office metal furniture	149.4	165.5	167.8	168.0	168.3
Filing cabinets and other filing containers	155.9	172.1	172.2	172.2	172.2
399/2 **Metal windows and door frames**	163.1	175.3	177.4	179.4	181.9
399/6 **Domestic hollow ware**	154.0	163.6	167.4	174.3	174.3
Cookware	157.5	168.4	171.3	181.6	181.6
399/7 **Vats, tanks, cisterns and other industrial hollow ware**	149.8	162.4	162.6	162.6	162.7
Steel drums	152.2	165.6	165.8	165.8	165.8
399/8 **Needles, pins, fishhooks and other metal smallwares**	160.7	181.6	181.9	184.4	186.1
399/9 **Domestic gas appliances**	159.1	169.9	171.3	171.5	172.0
Gas cookers	159.9	169.5	170.8	170.8	170.8
Gas fires and space heaters	159.1	171.6	171.8	172.6	174.3
Water heaters and other domestic gas apparatus (excl. refrigerators and meters)	156.0	168.7	172.5	172.6	172.7
399/12 **Miscellaneous metal goods**					
Sanitary ware and plumbing fixtures and fittings	150.5	166.4	169.9	175.9	180.1
Fire extinguishers (hand operated chemical type only)	134.4	150.5	151.5	152.4	152.4
Catering equipment	151.5	164.9	166.2	168.1	169.2
Plumbers brassware	149.3	167.8	168.0	173.4	176.3
XIII Textiles					
411 **Man-made fibres production**	126.5	129.1	130.4	132.3	133.1
Man-made fibres – continuous filament yarn	135.6	139.4	141.2	144.5	145.7
412 **Spinning and doubling on the cotton and flax systems**					
Single yarns spun on the cotton and flax systems	139.4	151.7	153.5	153.9	155.2
Single yarns of man-made staple fibres spun on the cotton and flax systems	r39.2	144.3	145.1	145.1	146.1
Man-made continuous filament yarns, textured, bulked or crimped – synthetic fibres	119.0	131.0	131.5	135.2	137.2
Finished thread for sewing, embroidery, etc	166.8	180.6	181.1	181.1	181.1
—of man-made fibres	140.0	150.6	151.2	151.2	151.2
413 **Weaving of cotton, linen and man-made fibres**	134.6	141.1	144.3	144.6	145.5
Woven cotton cloth in the loomstate	140.3	148.4	149.1	149.5	150.6
Cloth wholly of man-made continuous filament yarn on the loomstate	129.1	136.3	139.0	139.0	139.8
Man-made fibre tyre cord and tyre fabric	134.9	133.0	140.4	140.4	140.4
Woven linen	162.5	172.1	172.8	177.0	177.0
Woven fabric of glass fibre	162.4	164.5	173.3	173.3	173.3
414 **Woollen and worsted products**	151.0	158.9	159.7	161.5	165.4
414/1 **Wool sorting, cleaning, etc and combing and top making**					
Wool tops	157.3	160.3	159.6	163.5	169.9
414/2 **Yarns spun on the worsted and semi-worsted systems**	144.8	154.4	155.0	156.9	159.9
Yarns of wool spun on the worsted system	152.0	159.2	159.3	160.4	162.4
Yarns of man-made fibres spun on the worsted system	133.6	140.2	140.6	142.0	143.5
414/3 **Woven worsted fabrics**	145.5	150.0	150.4	150.5	152.8
414/4 **Wool rag'**	161.0	164.5	166.2	164.5	166.9
414/5 **Woollen spinning and weaving**					
Woven woollen fabrics (other than blankets)	156.4	166.7	166.9	167.9	170.0
Woven woollen fabrics (other than blankets) containing 50 per cent or more by weight of wool or fine animal hair	161.0	169.4	169.5	170.7	171.1
Spinning and weaving of jute and other yarns on the jute system	134.5	142.8	142.8	143.0	145.0
Spun yarns of jute and man-made fibres	137.4	151.5	151.5	152.2	158.6
Woven cloths of jute and man-made fibres	130.4	139.4	139.4	139.4	139.4
Woven cloths of polypropylene on the jute system	134.3	139.0	139.0	139.0	139.0
Rope, twine and net	123.9	128.8	129.1	129.2	129.8
Cordage, cables, ropes and twine of textile materials (excl. agricultural twines)	122.9	130.1	130.4	130.6	131.4
417 **Hosiery and other knitted goods**					
Socks and stockings	130.3	138.8	144.5	145.7	146.3
Women's socks and stockings	122.2	129.8	136.8	137.8	138.6
419 **Carpets and rugs**	146.6	154.4	156.5 p	160.1	160.4
Woven carpets and carpet type rugs	160.0	168.2	171.5	176.5	176.8
—faced with yarn containing at least 50 per cent but less than 100 per cent by weight of wool	162.1	171.0	175.3	179.4	179.8
Rugs including pile fabric, deep pile knitted	149.7	159.1	159.4	165.4	167.6
421 **Narrow fabrics**					
Petershams, galloons and ribbons	154.0	157.5	162.5	170.6	170.9
422 **Made-up textiles**					
422/1 **Household textiles and handkerchiefs**	138.2	147.9	148.8 p	149.2	150.1
Hand and bath towels	149.4	156.9	157.8 p	157.8	158.9
429 **Other textile industries**	160.6	168.2	175.1	176.2	176.2
429/1 **Asbestos manufactures**	167.3	173.6	184.0	184.0	184.0
429/2 **Miscellaneous textile industries**					
Mechanically bonded fibre-needled fabrics	154.5	168.2	168.9	169.9	170.0
XIV Leather goods and fur					
431/1 **Leather**					
Finished leather – for footwear	133.2	156.3	166.0	166.0	179.7
432 **Leather goods**	146.0	152.8	163.9 p	164.9	164.9
XV Clothing and footwear					
441 **Weatherproof outerwear**	134.3	143.6	146.2 p	146.7	146.7
Raincoats (excl. those of infants)					
Raincoats other than of plastics material	131.2	139.0	142.0 p	142.3	142.3
Weather protective industrial clothing of PVC coated materials	148.1	154.2	163.0	168.3	168.3
442 **Men's and boys' tailored outerwear**	133.3	145.0	145.7	147.0	148.3
Men's and boys' suits	140.1	153.7	153.7	155.4	157.8
Men's trousers (sold separately)	123.5	134.5	134.7	135.3	135.6
444 **Overalls and men's shirts, underwear, etc**	147.5	151.9	155.5 p	156.1	156.4
444/2 **Men's and boys' shirts, underwear and nightwear**	137.4	141.6	146.1 p	146.5	147.0
449 **Corsets, gloves and miscellaneous dress industries**	143.5	152.7	159.4	160.8	161.1
449/1 Corsets	133.4	139.0	145.9	149.2	149.2
Brassieres	153.1	164.3	175.6	175.7	175.7
449/3 **Umbrellas and walking sticks**	135.3	142.0	144.9	144.9	145.7
450 **Footwear**	144.2	153.4	157.8	158.3	159.0
Outdoor footwear	144.5	154.4	158.5	159.0	159.6
Boots and shoes with uppers wholly or mainly of leather	152.1	163.8	168.1	168.9	169.8
Men's boots and shoes with uppers wholly or mainly of leather	154.8	162.1	166.6	168.3	169.1
Women's boots and shoes – with uppers wholly or mainly of leather	153.6	167.4	173.6	173.6	175.2
Slippers, houseshoes and ballet shoes					
Women's slippers, houseshoes and ballet shoes	147.5	149.1	161.2	161.2	162.6
XVI Bricks, pottery, glass, cement, etc					
461 **Bricks, fireclay and refractory goods**	159.0	170.2	171.8 p	172.9	173.9
461/1 **Refractory goods**	166.3	171.9	174.2 p	174.5	176.2
Refractory bricks and shapes	167.9	174.0	174.6 p	175.1	177.0
Firebricks and shapes	151.9	159.5	161.6 p	161.7	162.8
461/2 **Clay building bricks and other non-refractory goods**	152.6	167.9	168.8	170.4	170.9
Common, facing and engineering bricks	151.5	168.5	168.6	169.7	170.3
Common bricks	147.8	168.4	168.4	168.8	169.5
—Non-fletton (ex-works)	152.3	174.5	174.5	175.3	176.6
—Fletton (delivered)	142.2	160.7	160.7	160.7	160.7
Facing bricks	155.2	169.3	169.5	171.2	171.5
—Non-fletton (ex-works)	162.4	175.7	176.0	178.7	179.1
—Fletton (delivered)	142.0	157.4	157.4	157.4	157.4
Engineering bricks (ex-works)	148.2	165.4	165.3	165.6	167.4 e
Engineering bricks (delivered)	154.4	164.7	169.3	170.0	171.7
Clay roofing tiles – (ex-works)	146.5	162.6	173.7	173.7	173.7
Unglazed floor quarry tiles – (ex-works)	158.5	170.2	176.3	176.3	176.3
462 **Pottery**	146.8	159.2	160.7 p	165.0	165.2
462/1 **Electric ware incl. insulators and insulator fittings wholly or mainly of ceramic material**	147.3	157.4	158.0	164.8	166.2
462/2 **Vitreous china sanitary ware and pottery tiles**	148.1	160.1	162.5	162.5	162.5
Tiles, excl. pre-cast concrete tiles	131.0	145.2	145.2	145.2	145.2
Vitreous china sanitary ware	170.3	179.5	185.0	185.0	185.0
463 **Glass**	155.3	165.2	166.6 p	167.0	167.6
463/1 **Glass other than containers and vacuum ware**	154.0	164.1	165.4 p	166.0	166.8
Flat glass	157.6	167.4	167.4	167.4	167.4
Domestic and ornamental glassware	154.5	166.1	171.9	173.1	173.1
—Hand gathered	153.1	159.4	165.4	167.8	167.8
—Mechanically gathered	155.1	168.8	174.4	175.2	175.2
Laboratory hygienic and pharmaceutical glassware and balls, tubing and rods	147.9	161.0	163.1	164.8	165.1
Glazing sheet and plate glass	159.5	169.0	169.0	169.0	169.0
463/2 **Glass containers and vacuum ware**					
Glass containers	156.8	166.5	167.8	168.0	168.4
non-tubular for all products excl. wines, spirits, beer and cider	156.4	168.3	170.3	170.6	171.3
464 **Cement**					

Table 3 **Commodities produced in the United Kingdom (published monthly)** *continued*

1975 = 100

1968 SIC order or MLH and industry	1978 Mar	1978 Dec	1979 Jan	1979 Feb p	1979 Mar p
Calcareous cement (other than clinker) delivered in bulk	159.7	169.2	173.7 p	183.0	185.3
Cement in bags	160.3	170.0	175.2 p	186.1	189.7
469/1 **Abrasives**	161.3	172.2	172.6	173.3	174.0
Abrasive wheels (disc wheels, segment sharpening stones and other forms of bonded abrasives incl diamond)	164.2	175.3	175.9	176.9	176.9
Coated abrasives – abrasive paper and cloth	156.1	166.5	166.5	166.5	168.6 e
469/2 **Miscellaneous building materials and mineral products**	163.8	176.0	179.3 p	180.6	183.3
Plasterboards	138.2	148.1	148.1	148.1	148.1
Precast concrete goods	158.1	169.7	170.0 p	172.2	173.7
Concrete blocks, bricks, kerbs and edgings					
Flagstones	145.6	168.4	169.4	178.4	180.3
Kerbs and edgings	135.5	158.0	158.9	168.7	169.7
Precast concrete building blocks – delivered	157.5	173.0	174.7	179.3	184.7
Precast concrete pipes to BS556 – delivered	173.6	176.5	176.5 p	176.5	176.5
Roofing tiles and fittings and concrete/terrazzo floor and wall tiles	148.6	157.0	157.0	157.4	162.5
Asbestos cement goods	184.7	212.1	212.1	212.1	228.6
Bituminous and flax felts	153.5	157.4	157.4	157.4	159.4 e
Insulating materials for thermal and acoustic purposes n.e.s.	151.6	162.7	163.5	169.9	174.0

Plaster (gypsum)	139.5	147.7	147.7	147.7	147.7
XVII Timber, furniture, etc					
471/1 **Timber, sawmilling etc**					
Homegrown sawn hardwood	159.3	178.1	181.7	182.1	187.0
Hardwood flooring blocks and mosaic flooring	139.2	143.9	146.2	146.7	147.1
471/2 **Builders' woodwork**	151.6	158.7	160.1	160.6	161.3
Door sets, leaves and frames and window frames	155.7	159.0	160.5	160.5	162.0
Door leaves	155.8	160.3	161.0	161.0	164.0
Window frames	155.8	157.6	159.9	159.9	159.9
Timber structures and structural components	147.6	159.5	159.6	160.9	161.1
472 **Furniture and upholstery**	142.3	149.9	153.3	157.0	158.3
Domestic upholstered furniture	137.2	145.8	148.7	152.2	153.6
Domestic wooden furniture	146.2	154.4	157.5	161.3	162.9
Bedroom furniture, excl. built-in	140.4	150.6	153.5	154.7	156.6
Kitchen furniture (excl. built-in) other than tables and seating	146.1	163.3	166.6	169.9	172.2
Dining/living room furniture, excluding built-in	145.5	165.4	166.0	167.7	170.4
Seating	148.5	155.2	159.8	164.1	164.7
Occasional furniture for dining/living room	145.0	153.0	155.6	161.1	162.0
473 **Bedding and soft furnishings**	142.5	150.4	155.2	158.4	160.2
Fully finished mattresses	153.8	163.4	166.2	173.3	175.6
Bolsters and pillows (covered)	190.3	192.3	196.6	201.8	204.0
XVIII Paper, printing and publishing					
481 **Paper and board**	130.7	134.3	136.6	138.0	140.7
Printing and writing paper and all boards for printing (excl. newsprint)	131.3	136.2	137.0	137.6	143.3
Wrapping paper	120.5	127.2	127.2	127.6	127.6
All tissue stocks	128.2	128.3	130.8	130.8	130.8
Industrial and special purpose paper	127.2	128.1	135.1	135.8	136.8
Packaging boards	138.1	141.7	142.7	148.0	149.5
Industrial and special purpose boards	136.1	139.8	140.1	140.8	141.2
Packaging products of paper, board and associated materials	131.9	140.8	142.3	142.6	143.1
482/1 **Cardboard boxes, cartons and fibreboard packing cases**	135.5	143.9	144.7	145.1	145.7
Cartons	146.0	154.2	156.1	157.0	158.5
Fibre-board packing cases	126.1	134.4	134.4	134.4	134.4
—Solid	132.7	143.2	143.2	143.2	143.2
—Corrugated	125.6	133.7	133.7	133.7	133.7
482/2 **Miscellaneous packaging products of paper and film**	123.7	133.6	136.8	136.9	137.2
Paper bags	100.8	111.9	112.3	112.5	112.7
Paper sacks	125.6	140.1	140.1	140.1	140.2
483 **Manufactured stationery**	140.9	149.8	154.1	154.8	156.1
Commercial envelopes	128.9	133.5	145.4	145.4	145.4
Business forms	140.2	147.2	147.8	149.3	150.3
Continuous stationery	130.8	137.3	137.9	139.1	140.9
Stationery and scholastic books and ruled paper	148.7	164.4	168.1	168.1	168.1
Loose leaf supplies	136.7	153.3	154.8	156.1	156.7
Filing supplies	137.2	151.3	152.0	152.0	152.0
484 **Manufactures of paper and board not elsewhere specified**	135.9	140.3	141.2	141.5	145.5
484/2 **Miscellaneous manufactures of paper and board**	142.0	142.0	142.0	142.0	149.8
Toilet paper	137.9	137.9	139.7	140.7	148.4
Household and sanitary tissue products					
Handkerchiefs and facial tissues	139.5	139.5	139.5	139.5	150.3
Kitchen rolls and towels	136.0	136.0	136.0	139.4	148.5
XIX Other manufacturing industries					
491 **Rubber manufactures**	149.8	159.1	160.0	162.7	166.0
491/1 **Tyres and tubes**	146.1	152.6	152.6	157.7	161.7
New tyre covers	146.4	151.9	151.9	157.5	161.8
—cross-ply, car and van	149.0	149.5	149.5	158.0	163.9
—radial ply, car and van	147.1	151.8	151.8	157.3	161.4
—commercial vehicles	145.4	152.1	152.1	157.5	161.8
tractors, earthmovers and land/road	144.8	153.9	153.9	157.0	160.4
491/2 **Other rubber goods**					
Belting (of rubber or plastics)	151.9	163.9	168.1	168.9	169.2
Conveyor and elevator belting	154.9	167.7	173.4	174.1	174.5
Belting other than conveyor and elevator belting					
Transmission belting	143.7	153.7	153.7	154.9	154.9
Miscellaneous rubber products					
Cellular products of rubber	134.5	142.3	151.0	151.2	156.8
492 **Linoleum, plastics floor-covering, leathercloth etc**	134.5	140.3	140.3	141.4	143.9
493 **Brushes and brooms**	145.6	154.7	160.9	161.7	163.0
Decorating brushes and rollers	141.2	150.6	157.3	158.4	160.7
Toilet brushes	147.6	157.5	165.5	168.0	171.0
494 **Toys, games, children's carriages and sports equipment**	147.4	152.5	159.4	163.5	164.2
494/1 **Toys and games**	145.0	147.2	156.7	162.2	162.3
Dolls and soft toys	150.7	156.6	167.1	167.1	168.1
Mechanically self-propelled and die-cast metal toys	145.9	146.4	154.6	167.8	167.8
—mechanical (self-propelled) including train sets	140.1	141.6	156.7	157.0	157.0
—die-cast	146.9	147.2	154.3	169.6	169.6
Indoor table games	141.7	143.7	157.4	156.2	156.2
494/3 **Sports equipment**	156.8	170.2	170.2	171.4	174.4
495 **Miscellaneous stationers' goods**	138.7	144.6	145.3	145.3	147.3
495/1 **Pens and pencils**	146.9	155.4	157.5	157.5	158.3
Ballpoint pens	148.4	154.7	154.7	154.7	156.2
Fountain pens, stylos and markers	146.3	149.4	155.9	155.9	156.0
Fountain pens with stainless steel nibs	146.9	155.0	162.3	162.3	163.1
496 **Plastics products**					
Building materials of plastics	152.4	161.3	162.1	163.6	168.5
Pipes and fittings of plastics	158.2	168.1	168.6	169.3	176.4
Rainwater pipes and fittings of plastics	158.0	164.6	167.0	168.3	173.5
Packaging products and transit containers of plastics	143.7	147.2	151.0	152.6	159.8
Other plastics products					
Haberdashery of plastics (including slide and zip fasteners)	138.2	150.6	150.5	150.5	156.2
499/1 **Musical instruments**					
Pianos	155.5	155.8	157.4	163.5	163.5
Other indices					
312, 361/2, 362, 369/5 Part Electrical installation materials, domestic	140.2	154.3 p	154.5 p	158.3	159.2 e
338, 399/1, 399/3, 472 Part Office equipment and machinery (excluding computers and calculators)	139.7	151.8	154.0	154.4	155.0
399/1, 472 Part Office furniture	142.6	154.5	157.5	158.4	158.5
Special indices					
Granite and limestone roadstone	157.2	171.5	171.7	172.6	176.6
Petroleum products	152.3	152.3	152.3	157.9	161.9
Steel sheets	155.9	164.3	164.3	164.3	164.3
Steel sheet piling	162.6	163.0	168.8	179.4	179.4
Finished stainless steels	142.0	142.1	142.1	142.1	142.1
Finished steels (other than sheets tinplate, tubes, forgings and castings)	146.5	151.9	152.4	152.8	153.3
Steel castings	151.3	166.9	167.1	167.1	167.1
Semi-finished steels for forgings (other than drop forgings)	162.2	169.6	169.9	171.6	171.6
Malleable iron castings	156.5	168.6	170.9	171.6	171.6
Wrought aluminium	173.1	180.9	180.6	182.4	183.9
Brass ingots	118.3	129.8	133.5	150.1	153.9
Industrial pumps	147.3	157.8 p	159.7 p	160.9	161.0
Primary and secondary batteries	162.4	170.1	173.6	179.1	182.2
Door sets, leaves and frames	155.7	160.2	161.1	161.1	163.8
Domestic furniture	143.3	151.7	154.7	158.4	160.0
Divan sets	147.2	159.0	163.6	167.5	168.3

[1] Index based on scheduled outer zone prices for minimum bulk loads of 500 gallons (motor spirit 1000 gallons) exclusive of rebate.
[2] Source of price information: trade publications.
[3] Inclusive of VAT and car tax.
[4] These indices are specially constructed outside the normal wholesale price index structure. Their continued publication is a temporary measure to enable extant VOP contracts to be completed.

p Provisional. c Corrected. r Revised. e Estimates which are subject to possible major revision.

Wholesale price indices: further information

Table 4 Commodities wholly or mainly imported into the United Kingdom

1975 = 100

	1978 Mar	1978 Dec	1979 Jan	1979 Feb p	1979 Mar p
Hides, skins and fur skins undressed					
Hides and skins, imported	223.7	332.2	349.9	391.5	463.7
Hides	218.0	317.3	344.9	383.8	461.5
Wet	219.1	320.0	349.7	388.6	464.7
Dry	201.9	276.6	272.7	311.2	413.6
Calf skins	297.6	400.6	415.4	492.1	492.1
Hides and skins, UK origin	221.2	329.7	355.1	410.9	437.0
Hides and skins, UK origin and imported	219.3	322.4	348.5	397.2	443.6
Oilseeds, oilnuts and oil kernels	144.0	147.3	151.2	155.1	158.5
Groundnuts, African, cif Europe [1]	147.1	158.7	159.6	156.2	148.4
Copra, Philippine, cif Europe [1]	197.4	259.2	289.0	297.8	290.1
Palm nuts and kernels, Nigerian, cif Europe [1]	192.7	233.4	249.7	258.6	261.7
Soya beans, US No. 2 grade, cif UK [1]	143.8	140.2	142.4	147.2	151.6
Linseed, Canadian No. 1, cif UK [1]	79.9	91.1	94.1	91.0	101.9
Animal oils and fats					
Herring oil [1]	152.8	133.6	129.0	132.0	143.9
Fixed vegetable oils and fats					
Cottonseed oil, washed [1]	105.4	121.4	118.0	129.8	135.3
Groundnut oil, London, spot price [1]	151.5	202.9	238.7	238.7	238.7
Olive oil, Spanish edible, max. 1% ffa [1]	111.2	117.1	118.9	119.8	119.8
Linseed oil, cif London/Hull [1]	67.6	75.5	83.2	100.9	104.6
Palm oil, crude, London, spot price [1]	170.8	159.4	161.7	174.0	176.4
Coconut oil, cif Europe [1]	187.3	249.9	224.7	224.7	271.2
Castor oil, Brazilian No. 1 grade [1]	191.2	147.9	151.7	151.7	155.0
Crude rubber					
Natural rubber smoked sheet [1]	155.9	185.9	178.4	197.8	191.8
Wood, lumber and cork					
Softwood (delivered to consumers)	145.1	152.6	155.1	157.9	161.4 e
Hardwood (ex yard or wharf)	160.3	180.2	184.6	189.6	190.8
Keruing	123.0	165.3	169.5	170.5	169.8
Ramin	145.8	192.2	208.3	220.2	222.2
Utile	195.0	210.2	212.0	212.7	215.0
Meranti	131.1	159.7	163.5	159.4	159.4
Wood and cork manufactures					
Plywood and blockboard (delivered to consumers	146.1	156.5	157.7	161.4	162.9 e
Pulp and paper					
Woodpulp	88.6	97.2	103.2	103.3	101.6

	1978 Mar	1978 Dec	1979 Jan	1979 Feb p	1979 Mar p
Paper, paperboard and manufactures thereof					
Paper and paperboard	126.6	131.4	135.1	135.1	135.1
Newsprint paper	147.4	147.4	159.9	159.9	159.9
Textile fibres					
Raw wool, greasy or fleece washed, imported	142.6	149.7	147.7	155.4	164.6
Merino	132.3	133.2	131.4	136.5	143.6
Crossbred	155.3	170.3	168.0	178.9	190.6

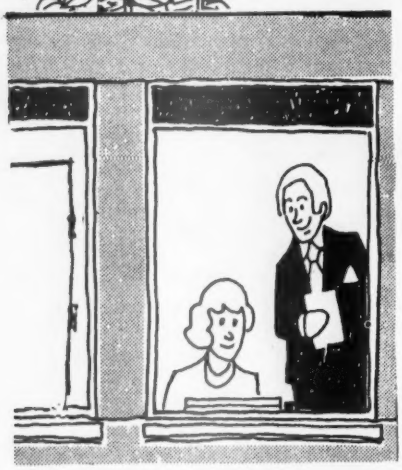
Office development permits: fourth quarter and year 1978



Approximately the same number of office development permits were issued by the Department of the Environment in 1978 as in 1977 but the area covered by these permits was appreciably greater.

Fourth quarter 1978

In the fourth quarter of 1978, the number of permits issued fell to 28 compared with 54 in the previous quarter. The floor space covered by these permits fell from 6.2 million sq ft to 2.4 million sq ft. In the fourth quarter of 1977, 45 permits covering 4.7 million sq ft were issued. Applicants for permits issued in the fourth quarter of 1978 stated that 94 000 sq ft of the floor space applied for would be offset by relinquishments (ie demolition of existing offices or conversions to non-office use). If permits for continuing use of existing offices are also deducted, the net potential addition to office floor space in the fourth quarter was 2.0 million sq ft compared with 3.1 million sq ft in the fourth quarter of 1977 and a quarterly average of 3.1 million sq ft for 1978 as a whole.

Annual comparison

The total area of the 161 permits issued in 1978 was 17.0 million sq ft compared with 165 permits covering 14.1 million sq ft in 1977, while the average area of floor space per permit rose from 85.3 thousand sq ft in 1977 to 105.7 thousand sq ft in 1978. Included in the 1978 total were 40 permits with a floor space of 3.6 million sq ft issued for continuing use as offices. Comparable 1977 figures for this category were 43 permits with a floor area of 4.5 million sq ft.

Gross area and area relinquished

Of the total floor space covered by permits issued in 1978, 0.8 million sq ft or 5 per cent was claimed by applicants to be offset by space relinquished for demolition or change from office to non-office use. This compares with 4 per cent in 1977 and 10 per cent in 1976.

Distribution within the south east region

During 1978, 52 permits issued for Central London accounted for 7.8 million sq ft or 46 per cent of the south east total: 4 per cent of this floor space was offset by relinquishments. Comparable figures for the whole of Greater London were 109 permits for 12.8 million sq ft (76 per cent of the total with 6 per cent relinquishments), and for the whole of the Metropolitan region, 142 permits for 15.3 million sq ft (90 per cent of the total with 5 per cent relinquishments).

Size of permits

Table 2 gives the distribution by size of permits issued. Permits are required for developments below the exemption limit if there have been previous related developments.

Inquiries: Department of the Environment, Room S13/15, 2 Marsham Street, London SW1P 3EB, tel. 01-212 8563.

Notes to tables

Application of controls. Control was applied to the Metropolitan region (Greater London and part of the south-east region) from 5 August 1965, but with retrospective application to 5 November 1964 for some projects, and to the west midland conurbation from 14 August 1965. In July 1966 control was extended to the remainder of the south east and west midland regions and to the whole of the east midland and East Anglia regions. In February 1969 East Anglia and rural parts of the midlands were excluded and since December 1970 control has applied only to the south east region.

Modifications to controls. On 14 June 1977 the exemption limit for permits throughout the south east region was raised from 15 000 to 30 000 sq ft. Office development permits are not required for offices ancillary to industrial development covered by an appropriate industrial development certificate.

Definition of areas. See *Trade and Industry*, 2 Sept 1977, page 432.

Area relinquished. Comprises office floor space relinquisned for demolition or change of use to non office use.

Domestic furniture: deliveries and orders in February

Domestic furniture deliveries for February are provisionally estimated at £85.6 million (at current prices), which gives a seasonally adjusted index of deliveries for the month of 109. The average for the latest three months, December to February, is 108 which is 1.3 per cent lower than the revised figure for the previous three months, September to November, and 4.0 per cent higher than the figure for the same period a year earlier.

The index of orders-on-hand, on a seasonally adjusted basis, yields a provisional figure of 75 for February. The average for the three months December to February is 82 which is a fall of 1.2 per cent from the revised figure for the previous three months, and is 18.8 per cent higher than the corresponding period last year.

Inquiries: Department of Industry, Trade and Prices and Consumer Protection, Economics and Statistics Division 3B, Room 107, Dean Bradley House, 52 Horseferry Road, London, SW1, tel. 01-212 8662.

New method

A new method has been used to calculate the index of deliveries – an improvement over the method used previously in that the quarterly results from Business Monitor PQ 472 are now fully incorporated into the calculation. The indices are given on 1975 constant price basis, with 1975 = 100. When price increases are large, the problems associated with revaluation to constant prices become more acute. Thus relative accuracy with which volume changes have been measured is likely to have been reduced in times of high inflation.

	Domestic furniture	Deliveries £m current values	Index of deliveries (1975 = 100) Unadjusted	Index of deliveries (1975 = 100) Seasonally adjusted	Index of orders on hand (end of month or centred average 1975 = 100) Unadjusted	Index of orders on hand (end of month or centred average 1975 = 100) Seasonally adjusted

Made-up clothing: orders and deliveries in January

In the three months ended January 1979, deliveries by the clothing industry were provisionally estimated to have been 3 per cent higher than in the preceding three months while net new orders were 9 per cent higher. Orders-on-hand at the end of January 1979 were 1 per cent lower than the end October 1978. (These comparisons are based on the seasonally adjusted series in the accompanying table.)

In using the index numbers shown in the table, it should be borne in mind that, when price increases are large, the various problems associated with constructing a constant value series become more acute. Because of these difficulties the relative accuracy of the estimates is likely to have been reduced in recent years.

All indices have been rebased from 1970 = 100 to 1975 = 100.

Inquiries: Department of Industry, Room 524, Dean Bradley House, 52 Horseferry Road, London SW1P 2AG, tel. 01-212 0116.

Wholesale textile houses: sales and stocks in February

Sales by wholesale textile houses in February showed an increase of 5 per cent on a year earlier, compared with a decrease of 8 per cent in December and an increase of 8 per cent in January.

The value of stocks at the end of February showed an increase of 14 per cent compared with the same period last year.

Inquiries: These statistics are prepared by Textile Distributors' Association. Inquiries should be addressed to the Secretary, Textile Distributors' Association, 3 Berners Street, London W1P 4JP, tel. 01-580 2902.

Textile export order to Japan is worth £500,000

Tweed Valley Knitwear Ltd has successfully negotiated with a leading Japanese consumer sales company a £500,000 textile order for autumn 1979 delivery following a British Knitting Export Council's mission to the Far East. While in Japan, Tweed Valley also took orders amounting to £200,000 for its knitwear. The range was received extremely well by the Japanese and included sweaters for both ladies and men, in cashmere, super-soft lambswool, merino, Shetland, alpaca, and a high fashion range illustrated below of lambswool/angora sweaters in the newest colours for winter, including damson, a rich deep purple, heather, a bright zippy mauve, gold, airforce and beaujolais.

Business Monitors

The publication of most Business Monitors is delayed. It is hoped that normal publications will be resumed as soon as possible.

Patents recorded 'licences of right'

Under section 46 of the Patents Act 1977 the register was noted 'licences of right' in respect of the following patents on the date specified:

23 March 1979

1520560 Nissan Motor Co Ltd
A speedometer with an excessive speed warning device

1521387 Nissan Motor Co Ltd
Power steering control circuit having RC timing circuit to provide damping action against rapid change in wheel speed

1521794 Nissan Motor Co Ltd
Internal combustion engine assembly

1521797 Nissan Motor Co Ltd
Radar-operated collision avoidance system for roadway vehicles using stored information for determination of valid objects

1522749 Nissan Motor Co Ltd
Motor vehicle with a shelf in its luggage compartment

1227144 Continental Oil Co
Phase transfer catalysis of heterogenous reactions by quaternary salts

1324763 Continental Oil Co
Phase transfer catalysis of heterogenous reactions by quaternary salts

1247854 National Vendors (USA/UK) Ltd
A method and apparatus for infusing tea, coffee and the like

1387316 Licentia Patent-Verwaltungs-Gesellschaft mit Beschrankter Haftung
Improvements in or relating to tuneable circuit arrangements

1392442 Image Analysing Computer Ltd
Methods and apparatus for checking measurements made in image analysis systems

1440032 Geoffrey William Thomas
Improvements to woodworkers vices

1497071 EMI Ltd
Improvements in or relating to the mounting of deflection sensitive elements in transducers

1533919 BFG Glassgroup
Heat transmission from enclosure wall

2 April 1979

1208695 Chrysler United Kingdom Ltd
Improvements in or relating to gear boxes

1345160 Chrysler United Kingdom Ltd
Improvements in or relating to synchromesh gear hubs

1357234 Chrysler United Kingdom Ltd
An improved clevis assembly

1357636 Chrysler United Kingdom Ltd
Improvements in or relating to anthropomorphic models

1402375 Chrysler United Kingdom Ltd
Improvement in or relating to safety belt arrangements

1485879 Chrysler United Kingdom Ltd
Improvements in or relating to vehicle head lamp systems

1506582 Chrysler United Kingdom Ltd
Improvements in or relating to motor vehicle wheel assemblies

1509177 Chrysler United Kingdom Ltd
Improvements in or relating to motor vehicle bodies

1512008 Chrysler United Kingdom Ltd
Improvements in or relating to motor vehicle seat belt arrangements

1351415 Matsuskita Electric Industrial Co Ltd
CRT display apparatus

1398037 Matsuskita Electric Industrial Co Ltd
Automatic telephone answering apparatus

1405244 Matsuskita Electric Industrial Co Ltd
An automic fastener feeding and driving apparatus

1431305 Matsuskita Electric Industrial Co Ltd
Cooking time adjusting device for use in electronic oven

1431750 Matsuskita Electric Industrial Co Ltd
Electronic ovens

1460513 The Post Office
Improvements in or relating to the measurement of noise in a communication channel

1482089 The Post Office
Improvements in or relating to automatic frequency control

1492978 The Post Office
Coaxial cable joints and method of making same

1528954 The Post Office
Digital attenuator

1220220 Coal Industry (Patents) Ltd
Improvements in or relating to material discharge apparatus

1508174 Tiyung Chen
Improvements relating to folding beds

1510343 Agfa-Gevaert Aktiengesellschaft
Improvements in and relating to developing apparatus for electrophotographic copying apparatus

Any person who claims that the proprietor of the patent is, and was at the time of entry, precluded by a contract in which the claimant is interested from granting licences under the patent may, within three months after the making of the relevant entry, apply to the Comptroller on patents form 31/77 for cancellation of the entry.

I. J. G. Davis, Comptroller

Regional Statistics No 13 1977

Regional Statistics No 13 1977 is an essential reference book for professionals with an interest in regional industry, economics, markets or social characteristics. Compiled by the Central Statistical Office, it provides in one volume a detailed quantitative picture of regional variations within the United Kingdom across a broad range of topics; the subject headings are: Regional profiles (which are a selection of key statistics for each separate region and for counties within it), Social characteristics, Social services, Health, Housing, Education, Employment, Energy, Production, distribution and investment, Agriculture, Transport, Personal incomes, Household expenditure and Regional economic accounts.

Notes are given in an Appendix explaining the sources and definitions of the figures presented, and providing references to further material on each subject covered.

Price £6.50 (by post £7.04) O/P 23-2-74.
ISBN 0 11 630171 6.

Registrations of British, community and foreign films

The following are details of films registered by the Department of Trade under the Films Acts 1960 to 1970, as amended by the European Communities Act 1972, during the week ended Friday, 13 April 1979.

BR/E indicates that the film is a British quota film, EC that the film is a quota film. The date which forms part of the registration number of each is the date on which quota life of the film expires.

Title of film	Registered no.	Playing time minutes	Date of registration	Registered in the name of	Maker's name

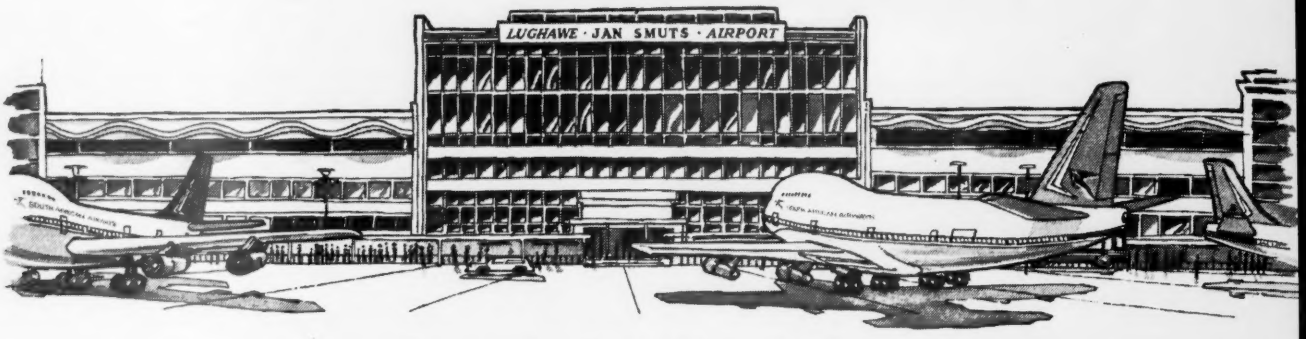
Only SAA goes further to help you in your business



Our service doesn't just stop here.

Every evening, an SAA jumbo leaves Heathrow bound for Johannesburg.

But SAA doesn't just stop there.

Our comprehensive system serves 22 major destinations throughout Southern Africa. A unique network. And our big jet fleet ensures fast, convenient services to key centres linked with our international flights.

Our flights from London are extra fast too. The latest 747 Super B and 747SP aircraft. Our Flying Hotels.

And three of our flights are non-stop. On Mondays and Fridays non-stop to Johannesburg. On Saturdays non-stop to Cape Town plus a one-stop service to Johannesburg. Ideal for the business traveller.

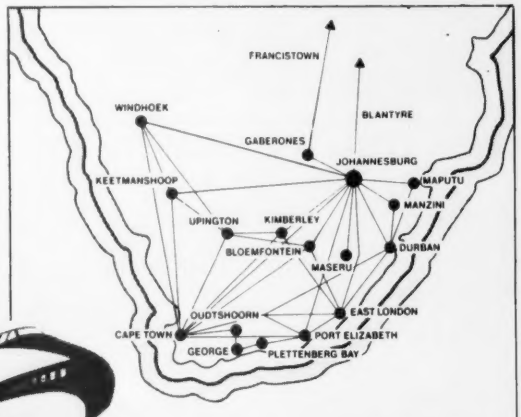
Nobody knows South Africa like South African Airways. And knowing the country as we do, we provide a first class service in the air and on the ground.

For business travel or for vital exports you need fast frequent services. That's where we come in. Your business is our business.

Our friendly, courteous passenger staff know the busy executive's needs. And cargo is cared for by the largest and most experienced cargo team in Southern Africa.

And as part of South Africa's comprehensive transport system we know about connections by air, rail or road. In fact to give you the best possible service, we pull out all the stops.

If you mean business in Southern Africa fly SAA.



Nobody knows South Africa like SAA.
